George H. Webb

MR. WEBB WAS BORN IN SCITUATE, MARCH 16, 1833. AT THE AGE OF 18 HE ENTERED THE EMPLOY OF JAMES VILA & CO., WOOL MERCHANTS, BOSTON, LATER ON BECOMING A MEMBER OF THE FIRM OF WEBB & BALL, WHERE HE CONTINUED UNTIL THE BOSTON FIRE OF 1872, WHEN HE WAS BURNED OUT.

RETURNING TO SCITUATE, HE LIVED AT THE OLD HOMESTEAD UNTIL HIS DEATH, MARCH 16, 1901.

MR. WEBB FIRST ENTERED THE SERVICE OF THE TOWN AS AUDITOR IN 1891. IN 1892 HE WAS ELECTED SELECTMAN, ASSESSOR, AND OVERSEER OF THE POOR, AND SERVED THE TOWN CONTINUOUSLY IN THESE POSITIONS UNTIL HIS DEATH. HE WAS CHAIRMAN OF THE BOARD FOR SEVEN YEARS DURING THIS PERIOD.

MR. WEBB WAS A FAITHFUL AND CONSCIENTIOUS TOWN OFFICER, WELL QUALIFIED FOR THE OFFICES TO WHICH HE WAS CHOSEN.

TOWN OFFICERS, 1906.

Town Clerk—Jetson Wade.

Treasurer.—Ernest L. Bonney.

Collector—Fenton W. Varney.

Selectmen, Assessors and Overseers of the Poor.—John D. Ferguson, E. Parker Welch, Alfred H. Litchfield.

School Committee.—Julia E. Webb, Clara M. Skeelee, Peter W. Sharp.

Superintendent of Schools.—John E. DeMeyer.

Board of Health.—George O. Allen, Fred Cole, Thomas H. Farmer.

Highway Surveyor.—John T. Fitts.

Board of Fire Engineers.—Chief Engineer, Alfred A. Seaverns.

District Engineers.—District No. 1, Joseph A. Ward; District No. 2, Frank W. Litchfield; District No. 3, Alfred A. Seaverns; District No. 4, John B. Damon; District No. 5, John F. Turner.

Registrars of Voters.—Charles F. Clapp, Charles T. Chubock, Walter J. Stoddard.

Constables.—John F. Turner, William E. Supple, Chas. M. Litchfield.

Tree Warden.—Percival S. Brown.

Auditor.—G. Minot Frye.

Town Physician.—T. Branch Alexander.

Keeper of Lockup.—Caleb W. Prouty.

TO THE INHABITANTS OF THE TOWN OF SCITUATE:

The Selectmen, Assessors and Overseers of the Poor submit the following report for the year of 1906.

At the last annual meeting the Selectmen were authorized to purchase land and erect a Hose House at North Scituate Beach, the contract for the building to be awarded to the lowest bidder.

Bids were received as follows:—

	Specifications No. 1.	Specifications No. 2.
W. E. Moran,	1,543 00	1,643 00
W. E. Supple,	1,455 00	1,473 00
W. W. Damon,	1,377 37	1,397 87
T. F. Bailey & Son,	1,091 00	1,254 00

The contract was therefore awarded to Thomas F. Bailey & Son for \$1,254.

The building was completed and the keys placed in possession of Chief Engineer A. A. Seaverns on December 1st.

The Guide Boards throughout the town have been repaired and painted. New posts have been substituted, where necessary, and several additional posts and signs erected.

Signs bearing the names of streets should be placed in various parts of the town, and "speed limit" signs erected in villages. An appropriation of \$50 is recommended for this purpose.

The Norfolk County Superior Court has approved the report of the Commission, created under Chapter 456 of the Acts of 1900. By it this town is assessed for 2 per cent of the cost of construction and maintainance of the Bridge over Fore river between Weymouth and Quincy.

The amount now due with interest is about \$2,600 and means must be provided for payment.

Under authority of Chapter 358 of the Acts of the Legislature of 1906, notes of the town amounting to \$35,000 have been paid off and cancelled and new notes amounting to \$31,000 have been issued in part payment therefor, the balance, \$4,000, was paid from funds raised for the purpose.

Main Street from the Cohasset line to the store of M. G. Seaverns & Co. has been rebuilt under the direction of the State Highway Commission at an expense to the town of \$1,000 and the commission has also extended the state road construction on Main Street to a point near the residence of Fred Cole.

The policy of the Town Highway Surveyor in thoroughly rebuilding certain portions of our streets is commendable.

Under vote of the town, plans for the enlargement of the Town Hall, and the erection of a vault for the proper protection of the valuable books and papers of record, have been prepared and will be submitted at the annual meeting in March.

The Legislature at its last session, appropriated \$15,800 to be expended under the direction of the Harbor and Land Commissioners in constructing certain Sea Walls and other structures at Beach Street, Surfside Road, between First and Second Cliff, and at the southerly end of Third Cliff.

Contracts have been awarded and work commenced at Beach Street, Surfside Road and Third Cliff.

Our summer population is increasing rapidly thereby furnishing a larger home market for our farm produce.

Additional train service throughout the year would doubtless induce many to become permanent residents.

Extensive improvements in passenger and freight facilities at North Scituate are contemplated by the Railroad Company, and the Telephone Company, with other improvements,

is to substitute cables for the mass of wires on our principal streets.

The list of Taxable property as published, though far from satisfactory to the Assessors, is the best they were able to prepare in the limited time allowed for this work. The increase in valuation, after deducting about \$46,000 under the Soldiers' exemption act, was \$266,098.

Several parcels of valuable real estate have been restored to the books and many corrections made in the description of property.

The work of careful revision of this list should be continued until all errors are eliminated.

Much confusion would be avoided if purchasers of real estate would record deeds promptly.

Our system of Tax collection should be revised.

Advantage is taken of our lax method to postpone the payment of bills for years, the town being obliged to pay for the use of money borrowed in lieu of unpaid taxes. Tax bills should be payable on or before October 1st, and a charge of 6 per cent per annum made upon all bills remaining unpaid on December 1st.

The system of allowing a discount on payments made before certain dates should be abolished.

During the past year assistance has been rendered to 70 citizens, of this number 14 are over 70 years of age and 20 under 15. Ten cases have been discontinued and five cases denied as not belonging to this town.

In consideration of assistance rendered, and to be rendered, Patrick Driscoll and wife have deeded to the town certain unincumbered real estate now occupied by them and assessed for \$600, and Daniel Broughton and wife have also deeded to the town like property assessed for \$875. Upon the death of the survivor, these deeds provide for the distribution of the residue, if any, which may remain after deducting the amount of moneys advanced by the town.

As requested in a proclamation by Governor Guild dated April 20th, a meeting was held at the Town Hall on Saturday, April 21st and a committee consisting of John D. Ferguson, Chairman; Rev. Ross Adair, Rev. T. Brooks Noyes, Rev. George A. Hathaway, Benjamin T. Turner, Frederic T. Bailey, Herbert E. Webb, Israel C. Dalby, Stephen L. Joyce, John Cummings, Walter H. Spooner and Charles H. Waterman were chosen to solicit funds for the relief of the California earthquake sufferers. The total amount received was \$535.50, which sum was paid over to Kidder, Peabody & Co., treasurers of the general fund. It is gratifying to learn that the charges of misappropriation of funds raised for this purpose did not apply to the fund raised in Massachusetts.

The death of William Hubbard Litchfield on March 8, 1905 and the death of Thomas Tilden on August 20, 1906 removed from our midst two of our most worthy and respected citizens who for many years served the town as Chairman of the Board of Selectmen, Assessors and Overseers of the Poor.

The usual financial statements are appended.

Respectfully submitted,

JOHN D. FERGUSON,

E. PARKER WELCH,

ALFRED H. LITCHFIELD,

Selectmen, Assessors and Overseers of the Poor.

Scituate, January 1, 1907.

TOWN MEETINGS

Annual Town Meeting, March 5, 1906.

Ballot Clerks, William W. Wade and Henry A. Litchfield. Charles F. Clapp, Walter J. Stoddard and Charles T. Chubbuck checked the names of voters before depositing their ballots in the ballot box.

George S. Bailey and John Cummings as Tellers, counted the votes of the Official Ballot on the counting board. These officers were sworn to the faithful discharge of their duties by the Town Clerk.

The meeting was opened at 7 o'clock a. m., by the Town Clerk, who read the Warrant and took charge of the meeting.

Article 1 was taken up and Henry T. Bailey was chosen Moderator by ballot, and took charge of the meeting, being the Presiding Election Officer of the voting with the Official Ballot.

The voting commenced at 7.15 o'clock a. m.

The ballot box had previously been examined and the keys given up to Charles M. Litchfield, Constable.

The ballot box was opened at 9.05 a. m., and fifty ballots taken out, and the counting of votes commenced.

The polls were declared closed at 12.30 p. m.

The Ballot Box registered 534 votes; the number of voters checked on the two voting lists, 534.

Male 516. Female, 18.

The total vote as announced by the presiding Officer was as follows:

Selectmen for one year—

William H. Burke,	51

	154	149	220	185	321	

Joseph J. Shepherd having a majority of votes returned, was declared elected, and his certificate was made out in accordance therewith.

Joseph F. Merritt, Town Clerk of Norwell.

Leonard G. Ewell, Town Clerk of Pembroke.

George H. Stearns, Town Clerk of Duxbury.

George H. Weatherbee, Town Clerk of Marshfield.

Jetson Wade, Town Clerk of Scituate.

Attest: JETSON WADE, *Town Clerk.*

BY-LAWS.

By-Laws of the Town of Scituate, Mass., governing the purchase and sale of junk, old metals and second hand articles. Voted in Town Meeting, March 5, 1906, and as approved, January 5th, 1907, by Dana Malone, Attorney General.

SECTION 1.—No person shall be a dealer in, or the keeper of a shop for the purchase, sale or barter of junk, old metals or second hand articles, unless he receive a license therefor from the Board of Selectmen.

SEC. 2.—Every keeper of a shop for the purchase, sale or barter of junk, old metals or second hand articles, shall keep a book in which shall be written at the time of every purchase of any such article, a description thereof, and the name, age and residence of the person from whom, and the day and hour, when such purchase was made; and such book shall at all times be open to the inspection of either of the Selectmen, and of any person authorized by the Board of Selectmen to make such inspection.

SEC. 3.—Every keeper of a shop such as described in the preceeding section, shall set in a suitable and conspicuous

place in his shop, a sign having his name and occupation legibly inscribed thereon in large letters, and all articles of merchandise therein contained, may be at all times examined by the Selectmen or by any person by them authorized to make such examination.

SEC. 4.—No article purchased or received by the keeper of such a shop shall be sold until a period of at least a week has elapsed since the date of its purchase or receipt.

SEC. 5.—No dealer in or keeper of a shop for the purchase, sale and barter of junk, old metals, or second hand articles, shall directly or indirectly, either purchase or receive by way of barter or exchange any article of merchandise of a minor or apprentice, knowing or having reason to believe him to be such.

SEC. 6.—Every keeper of a shop under a license granted in accordance with section one of this Chapter, shall close said shop at nine o'clock p. m., to remain closed until six o'clock a. m., the following day, and no keeper thereof shall purchase any of the articles aforesaid during such hours.

SEC. 7.—All the provisions of this Chapter shall be incorporated in every license granted as mentioned in Section one.

Attest :

JETSON WADE, *Town Clerk.*

TREE WARDENS' REPORT.

I have planted this year 100 trees: Twenty on Main street; twenty on Charles street, and the others in different parts of the town: a part of which were trees replaced in lines of former planting.

It has been my policy to plant good trees grown in this locality, which, while the first cost is more, I believe they are cheaper in the end than western grown trees.

It should be the policy of the town to plant about this number of trees each year, as even then it will be a good many years before we have all our streets supplied with necessary shade trees.

We all appreciate a shady street in hot weather, and have had cause to admire the fine trees along it.

Some people say, "What is the use of our planting trees, as they will do us no good?" But if others had been of the same mind in years gone by, we should not today have many of the noble trees that we now enjoy; and not only do they add to the beauty of a street, but by retaining the moisture, keep the streets in better condition.

The town may appropriate fifty cents for every poll assessed, and this year I hope it will do so, whether I am tree warden or not. As I said, we have about 500 young trees, all requiring some attention each year if we are to get the best results from them—the trees should be dug around and mulched for a few years, or until they get a start, as it is just as impossible to grow a tree without fertilizer, as it is to grow any other plant.

Considering our position as a town where a great many people come to spend the summer, I think we should make it as attractive for them in this way as possible, for they are a class who appreciate natural beauties.

Respectfully submitted,

PERCIVAL S. BROWN.

Scituate, January 1, 1907.

MOTH EXTERMINATION.

REPORT OF SUPERINTENDENT ON THE EX- TERMINATION OF THE GYPSY AND BROWN TAIL MOTH.

Oct. 31, 1905, under the direction of Mr. Frank A. Bates of Braintree, Superintendent of the Southern Division of Massachusetts, work was begun cutting and burning the nests of the Brown tail moth in the town of Scituate. They had gotten into this section in large quantities and made their nests in pear, apple, plum, wild cherry and swamp cherry trees, preferring those trees to all others. From that time the work was carried on until all the street and nearby trees had been cleaned, and most of the apple orchards in town.

The next Spring, 1906, it was found that if as stated, that each nest of the Brown tail moth average 250 caterpillars, 5,000,000 had been destroyed. About that time it was found that the Gypsy moth had arrived in town, having been brought here by conveyances of some kind from around Boston. Inspectors were sent here to help the local men and direct them in locating nests of the Gypsy moth. Eight nests were found in different parts of the town, and treated with creosote to kill the eggs, all trees within 100 feet of each nest were burlaped, so that if any eggs had fallen to the ground and hatched the caterpillar would be found under the burlap and destroyed. In the apple orchards some

of the trees were hollow and it was found that the Gypsy moth had laid her eggs inside the tree and they had hatched out; burlap was used and hundreds of Gypsy caterpillars killed. In two cases the trees were set afire inside and cleaned out in that way. The burlap should be examined at least every two days.

The Brown tail moth has done comparatively no damage here, except poisoning a number of people quite badly. The Brown tail caterpillar goes into the pupa form in June and then the danger of being poisoned is small.

In the case of one complaint requesting that the trees be sprayed to kill the Brown tail caterpillars, as members of his family and neighbors had been poisoned, it was found this person let the caterpillars hatch out, knowing of the nests, to see what they would do. There are very few nests to be found this year.

Every owner of trees, and orchards especially, should take great care in looking over his trees, and destroy all moth nests found; where the trees are hollow they should be filled up with cement or tinned carefully, then it is easy to handle the caterpillars.

Last Summer I received about 100 complaints in town that trees were infested with either Gypsy or Brown tail caterpillars; only two of these complaints proved to be Brown tails and none Gypsies.

On Elm trees mostly, were found large black caterpillars that people naturally thought were Gypsies, but in fact those large spiny caterpillars do little or no harm to trees except eating the leaves from a few branches and soon disappear; another caterpillar numerous last Summer was the Hickory Tussock moth, about one inch long, black and white, with white spines sticking up on its body and when spinning down on its web giving a white appearance. Later still the Fall web worm comes out on pear, apple, wild cherry and other trees, a brown worm making a large nest; the old

nests can be seen now in orchards and' along the road side. Spraying with arsenate of lead, dissolved in water, was used to destroy all kinds of caterpillars as far as a small sprayer would cover the foliage of the low trees. The town should have a sprayer suitable to spray any tree of ordinary height.

The work has been carried on under the direction of State Superintendent A. H. Kirkland, who has been here personally, Division Superintendent, Frank A. Bates, who has been here many times, and is an expert on the moth business, and Mr. Wight, an able inspector, now of Rockland.

Respectfully submitted,

JETSON WADE, *Local Supt.*

January 14, 1907.

FIRE ENGINEERS' REPORT.

To the Honorable Board of Selectmen:

Gentlemen:—The following is the report of the Fire Department for the year 1906:

During the year there has been but little demand for the services of the Fire Department, although frequent forest fires have occurred, caused by sparks from locomotives, and we feel it would be but just, that all services rendered at such fires should be paid for by the Railroad corporation.

The Department at the present time is in the best condition since its organization, more interest being manifested by the members, especially where they have been supplied with proper apparatus with which to work in time of need.

During the past year, Hose Company No. 3 has received, in accordance with a vote of the town, a new combination hose wagon.

A new house has been built for Hose Co. No. 4 at North Scituate Beach. Four (4) hydrants have been added, making a total of one hundred and six (106) at the present time.

We would most respectfully call your attention to our recommendation of last year, that suitable ladders be supplied where needed.

We would recommend that the sum of eight hundred (800) dollars be raised and appropriated for the support of the four (4) hose companies.

Very respectfully yours;

ALFRED A. SEAVERN, *Chief.*

JOSEPH A. WARD, *Asst. Eng.*

F. W. LITCHFIELD, *Clerk of Board.*

JOHN B. DAMON, *Asst. Eng.*

JOHN F. TURNER, *Asst. Eng.*

REPORT OF THE BOARD OF HEALTH.

Scituate, Mass., January 1, 1907.

To the Selectmen and Town Citizens:—

In rendering a report of the Board of Health for the year 1906, we shall submit a small amount of detail which may be of interest to voters of the town that do not come in direct contact with this part of the town's business.

At the Annual Town Meeting, Mr. Geo. O. Allen was re-elected and at the meeting of the Board unanimously chosen chairman.

In the past year the Board has had to deal with several cases of contagious diseases and each case has been confined to the original location.

In the early part of the year the town was quite troubled by an epidemic of measles, about fifty cases being reported to the Board, and although there were no serious results, there was a large diminution in the school attendance.

There have been made to the Board many complaints from No. Scituate Beach in regard to the condition of the cottages, extending from the corner of Causeway Avenue and Beach Street to the Glades Gate.

This locality is in a poor condition and the Board takes this means of requesting all property owners to provide proper vaults and cesspools for their premises.

As the attention of many has been called to this matter, we trust that there will be a general improvement in the condition without the Board taking any drastic measures with those who have not already complied with this request.

We are pleased to report this year that there has been no complaint made at No. Scituate Beach in regard to the dis-

posal of offal, as Mr. Charles Turner has properly attended to this, and furnished a repository for all refuse matter.

In regard to the Sanitary Sewer Cart, as there were so many demands for its use at No. Scituate Beach, it was deemed advisable to place the same in the charge of Mr. James Litchfield, who has attended to the demands in a prompt and efficient manner.

The Board has attended to the following cases.

Summary:

Diphtheria,	2 cases.
Scarlet fever,	4 cases.
Measles,	55 cases.
Complaints,	25 cases.
Fumigating,	6 cases.

The Board has sought faithfully to discharge its duties and wish to thank those with whom we have come in contact, for the prompt manner in which they have attended to our requests and instructions.

Respectfully submitted,

GEO. O. ALLEN, *Chairman.*

FREDERIC COLE.

THOS. H. FARMER, *Secretary.*

REPORT OF TOWN CLERK.

MARRIAGES RECORDED IN SCITUATE IN 1906.

January 20, Clement L. Brown of Scituate, and Martha A. Lincoln of Cohasset, married by Isambert B. Stewart at Cohasset.

March 11, Max H. Adelman of Boston, and Sarah D. Ber-son of Scituate by J. Sandlovitz, Rabbi, at Quincy.

April 12, Walter J. Wagner of Norwell, and Fannie P. Delano (Henderson) of Norwell, by Albert D. Spaulding, at Scituate.

April 15, Oscar Leonard Johnson of Scituate, and Mary Frances Quinn of Scituate, by Rev. Peter McCall, at Cohasset.

April 21, John B. Newcomb, Jr., of East Milton, and Leora E. Litchfield of Scituate, by Isambert B. Stewart, at Cohasset.

June 12, Michael Conniff of Quincy, and Katherine A. Fallon of Scituate, by Patrick H. Riley, at Cohasset.

June 13, John J. Slattery of Scituate, and Mary F. Hoar of Scituate, by Patrick H. Riley, at Cohasset.

August 1, George P. Litchfield of Scituate, and Eva May Bishop of Scituate, by Charles A. Feyhl, at Boston.

September 5, John Stonefield of Scituate, and Ethel G. Fox of Brockton, by Frances B. White, at Brockton.

September 11, Chauncey B. Hodgdon of Scituate, and Ruth M. Weed of Tunbridge, Vt., by George F. Forten, at Tunbridge, Vt.

September 12, John C. Cray of Scituate, and Elizabeth L. Moriarty of Scituate, by Patrick H. Riley, at Scituate.

September 16, Caleb T. Jenkins, Jr., of Scituate, and Nellie Mahoney of Scituate, by Patrick H. Riley, at Cohasset.

September 22, George F. Cushman of Scituate, and Sarah F. Young of Scituate, by Hartwell J. Bartlett, at Scituate.

September 29, Harry Adelbert Tilden of Marshfield, and Nellie Frances Talbot of Marshfield by Albert D. Spaulding, at Scituate.

September 29, George Howard Burbank of Scituate, and Sarah Frances Richardson of Norwell, by Albert D. Spaulding, at Scituate.

October 3, Joseph C. O'Kane of Scituate, and Minnie Lanman of Scituate, by Rev. Walter F. Sweeney, at Scituate.

October 15, George H. Pollard of Scituate, and Margaret J. O'Donnell of Scituate, by Patrick H. Riley, at Cohasset.

October 28, Ernest George Coles of Cohasset, and Addie Lillian Wood of Cohasset, by Albert D. Spaulding, at Scituate.

November 3, Roland Clough of Boston, and Frederika Hammond of Scituate, by Howard K. Barstow, at Scituate.

November 21, James H. Hobart of Scituate, and Bertha Bryant of Roxbury, by Seeley Bryant, at Roxbury.

December 25, Louis Edward Cole of Scituate, and Rena Maria Mitchell of Scituate, by George A. Hathaway, at Scituate.

ANNUAL REPORT

OF THE

SCHOOL COMMITTEE

OF THE

TOWN OF SCITUATE

FOR THE

Year Ending December 31

1906

SCHOOL CALENDAR FOR 1906.

Winter Term.

High School opens December 7th; closes March 29th.
Other schools open Jan. 7th; close March 29.

Spring Term.

High School opens April 8th; closes June 28th. Other schools open April 8th; close June 21st.

Fall Term.

High School opens September 9th; closes December 20th.
Other schools open September 9th; close December 20th.

Holidays.

February 22nd, April 10th, May 30th, Thursday and Friday of Thanksgiving week.

SCHOOL CENSUS.

Number of boys between the ages of 5 and 15,	210
Number of girls between the ages of 5 and 15,	204
Total,	414
Number of boys between the ages of 7 and 14,	164
Number of girls between the ages of 7 and 14,	149
Total,	313

REPORT OF THE SCHOOL COMMITTEE.

To the Citizens of Scituate:—

The School Committee of the Town of Scituate herewith submits its annual report.

Policy.

The policy of the School Committee during the past year has been to carry out as consistently as possible the laws of the State in regard to education, and to combine with the administration thereof, the application of common sense and reason. With the foundation of the public school rests the future prosperity of the town.

The character of our citizenship will in a great measure be determined by the character of our public schools.

By maintaining a high standard we give to our children the best advantages within our means, and the result to the town is beneficial, for the child of to-day becomes the citizen of tomorrow, taking his place in our public life, performing his duty as a citizen, and upon his intelligence, ability and progressiveness depends the future prosperity and growth of the town and the happiness and welfare of its people. Such being the case, the proper conduct of the schools, the appropriations that are made for their maintenance, the methods of instruction, personality, character and ability of the teaching force, the facilities given the scholars to obtain the highest and best education, become matters of vital importance to those of our citizens who desire the welfare of the town.

The question then arises, or is sometimes brought forward: Why this need of higher education, elaborate courses,

expensive books and apparatus? Is not the education we received good enough for our children? It is not. The boy or girl of to-day has to think and act more quickly than those of a generation ago, therefore the more educated the mind, the more rapid it is to respond and act accordingly. The sentiment and needs of to-day are not those of yesterday, or will they be those of tomorrow. We are truly living in a strenuous age, and with the example of a strenuous President at the White House before us, constantly on the alert to meet and combat adverse legislation, trusts and combines; does it not behoove the humbler citizen to be properly equipped, mentally and physically, so as to be ready for whatever comes along? The important thing is not: that we should be crammed full of knowledge, but that what knowledge we possess should be so arranged that it can be of immediate use. It is a well-known fact that the scholar of to-day knows more than the boy of a generation ago, but he can make use of a far smaller per cent. than his ancestors, who had fewer books, rules and exercises, but those few were properly classified and thoroughly drilled into his head.

The demand to-day is for a practical education. For this we desire to raise our voices. Out of the next class to graduate from our schools, and future ones also, a large percentage must earn their livelihood by the labor of their hands or brain. Therefore, outside of the teaching of those subjects which are absolutely necessary, the tendency should be to teach those that will best fit them for the future. Having this in mind, your Committee asked for and obtained an appropriation at the special Town meeting, for the purpose of starting a business course at the High school. It has been apparent from the beginning that it will be successful in more ways than one. Primarily, it will give those of our pupils, who do not desire or cannot afford to go to a business college, an opportunity to obtain a thorough and

practical business education, and a knowledge of those subjects which are requisite in order to be able to obtain employment in the offices and mercantile establishments of our neighboring metropolis, surrounding cities and towns.

It is not our desire, though, to foster this course in preference to any other: the student who may elect to take the classical or Latin course, can do so. The opportunity still exists for them to prepare for college or Normal school. Instruction in Latin and the modern languages is optional but the study of the mother tongue is emphasized.

Nearly thirty years ago Wendell Phillips in his address on the "Education of the People," stated that "The public schools teach arithmetic, philosophy, trigonometry, geometry, music, botany, history and all that class of knowledge. Seven out of ten of them, remember, are to earn their bread by the labor of their hands. Well, at fifteen we give that child back to its parents utterly unfitted for any kind of work that is worth a morsel of bread. If the pupil could only read the ordinary newspaper to three auditors it would be something, but this the scholar, so educated, so produced cannot do. . . . We produce only the superficial result of the culture we strive for. "Now, I claim that this kind of education injures the boy or girl in at least three ways. First, they are able only by forgetting what they have learned, to earn their daily bread; in the second place it is earned reluctantly; thirdly, there is no ambition for perfection aroused." It seems to be a fact which many of the public educators of to-day overlook, that seven-tenths of the people earn their living on matter and not on mind. Now, friends, I protest against this whole system of common schools in Massachusetts. It lacks the first element of preparation for life. We take the young girl or the young boy, whose parents are able to lift them into an intellectual profession; we keep them until they are eighteen years old in the High school, we teach them the sciences; they go to

the academy, or the college to pursue some course of preparation for their presumed work in life. Why not keep them a little longer and give them other than intellectual training for the business of life?"

This, we think is just as true to-day as when spoken by Phillips thirty years ago. Few of our scholars are able to express themselves in good English. While the study of ancient and modern languages is to be commended, still it seems to us that more time and attention should be given to the English language.

It is not our intention, however, to decry intellectual education, but we do think that the *practical* should be combined with the *intellectual*. It would not do any harm if we taught our girls something about domestic science, to help equip her for the future, possibly as the wife of one of the boys now going through school with her. He may know that she can speak French or German, and can tell the principal facts in history, but he does not know if she is competent, or will be, to attend to his material welfare or that of his children. The boy also needs our attention; if he is to become a farmer, as some perhaps will, why not teach him something about the soils, and the science of knowing how to put back, or to restore to mother earth that which is taken from her, only in another form. Let him learn surveying, he will then be in a position to run out the lines of his own farm or any wood lots he may purchase. Should he decide to become a civil engineer, instead of a farmer, the knowledge will not come amiss; the tendency will simply be to broaden his vision, increase his practical knowledge, and thus make him a more useful man to the community.

Transportation.

One of the hardest problems that confronts any School Board in a country town is that of transportation.

When your Committee took up the matter this year, it was with the desire to give each part of the town due consideration, and especially to make provision, if possible, for the conveyance of those scholars, who had labored faithfully in the past, and who by so doing had succeeded in gaining entrance to our High school. It is an admitted fact that the Grammar school graduates of to-day, are not of such a rugged physique as those who graduated a decade ago. Even then, there were some who were not able to stand the strain of walking from five to ten miles each day, Winter and Summer, rain or shine, in order that they might complete their education by graduating from our High school.

The proposals were accordingly gotten out, and a copy placed in each Post Office in town. One specification called for bids on all the old routes with the addition of the High school route from the Harbor, and a route from Gannett corners, via Conihasset Hall and Mann Lot to Hatherly; the latter being contemplated to relieve the congestion that existed and still exists, in Mr. Sylvester's barge, and to provide room for the carrying of the High school scholars from the West part of the town. The other specification was for a renewal of the same routes as specified in the contract made in 1904.

Upon the bids being opened it was evident that a different state of affairs existed from that which your Committee had anticipated. In the first place there were only four bidders, and secondly, the price asked seemed prohibitive, in view of the amount appropriated by the town. To carry all of the scholars would cost \$3,784, that being the amount of the only and lowest joint bid received. Therefore, after carefully considering the matter, we decided to award the contract (which expires after March meeting), for the same routes as last year, but leaving off the Egypt and Willow street routes and putting them on for the Winter term only.

This we deemed proper, as with a few exceptions, the Egypt children lived inside the mile limit, and to the Willow street scholars the same conditions applied. The citizens of Egypt, however, petitioned to have the barge restored, and your Committee (somewhat against their better judgement), consented to it. We believed though that a covered vehicle could be obtained, large enough to carry those scholars who lived beyond the mile limit, and at a more reasonable expense than it would cost to have a regular barge. The contractors, however, had foreseen such a possibility, and refused to sign the contract, unless it was stipulated therein, that they alone were to have the privilege of putting on any extra barges which might be required, and at the same amount pro rata that they received for the other routes.

To the apparent lack of interest shown by those of our citizens, who were competent to bid on the transportation is due, in a measure, the condition of affairs that exist in the conveyance of the scholars in this town. If there had only been competition a different arrangement might have been made. We do not desire to find fault with these citizens, as we realize that the amount raised by the Town is entirely inadequate to properly transport all the scholars, and when it is possible for a citizen to get five dollars a day for a pair of horses and man, we do not blame them for refusing \$2.20; that being the amount we now pay. In Cohasset, they pay \$15 per week for the Beechwood routes, and even at that figure few who are not in the livery business care to bid for it.

We believe that the town should raise a sum of money, sufficient for the purpose, but until it does we do not feel justified in exceeding the appropriation.

If the *district schools* had been left as they were, and a large Joint Grammar and High School erected on the line of the railroad, near Egypt or Scituate stations, the question of transportation would not have cost the town as much as it does to-day, or have become such a momentous issue.

Buildings and Grounds.

The condition of our school buildings is one that needs consideration at the coming March meeting.

The Jenkins needs a thorough overhauling; the plaster in the main hall is dropping off, the roof leaks and a change is necessary in the sanitary arrangements, so as to prevent the overflow of water, etc., into the street.

From the estimates received, it is apparent that it will cost several hundred dollars to put the building in proper condition.

The Hatherly also requires some attention. A drain is needed to carry off the water, which in rainy seasons stands in one part of the basement and which threatens, in time, to weaken the foundation.

The back of the building should have a banking of stone or suitable material to strengthen the foundations.

The grounds need some attention; there ought to be some shrubbery placed along the fence on each side similar to that at the Jenkins.

It will not be long before we shall have to enlarge the High school, or at least the recitation rooms. The main room is just about large enough for this year's classes, but the class rooms are too crowded for comfort or convenience.

Medical Supervision.

The law passed by the legislature of last year, makes it necessary that we appoint a school physician. It will be his duty to examine the physical condition of each scholar at stated intervals, also to see that the testing of the pupil's eye sight and hearing, has been attended to, under the immediate direction of the superintendent and teachers.

Before we can appoint said physician it will be necessary that the Town raise and appropriate a sufficient sum of money for this purpose.

We are unable at this time to obtain any direct data as to the cost, but will, no doubt, have same in time to insert in the town warrant.

Teachers and Salaries.

Owing to the resignation of Mr. E. L. Willard, who had served the town as superintendent of schools, so faithfully and well, for the last eleven years, it became necessary to choose a new superintendent to take his place. Accordingly in April last, we elected jointly with the towns of Marshfield and Duxbury, John E. De Meyer, a graduate of Bates College, Me., and former principal of the High school in Norwell, to serve as superintendent of the public schools in our town. In the staff of teachers, three changes have been made, Miss Alice F. Clapp, after having spent three years of earnest and faithful labor as principal of the Jenkins school, decided that the opportunities were better elsewhere, and accordingly tendered her resignation. This we accepted with great reluctance and in her place Mr. Albert Craigin of Boston University was elected to serve as principal. Miss Helener G. Robertson, having also resigned as teacher of the sixth and seventh grades, we accordingly elected Miss Nellie Adams of Duxbury to fill this vacancy.

At the Hatherly school Miss Eleanor Curtis was elected to fill the vacancy caused by the resignation of Miss Bertha Bryant.

We think, on the whole, that the past year has shown progress in our schools, and in justice to the teachers it is fair to say, that they have rendered efficient and capable service. We believe that we have been fortunate in our teachers, their long term of service, coupled with the fact that they strive to keep in touch with up-to-date methods in the outside school world, make them of inestimable value to our schools. We are of the opinion that the town can afford to pay them a generous amount for their services.

The average citizen falls into error many times in considering this question. He looks at the monthly wage and says, "pretty good pay." He forgets that the teacher has to divide by twelve instead of ten; that makes the monthly wage a different story. Again, it costs more to live now than it did a few years ago, and teachers' salaries have not advanced commensurately.

If we stop and realize, that with a few exceptions, teaching is one of the poorest paid professions, we ask ourselves why it is then that we are willing to trust our child's present and future welfare to the care of one who is not paid much more than the average domestic.

Is it not because we realize that they love their work, and regardless of the salary received, they conscientiously endeavor to do their very best for our children; looking after not only their intellectual training, but often taking the mother's place and caring for the body also. The "laborer is truly worthy of his hire," and it is only by being liberal in this respect that we can expect to retain their services.

As it is, we have had to raise the pay of some of our teachers, during the past year, to keep them from going elsewhere, and we believe that it is advisable that they be slightly increased throughout all our schools.

In conclusion, we desire to thank those of our citizens who have taken an active interest in our schools; not alone by visiting them but also by the interest they are showing in the welfare of the scholars when out of school.

Too much cannot be said of the need of the parents taking the time to find out from their children what they know, or do not know. This ought not to be confined merely to an examination of the report cards, but to a questioning of the child him or herself, to having it read aloud at home, or giving it some examples in studies in which we ourselves may be proficient.

It is also highly essential that the child be encouraged

and, if necessary be forced to remain at school, until it graduates from the High. Too often, we are sorry to say, the parents do not feel the great responsibility that rests upon them, and lets the child decide for itself, whether or not it will go from the grammar to the High school. This is radically wrong.

If we encourage our children in a more ardent desire for education, (practical if possible), if we labor with and for them, and if those of our citizens who have no children, are generous also in the financial support of our schools; then indeed will Scituate have cause to be proud in the future, and, "her children shall rise up and call her blessed."

Respectfully submitted,

PETER W. SHARP,

JULIA E. WEBB.

CLARA M. SKEELE.

ESTIMATED APPROPRIATIONS.

Teachers,	\$8,200 00
Janitors,	1,100 00
Coal and wood,	950 00
Books and apparatus,	950 00
Transportation,	4,000 00
Superintendent,	500 00
Incidentals,	450 00
	\$16,150 00

CORPS OF TEACHERS.

Name, Grade and Post Office Address.

- Mr. Edward R. Clarke, A. B., Principal High School, Scituate Centre.
- Miss Louise Adams, A. B., Assistant High School, North Scituate.
- Miss Sarah L. Bell, Commercial Dept. High School, North Scituate.
- Miss Grace B. Simmons, A. B., Principal Hatherly School, North Scituate.
- Miss Persie L. Merritt, Grade 6 and 7, Egypt.
- Miss Lilliete C. Jenkins, Grades 4 and 5, Scituate.
- Miss Sara M. Kane, Grades 2 and 3, Greenbush.
- Miss Eleanor E. Curtis, Grade 1, Scituate.
- Mr. Albert Craigin, A. B., Principal Jenkins School, Scituate.
- Miss Nellie E. Adams, Grades 6 and 7, Jenkins School, Scituate.
- Miss Josephine J. Barry, Grades 4 and 5, Jenkins School, Scituate.
- Miss E. Gertrude Gardner, Grades 2 and 3, Jenkins School, Scituate.
- Miss Mary E. Gillis, Grade 1, Jenkins School, Greenbush.
- Mrs. Lillie C. Stoddard, Music, North Scituate.
- Miss Harriet J. Ford, Drawing, Millbrook.

SUPERINTENDENT'S REPORT.

To the Scituate School Committee:

I respectfully submit for your consideration my first annual report. Owing to the fact that I have served you in the capacity of Superintendent only since last May, this report will of necessity be brief and in some respects incomplete. I shall attempt to give a concise statement of conditions as I found them together with the changes that have been made this year and those I consider advisable in the near future.

The work of the schools during the past year has been uniformly good. The untiring efforts of you as a committee and my predecessor have resulted in a graded system that is highly commendable and an excellent teaching force. That there is still much to be done to improve our school system is true but it is equally true that reforms to be effective in the best sense of the word, must come about gradually. Prof. Hanus in an address on, "School Reforms," delivered to the Superintendents of New England, said: "More conservatively but more." I believe that has been your attitude as a committee in the past and will continue to be in the future.

The vacancies caused by the resignation of Miss Clapp, Miss Robertson and Miss Bryant have been filled by Mr. Albert Craigin, Miss Nellie Adams and Miss Eleanor Curtis respectively.

Courses of Study—

A course of study should be a matter of growth. It should be modified from time to time to meet new conditions as they arise. A course of study so inflexible as to prevent its adaptation to conditions is a hindrance rather

than a benefit. No attempt has been made to introduce a new course of study, but certain modifications have been made in the one we already have. The course in reading has been changed by the introduction, in the first grade, of the Ward System of reading. The Ward method consists of a combination of the best features of the word and sentence method and the phonetic method. The present first grade will continue the same line of work in reading in the second and so on up through all the grades this preventing the breaks in the development of the work that comes from changing from one teacher to another where no method is employed.

One of the chief purposes of the school should be to develop power and ability to read and appreciate good literature. The early processes in teaching reading must be carefully considered by every teacher; much of what is sometimes considered mechanical in the early training of the child can be made interesting by a careful and thoughtful teacher. The child delights in a story and under skillful direction will assimilate the elements that have the slightest parallel in his own experience. Without assistance very little attempt is made by young pupils interpretation. Interest must be aroused and experience interpreted by the aid of the teacher.

In the grammar grades there is a great opportunity to establish a taste for good literature in our public schools. This can be done by enriching our reading course so that our pupils, instead of reading from one text book, may have a number of complete short stories from the best authors placed at their disposal. Thus the authors in whose masterpieces are found the clearest pictures of life and the most accurate expressions of truth, are introduced to the pupils at an age when they are most susceptible to impressions. I would respectfully urge that this phase of our school work have your most careful consideration.

In the Hatherly Schools certain modifications have been

made in the work in Arithmetic and Geography which seemed advisable to meet conditions until the courses in those subjects could be revised somewhat.

Methods of Promotion—

The function of the public school is to train youth into social efficiency and not merely the acquisition of facts. The question that confronts us is, how may the highest degree of intellectual vigor be secured? When determining whether a pupil shall be promoted or not, one should take into consideration the ability of the pupil to solve new problems for himself as well as his ability to pass a certain required per cent. in the subjects he has taken during the year. In our elementary work even greater stress should be placed upon mental development than mere acquisition of facts. The results obtained from any one set of examination papers determine neither the intellectual status of a child nor his ability to do the work in the grade above. These facts can only be obtained by a careful estimate on the part of teachers and superintendent of the daily work of the child and his power of application together with a series of short tests (both oral and written) given at short intervals. The object of these tests should be not merely to ascertain how much the pupil knows of the subject but also to ascertain where his weak points are before it is too late to strengthen them. Instead of tests given at the end of the term by the superintendent, I would recommend that the above plan be adopted.

The High School—

A commercial course has been added to the High School this year. By means of this course our pupils are enabled to obtain at home a good, practical knowledge of business methods. The course has been made sufficiently difficult to prevent its becoming what is commonly termed a "snap" course and yet not so difficult as to make it in any way impractical. The commercial colleges advertise a complete busi-

ness course in six months. We make no attempt to accomplish this for two reasons. 1. Because we cannot devote our entire time to the course. 2. Because we do not consider such a course the most practical that can be obtained. One of the leading business men of Boston was asked the other day, what he considered the best training for a boy or girl who intended to go into business, his reply was, "The only clerks or stenographers whom I care to employ are those that have a broad general education aside from their business course. The broader that education, the more money I can afford to pay them." That is our object to give the pupils a good, broad, general education supplemented with a practical business education. Four typewriters have been purchased which give a very substantial beginning for the department. It will be necessary in the near future to add material for business practice in order that the pupils may acquire an accurate knowledge of the essentials of business.

The department of chemistry and physics suffer from lack of apparatus and room. One of the greatest problems that confronts us to-day is, how to obtain more room for the High School work. We should have a room for chemistry and physics fitted up with sinks, tables, cabinets, etc. Then, and not until then, can we hope to meet the requirements of the larger colleges in these departments.

Should our school grow, and we have every reason to believe it will, it will be necessary to have more seating room.

Attendance—

The attendance in most cases is good; a glance at the registers will show that we still have with us those who do not comply with the law in the matter of attendance. When a pupil is obliged to be absent because of sickness he suffers a distinct loss in his school work but such loss is unavoidable. When, however, he is absent from other causes the loss of work is not necessary and should not be allowed. The law

specifically states that when a pupil has been absent more than ten half days in six months he shall be considered a truant and dealt with as such unless such absences are caused by sickness.

If a teacher is worthy of a position in any school, the class work under such a teacher should be the most important part of the pupil's work. It is impossible to "make up" such work in a satisfactory manner and should be attempted only in cases where absences are unavoidable. Every parent should bear this in mind and cooperate with the school management by seeing that his or her pupils attend every session. Should the parents fail to do this the truant officer should be required to perform his duty.

In conclusion permit me to express my appreciation for the hearty support and cooperation of all with whom I have been associated in my work.

Respectfully submitted,

JOHN E. DEMEYER.

Scituate, Mass., December 31, 1906.

HIGH SCHOOL REPORT.

To the Superintendent of Schools—

For the first time in four years the High School has its full quota of classes, since the blank occasioned by forming the ninth grade in 1902 has just worked out. The membership of the school at this date is as follows:—Seniors, 12; Juniors, 17; Sophomores, 17; Freshmen, 21; total, 67—girls, 34; boys, 33. The school opened on September 10 with a membership of 67, and since then has lost one and gained one, leaving the membership the same as at the opening. This fact is worthy of notice, since it indicates a desire on the part of the pupils to persevere in and to complete, if possible, the High School course. There has been, fortunately, but little sickness among the pupils, and with the open winter thus far the good attendance of 92 per cent has been maintained.

As in my report of last year I must speak of the very serious lack of sufficient room in the school building. By putting in extra desks we have succeeded in seating our increased numbers. The greatest need is for more and larger recitation rooms. With the introduction of the business course, which has proved of great interest and value, accommodations had to be arranged for the typewriters, of which there are four, which must obviously have a room by themselves. No place was available except the library which is a very small room and already overcrowded. For the teacher and for the instruction in the new course a recitation room had to be provided. There was none, save the room set apart for a laboratory in physics and chemistry. This also is a small room with but one small blackboard, and into this room the twenty-five pupils making up the business course are

crowded daily. These conditions necessarily hamper the work seriously.

The book cases and shelves are insufficient and there is no room for new shelves. As a consequence, a great many books have to be piled on the floor during the vacation. If the building could be altered so that the large second story could be used, the problem, it seems to me, would be solved for many years.

The school has a fine situation overlooking the sea, but the immediate surroundings are not attractive. In lack of grass, trees, and shrubbery the High School yard does not compare favorably with the grounds of the grammar school.

The teachers have made an effort to raise the standard of scholarship. Colleges and Technical Schools are raising the requirements; business men and all employers are demanding more and better knowledge from their employees than ever before. We are endeavoring to fit the pupils to meet these demands. This year a passing mark is required of all students before they are eligible to represent the school on any athletic team. This is a reasonable demand, and emphasizes the importance of good scholarship, which athletics sometimes tends to obliterate. I believe that athletics, in proper bounds, should be encouraged in the High School and good facilities afforded for their maintenance. In this connection, it is hoped that the town will see fit to appropriate a small sum of money to put the town common in good condition for a baseball field.

This report should not close without emphatic mention of the able and untiring work of Miss Adams and Miss Bell, of the High School Faculty. The former's service to the school is well-known, and the latter, coming to us this fall, has insured the success of the business course and has proved most efficient in every respect. I wish also to express my appreciation of the helpful cooperation of yourself and of the School Committee.

E. R. CLARKE.

Principal.

REPORT OF MUSIC TEACHER.

To the Superintendent of Schools:

It gives me great pleasure to report to you, the condition of the music in the schools of Scituate. So long as the children manifest an interest in the study of music, they are bound to succeed in some measure; and generally speaking the interest has not abated.

We find that we have to contend with children who sit quietly or otherwise through the lesson without attempting to sing, when they always sang in lower grades. This may be due to home influence. We know of parents who tell their children not to "make that noise; you can't sing, so don't try." It very often happens that a child not especially musical, learns to sing correctly in school but on attempting to carry the tune or part alone, can use only a few notes. This does not prove that the child never can learn, but rather that he is just learning. So let us give our children the advice given to a young person just starting away to school—*Never say 'I can't.'*

One criticizing our music, and not knowing our disadvantages would say that as each room did so nicely, why are the upper grade not prepared to read any exercise with any harmonic principle in it. In answering this criticism we would have to face the fact that the higher grade in each room stands still for a year in nearly every case. The first grade learns as much as most first grades. Songs and a knowledge that there are notes and how they are used. Then the children stand still in the second grade and take up music in the third. From the third grade they pass into the next room where they find the next higher grade well acquainted

with the book, belonging in that room, and ready to lead them on through it. The children do not learn in this way, and the upper grade stands still. This happens in all the rooms as a general thing. There are exceptions, however; there is one room which fortunately had a carefully prepared entering class, and on account of not being obliged to review a great deal, has finished the book belonging in their room, and will soon begin slowly with the book in the next higher room. This will prepare the out going class for the next room, and probably no extended review will be necessary at the beginning of another year.

The High School pupils have many compliments which they earn for themselves, by doing excellent work. This is due in a great part to the daily training, but it is also the result of their willingness to try. The best teacher, that ever lived, could not make a successful chorus out of a class not willing to sing.

For careful, efficient and interested teachers in the study of music, allow me to commend to you, all the teachers in Scituate.

Respectfully submitted,

LILLIE C. STODDARD.

DRAWING TEACHER'S REPORT.

To the Superintendent of Schools—

Again I have the pleasure to present to you my report on the drawing in the Public Schools of Scituate. Each succeeding year shows improvement, most of the children when given pencil, brush, paint or ink, will go to work with a good deal of confidence and as if they knew how to do the task set before them. It also seems to be a pleasure to them. In the nature study, the pupil does practically original work, each one having individual study to work from. During the winter most of the work is in drawing from objects and type forms, when the work is not as original, and is more easily compared with other work of the same kind. The work is made as varied as possible in order to give interest and facility and to bring out the best in each. For one will do well in certain kind of drawing and not in others, while another will be just the opposite.

Beginning with nature study in the autumn we go on to color, then to design with special application to Thanksgiving and Christmas work. Then in the winter term we take up object drawing from spherical, cylindrical and rectilineal objects, followed by the study of birds or animals alive or stuffed. In the spring we go back to nature again, taking the flowers as they come along, using these as studies for design the last six weeks of school.

It is my purpose to keep the practical side in view as much as possible. While we do not expect to make artists of the children, for artists are born not made, we do try to teach them good taste in form, color, and arrangement, and the application of the same in their school work.

During the year several of the children have taken prizes in the "School Arts Book" competition. One of these who carried off more prizes than any other competitor, was given the leadership in the "School Arts Guild." This may be counted as quite an honor, when it is considered that children from many parts of the United States entered the competition.

I have to thank the teachers for their interested cooperation, they have carried on the work with the best of feeling, without which very little would be accomplished.

Very respectfully,

HARRIET J. FORD.

REPORT OF THE TRUANT OFFICER.

To the School Committee—

I have investigated all cases of absentees brought to my notice and found most of them kept away by sickness, or by the parents. I have had two cases of truancy reported to me by the teacher.

Respectfully submitted,

WALTER T. NEWCOMB.

Truant Officer.

Hatherly School, Scituate, December 31, 1906.

ROLL OF HONOR.

Not absent for one year—

Henry E. Bearce,
Lawrence Bailey,
Frank W. Clapp,
Helen Collier,
Grant Doherty,

Howard E. Bailey,
Theodore L. Bailey,
Mary E. Cushman,
Robert V. Collier,
Paul Litchfield.

Two terms—

Cecelia Ainslee,
Harold Bates,
Ruth Curtis,
Edwinia F. Dalby,
Robert Hill,
Matilda A. McLean,
Julia Murphy,
George Roe,
Xoa Vickery,
Irma Cole,
Allen Doherty,

TOWN OFFICERS, 1907.

Town Clerk.—Jetson Wade.

Town Treasurer.—Ernest L. Bonney.

Collector.—Fenton W. Varney.

Selectmen, Assessors and Overseers of the Poor.—John D. Ferguson, E. Parker Welch, Charles H. Waterman.

School Committee.—Julia E. Webb, Clara M. Skeelee, Peter W. Sharp.

Superintendent of Schools.—John E. DeMeyer.

Board of Health.—George O. Allen, Fred Cole, Thomas H. Farmer.

Highway Surveyor.—John T. Fitts.

Board of Fire Engineers.—Chief Engineer, Alfred A. Seaverns.

District Engineers.—District No. 1, Frank L. Young; District No. 2, Frank W. Litchfield; District No. 3, Alfred A. Seaverns; District No. 4, John B. Damon; District No. 5, John F. Turner.

Registrars of Voters.—Charles F. Clapp, Charles T. Chubbuck, Walter J. Stoddard.

Constables.—John F. Turner, William E. Supple, Charles M. Litchfield.

Tree Warden.—Percival S. Brown.

Auditor.—Charles W. Peare.

Town Physician.—T. Branch Alexander.

Keeper of the Lockup.—Caleb W. Prouty.

TO THE INHABITANTS OF THE TOWN OF SCITUATE :

The Selectmen, Overseers of the Poor, and Assessors, submit the following report for the year 1907.

In the Town's accepting the layout of the Selectmen at the junction of Main and Blossom, and Main and Gannett streets, near North Scituate station, the selectmen think you have acted wisely, as they have the assurance of the N. Y., N. H. & H. R. R. Co., that a new station will be built there and better freight facilities given the patrons and merchants of that vicinity in the near future.

Humarock Beach has a growing and desirable summer settlement. The town derives an income of about \$1,600 annually from that section through taxes, with a very small outlay.

The Selectmen think the residents of that locality are entitled to some improvements in their roads, therefore we recommend a small appropriation for the building of the road as laid out by them.

The poor have been carefully looked after the past year, and while the Overseers feel the need of economy in the Town's expenditures, think it would be hard to curtail on the amount recommended for the coming year. Several cases have been denied as not belonging to the town, and all others that have come to their notice have been carefully investigated by the Board.

Under the able supervision of the Highway Surveyor, the Selectmen think the appropriations for roads have been spent to good advantage. Our streets compare favorably with those of other towns, and we recommend a continuance of his method in building macadam roads.

The town appropriated \$150 for the improvement of the Common for base ball purposes. Specifications were submitted, but no bids were received. The Selectmen then authorized the Road Surveyor to spend the amount in improvements, under their direction, which has been done. After inquiring into the methods of other towns and getting the judgment of the State Highway Commission, the Selectmen expended the appropriation for enforcing the Automobile laws in placing signs, warning motor vehicles as to speed limits, etc., with what results you may judge.

We ordered, through the Highway Commission, signs to comply with the state law early in the season; failing to receive them when expected, we had same painted in town.

Automobiles are here to stay, and so many of them use our roads, something should be done to derive an income from them for the repairs of roads, and for the protection of other travellers. A heavier state tax and more care in the granting of licenses to irresponsible persons would be a benefit, and the state roads could be kept in better repair.

The street signs have been repaired, and many new ones added. A small appropriation each year would keep them in repair, and be a benefit to travellers.

Mainly through the efforts of public spirited citizens of our town, the legislature has appropriated \$6,800 to be expended the coming year under the direction of the Harbor and Land Commissioners, for the continuance of sea walls, etc., at Beach street, Surfside Road and Third Cliff.

By making the town attractive, as regards trees and park improvements, more people may be induced to become residents. Mr. Silas Pierce has very generously donated to the town what is known as "Hollet's Island" on Beach street, for park purposes, and by improving same it will make one more attractive spot in our old town. We recommend a small appropriation for park purposes. Much money is spent in town by the summer people, and we feel that the town must look forward to improvement through that source.

The town offices should be improved. More room is needed for persons desiring a private interview with the Selectmen, Overseers of the Poor or Assessors, and for hearings, etc.

We recommend an appropriation for the purpose of enlarging the town hall as per plans submitted at the last annual meeting. A large safe has been purchased, so there is sufficient vault room for years to come.

Last year the town appropriated \$300 for Gypsy Moth work. Under the continual supervision of the State officials we were obliged to spend considerable more. In 1907 the town was liable to a tax of about \$1,500 on Gypsy moth work. The law is compulsory, and we recommend a reasonable sum be appropriated for the continuance of the work the coming year. In fact, the town has been authorized by the State Superintendent to expend \$1,676.63 for the year ending Nov. 30th, 1908.

No appropriation was made for the Fire Department, but considering the fact that the town owns so much valuable property, the Selectmen deemed it advisable to spend a small amount for repairs, etc. We have the houses and equipments, and think it for the interest of the town to appropriate a small amount annually for Fire Department purposes, and raise the standard of efficiency of the same if possible.

The Assessors have endeavored to keep the tax rate down to a moderate sum; but owing to the large increase in the town expenses and appropriations, it will be hard to do so in the future.

We urge the necessity of having deeds recorded when property is transferred. As by neglect in so doing much property is lost to the Assessors, and the rightful owners are not always taxed for same.

The town was asked to contribute a memorial stone to be placed in the Provincetown monument. The cost being small, your Selectmen thought it advisable to do so: as many of the old towns in the State were having similar stones placed.

The memorial consists of a granite block 2 1-2 feet by 1 1-2

feet by 15 inches in dimension, with the following inscription on face.

—Satuit—Scituate—1628. (date of settlement).

Owing to a law passed by the legislature in 1907, towns must elect their Assessors for terms of one, two, and three years, respectively. For that reason we think it advisable to elect your Selectmen and Overseers of the Poor for the same terms. By combining the offices we think the expense would be less, and much of the work done with a saving to the town.

A word about taxes.

By giving a discount of 5 per cent. on taxes paid October first, the people disposed to pay their bills on that date pay only \$15.67 per thousand, (at the present rate.)

Those who get no discount are charged \$16.50 per thousand (at the present rate).

The town makes no provision for that discount. The rate is based on the amount of money appropriated for the yearly expense, plus the State and County tax. Therefore the discount is an expense of about \$2,000, annually. In other words you are adding to your debt that much yearly. There is about \$20,000 carried on the tax collector's books annually, for which we receive no interest. But yet the town has to borrow large sums at high rates to meet their bills. From a business standpoint the town cannot afford to loan out \$20,000 free of charge. For that reason we recommend a change in the method of collecting. In our minds, taxes should be net October first at the rate figured for the current year with interest charged after that date.

In that way fewer people would neglect their taxes, and at the same time the town would be deriving some income to take care of their borrowed money.

Under the present system it costs the town (in addition to collecting) the per cent. given in discounts, plus the interest on uncollected taxes, on account of which we have to borrow money or about \$3,500 annually.

Respectfully submitted,

CHAS. H. WATERMAN,
E. PARKER WELCH,
JOHN D. FERGUSON,

Selectmen, Overseers of the Poor and Assessors.

TOWN MEETING.

Annual Town Meeting, March 4, 1907.

Ballot Clerks, James E. Driscoll and Henry A. Litchfield.

Charles F. Clapp and Walter J. Stoddard checked the names of voters before depositing their ballots in the ballot box.

George S. Bailey, John Cummings and Herbert E. Webb, took the oath of Office as Tellers, to count the votes of the Official Ballot on the counting board. Herbert E. Webb had charge of the tally sheet. These officers were sworn to the faithful performance of their duties by the Town Clerk.

The meeting was opened at 7 o'clock a. m., by the Town Clerk, who read the warrant, and took charge of the meeting.

Henry T. Bailey was chosen Moderator, by ballot, and then had charge of the meeting, being the Presiding Election Officer of the voting with the Official Ballot.

The Ballot Box had previously been examined and the keys given up to Charles M. Litchfield, constable.

The Ballot Box was opened at 8.30 a. m., and fifty ballots taken out, and the counting of votes commenced.

The Polls were declared closed at 12.30 o'clock p. m.

The Ballot box registered 455 votes, the number checked on the voting lists was 455.

Male Voters, 431. Female voters, 24.

The total vote as announced by the Presiding Election Officer, was as follows:

Selectmen for one year—

Henry E. Damon,	163
John D. Ferguson,	304
Charles H. Waterman,	261

John Wetherbee,	19
E. Parker Welch,	270
Hamilton W. Welch,	83

Assessors for one year—

Henry E. Damon,	164
John D. Ferguson,	293
Charles H. Waterman,	250
John Weatherbee,	19

George O. Allen, Eugene T. Brown, C. Albert Brown, Albert B. Curtis, Fred A. Conroy, Charles F. Clapp, William T. Clapp, William W. Hunt, Jr., Lorenzo F. Hyland, Ernest F. Litchfield, Elmer W. Litchfield, John L. Litchfield, Frank S. Watson, William H. Watson, Charles W. Wagner, William H. Welch, Milton G. Litchfield, Fred Webb, Liba F. Litchfield, Frank H. Cole, John F. Dalby, Israel C. Dalby, Edward Bush, Arthur J. Dalby, George Emerson, Charles G. Everett, Percy C. Mann, John C. Pierce, Elijah P. Pratt, David L. Studley, Aubrey W. Totman, Fenton W. Varney, Jetson Wade, Wilson E. Webb, Ernest R. Seaverns, Joseph E. Merritt, Everett R. Marsh, Ellis E. Damon.

Article 7.—Voted, that the Town do authorize the Overseers

of the Poor to contract at their discretion for the support of the Town's poor.

Article 8.—Voted, that the Town do authorize its Treasurer with the approval of the Selectmen, to borrow during the municipal year beginning March 4th, 1907, in anticipation of the collection of taxes of said year, such sums of money as may be necessary for the current expenses of the Town, but not exceeding the total tax levy for said year, giving the notes of the town therefor, payable within one year from the dates thereof. All debts incurred under authority of this vote shall be paid from the taxes of the present municipal year.

Article 9.—No report from any committee heretofore chosen.

Article 10.—Voted, that the Town do authorize the Selectmen to prosecute, compromise or defend any suit or suits within the Commonwealth in the name of the Town.

Article 11.—Voted, that the taxes be collected in the same way and manner as last year. A discount of 5 per cent. to be allowed on all taxes paid on or before Oct. 1, 1907; 4 per cent. discount on taxes paid Nov. 1, 1907; 3 per cent. discount on taxes paid Dec. 1, 1907. That the collector receive 1 per cent. for collecting the taxes.

Article 12.—Voted, that the Town do abate the poll tax of each individual fireman.

Article 13.—Voted, that the Town raise and appropriate the sum of \$500.00 for the purchase of a safe for the equipment of the Town hall.

Article 13.*—Voted, that the Town do raise and appropriate the sum of \$2,500.00 to be expended under the direction of the Highway Surveyor in resurfacing and macadamizing Beach street from the junction of Gannett and Hollett streets, easterly.

Voted, to take up article 22.

Voted, that the Town raise and appropriate the sum of \$2,500.00 to be expended under the direction of Highway Surveyor, to continue the building of the macadamized road from Front street to the Scituate station, by the way of Central street.

Article 14.—Voted, that the Town raise and appropriate the sum of \$1,500.00 to extend the macadam road from the residence of Robert Leighton on Blossom street towards North Scituate railroad station.

Article 15.—Voted, that the Town raise and appropriate the sum of \$500.00 to finish the sidewalk from Conihasset Hall to residence of the late J. H. Merritt on High street, and to gravel the sidewalk already built.

Article 16.—Voted, that the Town raise and appropriate the sum of \$150.00 for the improvement of the base ball field on the town common.

Article 17.—Voted that the Town raise and appropriate the sum of \$500.00 to be expended under the direction of the Highway Surveyor in resurfacing Border street with gravel or crushed stone wherever needed, the sum of \$500.00 to be taken out of the general appropriation.

Article 18.—Voted, that the Town do raise and appropriate the sum of \$100.00 to fix the foundation at the back of the Hatherly school, also to provide some shrubbery for the school grounds.

Article 19.—Voted, that a committee of two be appointed by the Moderator to act with the School Committee relative to repairing the Jenkins school.

Alfred H. Litchfield and Fred T. Bailey appointed.

Article 20.—Will the town raise and appropriate a sum of money necessary to put the Jenkins school building in proper condition—or act thereon?

Voted, to pass over.

Article 21.—Voted, that the Town raise and appropriate the sum of \$250.00 to pay for the services of the School Committee.

Article 23.—Will the Town accept Section 339 of Chapter 11 of the Revised Laws, and beginning at the annual meeting to be held in March, 1908, choose its Selectmen, Assessors and Overseers of the Poor one for one year, one for two years and

one for three, and each succeeding year one for three years—or act thereon?

Voted, no.

Article 24.—Voted, that the Town raise and appropriate the sum of \$500.00 to be expended in watering its macadam roads.

Article 25.—Voted, that the Town raise and appropriate the sum of \$200.00 for the purpose of providing a physician for the public schools in accordance with the provisions of Chapter 502, Acts of 1906.

Article 26.—Voted, in with the estimated expenses, to raise and appropriate \$2,600.00, being 2 per cent. of cost of construction of Fore River bridge.

Article 27.—Voted, that the Town do instruct its Selectmen to enforce the automobile speed law according to the statutes, and that the Town raise and appropriate \$100.00 for the same.

Voted, to take up article 2.

Voted, that the Moderator appoint three Park Commissioners.

Park Commissioners of the Town of Scituate: William H. North, chairman; Thomas B. Meteyard, Jonathan Hatch.

Voted, that the thanks of the meeting be extended to Mr. Henry T. Bailey for the able manner in which he had conducted the meeting, and that he receive \$5.00 for his services.

Voted, to dissolve the meeting.

Attest,

JETSON WADE, *Town Clerk.*

STATE ELECTION, 1907.

Pursuant to a warrant duly executed, the legal voters of the Town of Scituate met at the Town hall on Tuesday, the fifth day of November, 1907, at 6.30 o'clock in the forenoon and gave in their votes as follows:

Total number of votes cast, 235.

Governor—

Charles W. Bartlett,	14
Thomas F. Brennan,	0
John W. Brown,	0
Hervey S. Cowell,	5
Curtis Guild, Jr.,	148
Thomas L. Hisgen,	29
Henry M. Whitney, (Ind. Citizen vote),	3
Henry M. Whitney, (Democratic vote),	29
Henry M. Whitney, (Dem. Cit. nomination papers),	4
Blanks,	3

Lieutenant Governor—

E. Gerry Brown,	39

Oliver Cushman,	42
Blanks,	38

Shall the proposed amendment to the constitution authorizing the Governor, with the consent of the council, to remove Justices of the Peace and Notaries Public be approved and ratified?

Yes, 128; No, 27; Blanks, 80.

Attest,

JETSON WADE, *Town Clerk.*

At a meeting of the Town Clerks of the several towns comprising the Second Plymouth Representative District, held at the Town Clerk's office, Marshfield, on Friday, the 15th day of November, 1907, at 12 o'clock noon, it was ascertained by the return from each town that the number of ballots cast for each candidate for Representative to the General Court, on Tuesday, the 5th day of November, were as follows:

	Dux.	Mar.	Pem.	Scit.	Nor.	Total
Henry E. Damon, Scituate,	41	13	19	66	20	159
Joseph J. Shepherd, Pembroke,	133	122	79	144	98	576
Blanks,	24	17	12	25	4	82
Total vote,						817

Joseph J. Shepherd, having a majority of votes returned, was declared elected, and his certificate was made out in accordance therewith.

Joseph F. Merritt, Town Clerk of Norwell.

George H. Weatherbee, Town Clerk of Marshfield.

George H. Stearns, Town Clerk of Duxbury.

Leonard G. Ewell, Town Clerk of Pembroke.

Jetson Wade, Town Clerk of Scituate.

Attest,

JETSON WADE, *Town Clerk.*

SPECIAL TOWN MEETING.

January 4, 1908.

At a legal meeting of the inhabitants of the Town of Scituate, Mass., held at the Town hall on Saturday, the fourth day of January, 1908, at 2.30 o'clock in the afternoon

Henry T. Bailey was chosen Moderator.

Article 2.—Voted, to accept the layout of the Selectmen relocating Main, Blossom and Gannett streets at the station of the New York, New Haven & Hartford Railroad Company at North Scituate.

Article 3.—Voted, to accept the layout of the Selectmen, of North River Avenue, so-called, at Humarock Beach as a Town way.

Article 4.—Voted, that the Town accept Section 339 of Chapter 11 of the Revised Laws, and beginning at the annual meeting to be held in March, 1908, elect its Selectmen and Overseers of the Poor one for three years, one for two years and one for one year, and at each annual meeting thereafter elect one for three years.

Article 5.—Voted, that the Town do accept for park purposes the deed given by Silas Peirce and others of the land at North Scituate, known as and called Hollett Island.

Voted, that the thanks and appreciation of the Town be extended to Silas Peirce for the generous and valuable gift and

deed of Hollett Island for park purposes and that the Town Clerk be instructed to forward to Silas Pierce their vote and thanks.

Voted, to dissolve the meeting.

Attest,

JETSON WADE, *Town Clerk.*

COMMONWEALTH OF MASSACHUSETTS.

PLYMOUTH SS.

On the petition of W. P. Richardson and others presented to the County Commissioners of Plymouth County at their meeting holden at Plymouth on the 22d day of April, 1907, representing that they petitioned the Selectmen of the Town of Scituate on the 21st day of January, A. D. 1907, to lay out a town way in said town from a point on Willow street at the entrance of Hazel Avenue, a part of the so-called "Clapp Field," and running southerly through said Hazel Avenue, land of George Doherty, land of Mary Litchfield, and through a right of way and land of John Ward, to a point on Brook street.

That said Board of Selectmen did at a regular meeting held on the thirteenth day of March, 1907, unreasonably refuse to lay out said way.

Wherefore, your petitioners are aggrieved by the refusal of said Selectmen and request you to lay out a town way as described, as provided by Section 74 of Chapter 48 of the Revised Laws of Massachusetts, reference being had to the petition filed of record in the case.

The County Commissioners, pursuant to an order of notice duly published, posted and served, by which all persons and corporations interested had due notice thereof, met to view the premises at the store of George F. Welch in said Scituate on the

29th day of May, A. D. 1907, at two o'clock in the afternoon, and after viewing the premises and hearing all persons and corporations who desired to be heard, they adjudicate and determine that the common convenience and necessity require that the prayer of said petition be granted as hereafter set forth, no person or corporation then or at any other time objecting thereto.

And they continue and adjourn said proceedings from time to time for further consideration and to make return thereof, all persons and corporations having due notice thereof, to a meeting of the County Commissioners held at the Court House at Plymouth on the eighteenth day of November, A. D. 1907, when and where they adjudicated and determined that the said Selectmen did unreasonably refuse to lay out said way and proceeded to complete said proceedings and make return thereof as follows, to wit:

Beginning at a stone bound in the southerly line of Willow street, distant 55.95-100 feet from the corner board on the south-west corner of the house owned and occupied by Florence Driscoll, and 132.45-100 feet from the corner board of the south-east corner of the double house owned by said Driscoll, and thence running by a curve to the left from a tangent bearing south 18 degrees 42 minutes west, the radius of said curve being 3808 feet, by land of Charles L. Ritter and Wilmer H. Dawkins 427.49 feet to a stone bound, thence south 12 degrees 16 minutes west, 166 feet over land of said Ritter and Dawkins, 410 feet over land of George Doherty and 240.05 feet over land of Mary J. Litchfield to a stone bound, thence south 2 degrees 2 minutes west over land of William H. Burke 241.80 feet, to a mark on a stone post in the northerly line of Brook street.

Said street to extend forty (40) feet easterly from the above described line.

The grade of the centre of the above described highway when fully completed in accordance with this decree, is to conform to the grade of the said highway as at present constructed.

Owners of land taken as aforesaid are required to remove their trees, fences, buildings and other obstructions from the lands so taken before the first day of March, A. D. 1908.

The inhabitants of the Town of Situate aforesaid are hereby ordered to cause said highway to be constructed as aforesaid, made safe and convenient for the public travel, and to the acceptance of the County Commissioners before the first day of November, A. D. 1908.

At the same time awarded to the several persons and corporations whose lands are taken for said highway, or who suffer damages on account thereof, the several sums hereafter named to be paid from the Town treasury, so soon as said Town shall enter upon and possession take of said lands for the purpose of constructing said highway as aforesaid, to wit:

Ritter and Dawkins, no award on account of benefits received.

George Doherty, \$25.00.

Mary J. Litchfield, \$45.00.

Richard Wherity, \$40.00.

And said Commissioners order that the foregoing return be filed, accepted and recorded, and that an attested copy thereof be transmitted to the Clerk of the Town of Scituate, within the limits of which said highway described therein lies.

In witness whereof the said County Commissioners have hereunto set their hands this 18th day of November, 1907.

WALTER H. FAUNCE,

LYMAN P. THOMAS,

JERE B. HOWARD,

County Commissioners.

A true copy, attest,

EDWARD E. HOBART, *Clerk.*

Attest,

JETSON WADE, *Town Clerk.*

COMMONWEALTH OF MASSACHUSETTS.

PLYMOUTH, SS.

On the petition of the New York, New Haven and Hartford Railroad Company and others, presented to the County Commissioners of Plymouth County at their meeting holden at Plymouth on the second day of April in the year of our Lord nineteen hundred and seven, representing that a certain highway known as Blossom street in that part of the town of Scituate known as North Scituate, which crosses the tracks of the Old Colony Railroad Company leased to and operated by your petitioner near the North Scituate passenger station, so-called:

That public necessity and convenience require discontinuance of that portion of said Blossom street lying between Main street and Gannett street, so-called; being a total distance of about one hundred fifty feet, more or less, and that said portion of said Blossom street should no longer be maintained or used as a highway, reference being had to the petition filed of record in the case.

The County Commissioners, pursuant to an order of notice, duly published, posted and served, by which all persons and corporations interested had due notice thereof, met to view the premises at the Old Colony Railroad station at North Scituate on the twenty-ninth day of May, A. D. 1907, at 9.30 o'clock in the forenoon, and after viewing the premises and hearing all persons and corporations who desired to be heard, they adjudicate and determine that common convenience and necessity require that the prayer of said petition be granted as hereafter set forth, no person or corporation then or at any other time objecting thereto.

And they continue to adjourn said proceedings from time to time for further consideration and to make return thereof, all persons and corporations interested having due notice thereof, to a meeting of the County Commissioners held at the Court House at Plymouth on Monday the eighteenth day of November,

A. D. 1907, when and where they proceed to complete said proceedings and make return thereof as follows:

All that part of said Blossom street from its intersection with said Gannett street to and across the tracks of the Old Colony Railroad Corporation and extending to the southerly line of land of said corporation, is hereby discontinued as a highway.

In witness whereof the said County Commissioners have hereunto set their hands this 18th day of November, A. D. 1907.

WALTER H. FAUNCE,

JERE B. HOWARD,

LYMAN P. THOMAS,

County Commissioners.

Attest,

EDWARD E. HOBART, Clerk.

A true copy, attest,

JETSON WADE, *Town Clerk.*

In the matter of the petition of Henry Turner Bailey and others for the widening and relocation of Main, Gannett and Blossom streets, the Board of Selectmen heard the parties on Saturday the seventh day of December, 1907, and now report for action of the Town as follows:

To widen and relocate Main and Blossom streets by adding to those streets the land contained in the triangle at the junction of said streets, and lying outside of the property of the Old Colony Railroad Company, said triangle measuring on Blossom street twenty-three (23) feet, more or less, on Main street forty (40) feet, more or less, and on land of the Old Colony Railroad Company thirty-three (33) feet, more or less; and also to widen and relocate Main and Gannett streets by adding to those streets the land contained in the triangular shaped

parcel at the intersection of said streets, the base of said triangular shaped parcel being the arc of a circle of seventeen (17) foot radius running from line of Gannett street to line of Main street, the outward point of said arc being fifteen (15) feet, easterly from the angle of intersection of said streets, said angle being the apex of said triangularly shaped parcel.

Both said layouts and relocation are shown upon the plan filed herewith.

Both of said parcels are believed to belong to the Old Colony Railroad Company, leasee to the New York, New Haven and Hartford Railroad Company.

Both of said railroad companies have agreed that they do not and will not claim any damages on account of the taking of said parcels, and no damages are awarded to them or either of them.

The New York, New Haven and Hartford Railroad Company and the Old Colony Railroad Company claim no damages and are awarded no damages.

And the Selectmen order that the foregoing report be filed with the Town Clerk of Scituate, Mass., to be presented to the inhabitants of said Town of Scituate for their acceptance at some future Town meeting duly held for that purpose.

In witness whereof the said Selectmen have hereunto set their hands at Scituate, Mass., this twenty-sixth day of December, 1907.

JOHN D. FERGUSON,

E. PARKER WELCH,

CHARLES H. WATERMAN,

Selectmen of Scituate.

Received and recorded Dec. 27, 1907.

Attest,

JETSON WADE, *Town Clerk.*

Scituate, Mass., April 20, 1907.

The subscribers, Selectmen of Scituate, County of Plymouth, Commonwealth of Massachusetts, upon the petition of J. L. Greeley and others to lay out a town way in said town (at Humarock Beach, so-called,) having given seven days' notice to all abutters on said way and posting two notices in public places in said Town, one in the vicinity of the proposed route and one in the store of T. Litchfield in the west part of the town, to meet at the house of E. L. Josselyn on the eighteenth day of the present month at one o'clock P. M., and having met at the time and place appointed for that purpose, are of the opinion that there is occasion for a town way for the use of said Town as proposed; we therefore lay out said way as follows:

Beginning at a stake on the southerly side of Marshfield Avenue near the store of said Everett L. Josselyn, thence by a curve bearing south 12 degrees 10 minutes east, 1795 feet to a stake, thence bearing south 35 degrees east 474 feet to the terminal at Lincoln street.

The way to be forty (40) feet wide on the westerly side of the course, and we agree with the owners of the land over which the road passes that there will be no land damages, fences or wood to remove from said route, and that they will furnish gravel for future repair to town ways for 10 cents per two horse cart load, which such laying out, with the boundaries and admeasurements have been filed with the Town Clerk on the 24th day of April, being seven days before this meeting, to act on said layout, and we hereby report such laying out with the boundaries and admeasurements of the same to said Town at a meeting of the inhabitants regularly warned and notified for them to accept and allow the same.

Given under our hands this 24th day of April, 1907.

JOHN D. FERGUSON,

E. PARKER WELCH,

CHAS. H. WATERMAN,

Selectmen of Scituate.

A true copy, attest,

JETSON WADE, *Town Clerk.* /

MOTH EXTERMINATION.

REPORT OF SUPERINTENDENT ON THE EXTERMINATION OF THE GYPSY AND BROWN TAIL MOTH.

In the winter and spring of 1907 the work of cutting and burning the nests of the brown tail moth was finished. During the months of May and June all brown tail caterpillars found, and all reported, were sprayed with arsonate of lead and destroyed. An examination of the apple orchards in town at that time and previously, showed an increase in the nests of the gypsy moth. The orchards and street trees were carefully looked over for nests, and all nests found were treated with creosote to destroy the eggs. All trees infested by the gypsy moth were burlaped and examined in all parts of the town through the summer months. By the first of September about 10,000 gypsy caterpillars had been killed, but the trouble in exterminating the gypsy moth is our old hollow apple trees, giving the moths a secure hiding place to deposit their eggs, where no one can see the nests, and therefore hatch out, and the caterpillars cover the whole orchard and get onto the trees of some neighbor, very likely.

All orchards in town and single apple trees have been examined since last fall and the nests, where found, treated with creosote, the infested trees marked with white paint.

State Inspector Calvin Mixter, Jr., has examined many of the orchards, street trees and wood lands with the local men, and has helped not a little in locating the nests, being an expert in moth extermination. Large white oak trees are found infested with gypsy moth nests, as many as 19 nests being found on one tree and 11 on another. There is no doubt that birds of

some kind carry moth eggs or small caterpillars from infested apple orchards to the oak trees. The blue jays are in apple orchards and other kinds of trees around the houses in September and October when the nests of the gypsy moth have been laid on the trees. From an orchard the blue jays invariably fly to some tall tree, usually an oak, where they feed on acorns.

Every infested orchard and tree must be taken care of before the time for gypsy caterpillars to hatch in May. The owner can trim his trees by cutting out the dead wood, scrape the trees, and if hollow fill or cover the holes, or cut them down. This work is ordered to be done and is under the personal direction of Mr. John A. Farley, agent for Mr. A. H. Kirkland, State Superintendent, who has been in town a number of times to superintend the work and give information.

In some cases as many as 100 gypsy moth nests have been found in one old apple tree. Hollow trees, if infested and not too near any building, should be burned out with kerosene before the holes are covered.

More than 4,000 gypsy moth nests have been treated with creosote or burned within a few months. The brown tail nests are also required to be destroyed wherever found. Owners of orchards and infested trees should do all in their power to help the town authorities in exterminating these moths, by taking care of their trees, especially orchards whether infested or not.

Respectfully submitted,

JETSON WADE, *Local Supt.*

January 21, 1908.

TREE WARDEN'S REPORT.

To the Honorable Board of Selectmen:—

The Town, at its meeting in March, appropriated \$250 for the planting and care of trees; of this sum \$100 has been spent for the purchase of about 100 trees, planted in different parts of the town, the planting of which cost about \$60.

Have been called upon to do considerable trimming this year, which has cost about \$30.

We reserved \$50 for manuring the young trees and have been able to treat nearly all that have been set in the last three years—something that many of the trees were greatly in need of.

On account of the dry spell last summer, have lost quite a number of trees of that year's setting which should be replaced this spring. Several trees on the Common are killed each year by the boys setting fire to the grass in the spring, and allowing it to get into the mulch around the trees.

It seems to be the idea of most people that the Tree Warden is responsible for the way-side bushes that interfere with public travel, while in reality he has only to do with shade trees.

If the people owning the land along the streets against which young trees are set would give them some little attention when needed, it would often save a tree, as it is impossible to always be on hand to right a tree or to do some other little thing it might need; and any abutter is benefited by shade trees, as they not only make his place more attractive to the people who occupy it, but increase the value if he wishes to sell: we all know of places that have brought nearly as much again by having a few good trees around them.

As a whole the young trees are doing as well as can be expected—of course the growth the first few years, or until they be-

come established is slow ; but when once started soon make a tree.

I hope the town will continue its present policy of spending a small sum each year on trees, as I believe there is no money spent from which the town will derive such lasting benefit as that expended for this purpose.

This is a large town with many miles of streets, and it will take a good many years before they are all planted with trees ; but by doing a little each year, will finally be accomplished.

I should like to call the people's attention to the moth-work which is underestimated ; but if all could see as I have, sections where the moths have gotten a hold, they would be glad to get rid of them at any price.

Respectfully,

P. S. BROWN.

FIRE DEPARTMENT.

Scituate, Mass., Dec. 9, 1907.

To the Honorable Board of Selectmen:—

Gentlemen: We beg leave to tender the report of the Scituate Fire Department for the year 1907.

The personnel of the several companies is fully up to the standard of last year, and deserves the appreciation and support of the citizens of the town.

District Chief Joseph A. Ward resigned his office and Frank L. Young was appointed to fill the vacancy. The residents of North Scituate Beach have generously purchased and installed a fine fire bell in hose house No. 4.

The several hose houses, carriages, reels, hose and equipments are in good condition, though for efficient service in case of fire there are necessary fixtures much needed, and we most respectfully call your attention to the following wants; suitable fire ladders, hydrant gates, fire extinguishers and fire nets.

Two (2) new hydrants have been added during the year, making a total of one hundred and eight (108) at the present time.

During the dry season there have been fewer forest fires on the line of the railroad, as the section foremen have applied for and received written permission to set fire to and burn the dead grass, leaves and bushes, thereby removing the danger of fire from the sparks of the locomotives.

We recommend the purchase by the town of a hose reel and five hundred (500) feet of hose to be located in the town's building at Scituate Centre, as a protection to that section.

We also recommend that the sum of eight hundred (800) dol-

lars be raised and appropriated for the support of the several hose companies.

Very respectfully yours,

A. A. SEAVERNS, Chief,
F. W. LITCHFIELD, Clerk,
JOHN F. TURNER,
FRANK L. YOUNG,
JOHN B. DAMON.

BOARD OF HEALTH.

Scituate, Mass., Jan. 1, 1908.

To the Citizens of Scituate—

At the Town Meeting, March, 1907, there having been no change made in the Board of Health, the officers remained the same.

At this same meeting, you appropriated \$300 for the use of the Board of Health. This same appropriation was explained by the Chairman of Selectmen as being necessary for fumigating, and the bills that were accumulating, due to the indemnity which was essential to be paid according to the revised laws of 1906, Chapter 225, Section 42.

“When the Board of Health of a city or town shall deem it necessary in the interest of the public health to require a resident wage-earner to remain within such house or place, or otherwise to interfere with the following of his employment, he shall receive from such city or town during the period of his restraint compensation to the extent of three-fourths of his regular wages: provided, however, that the amount so received shall not exceed two dollars for each working day.”

Under this law, there has been expended and given to four resident wage-earners, \$253.25. In making this allowance to these families it was deemed essential by the Board that they should receive the indemnity allowed by law. We are pleased to state that this year there has been no trouble of any nature at No. Scituate Beach, possibly due to our request made in last year's report.

Complaint was made to us in regard to the conditions existing at Humarock Beach, so called, and upon investigating we caused

notices of our rules and regulations to be posted at prominent places in this vicinity and also made arrangements with Mr. Williamson to care for the garbage at that section of the Town, and the same has received proper attention.

Later in the year we were pleased to learn that our work had resulted satisfactorily.

The Town has been particularly free from contagious diseases since the first portion of the year.

From January to March, there was a slight epidemic of Scarlet fever, consisting of eleven cases, which were confined to four families.

It was feared at that time that the disease might spread, consequently it was deemed advisable that the school building from which the infectious disease first made its appearance, should be fumigated, and as a result, there was no spread of the disease.

Inquiries have been made in regard to the expense upon the Town of fumigating dwellings where there have been contagious diseases and for the information of the Town Citizens, we would inform the same that we have yet to learn of a Town which does not bear the attendant expense.

We wish to thank the Citizens of the Town for their ready compliance in our rules, and the general support accorded.

Respectfully Submitted,

GEO. O. ALLEN, Chairman,

FREDERIC COLE,

THOS. H. FARMER, Secretary.

PARK COMMISSIONERS' REPORT.

To the Citizens of Scituate—

At the last annual Town meeting, the voters accepted the provisions of the Park Act, and elected the undersigned as Park Commissioners to serve for one year. Under the provisions of that Act, the Park Commission has no authority to acquire by purchase any land for Park purposes, until an appropriation for the same has been made by the town.

They may however, receive by gift, such land as may be offered, subject to the approval of the town. Through the kindness of Mr. and Mrs. Silas Peirce, Holletts Island, a model tract of land on both sides of Border street, has been deeded to the Town of Scituate for the use forever as a Public Park.

Mr. and Mrs. Peirce in making the gift of this land (to be known hereafter as "Silas Peirce Park") have the honor of being the first donors under the Park Act, and are entitled to the thanks of the Commissioners, and the gratitude of the citizens of Scituate. The Commissioners hope that others may be found, willing to follow their praiseworthy example.

The Town however should acquire, as rapidly as may be, (by purchase, if in no other way) certain parcels of land, in the various sections of the Town, which may be set apart as Public Parks, thus beautifying the Town, and enhancing its value as a residence for those who certainly in the near future, will realize the beauties of the town for that purpose.

We recommend that the new board be elected to serve for one, two and three years, respectively, and that an appropriation of fifty (50) dollars be allowed them for incidental expenses. The Park Commission serves without pay.

Respectfully,

WILLIAM H. NORTH, *Chairman,*

JONATHAN HATCH,

THOMAS B. METEYARD,

Park Commissioners.

JETSON WADE, *Town Clerk.*

All persons are requested to report omissions or corrections in the births, marriages and deaths. Blanks for the return of births will be furnished to those applying therefor, by the Town Clerk.

JETSON WADE, *Town Clerk.*

NOTE ON TOWN DEBT AND INTEREST.

The debt of the town Dec. 31, 1904 was, \$97,200 00
represented in notes of different amounts and
payable from about one to fourteen years from
that date.

On Dec. 31, 1907 the debt was, \$86,200 00

A decrease of, \$11,000 00

The town voted to authorize the Treasurer with approval of the Selectmen to issue serial notes in place of notes coming due, the result being that the town is paying off its debt at the rate of from \$4,000.00 to \$5,000.00 each year.

On the other hand, owing to the large amount of uncollected taxes, the town is borrowing money in anticipation of taxes each year and paying out large amounts for interest.

The amount of interest on the debt has been reduced in 1907 \$621.11 from the amount paid in 1906 and a steady reduction will be made each year under the present system provided that no new debt is created.

The amount of interest paid on money borrowed in anticipation of taxes was in

1906,	\$ 617 74
1907,	1,149 95

Increase in 1907,	\$532 21
-------------------	----------

Amount borrowed in anticipation of taxes

1906,	\$30,000 00
1907,	40,000 00

Increase,	\$10,000 00
-----------	-------------

Uncollected taxes Dec. 31, 1907 about,	\$35,000 00
--	-------------

The Selectmen strongly recommend that no new debt be created, the town paying its way from its tax levy, and the continuance of the reduction of its debt to a normal limit at least.

JOHN D. FERGUSON,
E. PARKER WELCH,
CHARLES H. WATERMAN,

Selectmen.

Town of Scituate, Mass.

ANNUAL REPORT

OF THE

SCHOOL COMMITTEE

OF THE

Town of Scituate

FOR THE

Year ending December 31

1907

SCHOOL CENSUS.

September, 1907.

Number of boys between the ages of 5 and 15,	216
Number of girls between the ages of 5 and 15,	211
Total,	427
Number of boys between the ages of 7 and 14,	185
Number of girls between the ages of 7 and 14,	169
Total,	354

REPORT OF SCHOOL COMMITTEE.

To the Citizens of Scituate—

Another year has passed away, and once again we desire to submit to you a brief retrospect of the year's work in the public schools of our town.

We believe on the whole, that the record of the past year will compare favorably with others, and furthermore that it will show that it has been one of progress.

This progress has been made chiefly along the line of providing an education for those entrusted to our care, that will tend to make them practical in their life's work, to think and reason the why and wherefore for themselves, and above all to make them develop into better men and women and thus become better citizens and a credit to themselves and to the community.

In the handling of the school affairs of this town your committee has a great many problems which confront them, and we will endeavor to review and present them to you as briefly as possible.

The citizens of this town are to be highly honored for the noble way and manner in which they responded to the request of the committee at the last March meeting in the matter of raising more money for Teacher's salaries. We believe it has been beneficial in more than one way. It has helped to make the teachers realize that the town appreciates their work, and that they are worthy of their hire. It has also encouraged them in a desire to prove more worthy of the trust and confidence that the citizens and committee have in their endeavor to conscientiously and zealously carry out their part in the care and culture of the school children of this town.

The question, however, arises as to whether or not the citizens

are not satisfied, with simply seeing that the teachers are well paid, the scholars have proper equipment and comfortable buildings. Do they not imagine that if they provide all these things it is sufficient? Still if these citizens hired a carpenter to build them a house, or a man to cultivate their field, would they not naturally inspect the work to see that it was, or had been done in a satisfactory manner? Is not your child's welfare of more importance to you than the building of your house or the cultivating of your fields? Then why not take that deep consideration and see what the teachers and the schools are doing for your children. Again how many of the young men and women attending our High school have thought seriously of the why and wherefore of a High school education? Do they realize that in most cases it means a sacrifice on the part of their parents in sending them to school for another four years? Just at the time too, when their help on the farm, at the store or in the home is beginning to be appreciated. In the old days the boy of fourteen or fifteen was in reality a man, capable of doing his part on the farm, and if necessary supporting the mother and younger children. How many could do it today?

We all know that it is highly essential that we have a certain measure of education. The question is, when is that measure full, and how shall we fill it. Life is too short to press it down and have it overflowing with superfluities. What we most need is to consider the practical uses that are to be made of this education. It is at a great sacrifice that we provide it for our children, therefore it stands to reason, they should learn chiefly those things that will best fit them for their chosen vocation in life. Prof. Joseph Buchanan in an address delivered at Albany, before the University Convocation of the State of New York, stated that, "Intellectual training, however perfect we may make it, is not a liberal education. It is not an education at all, but only a fragment of an education, as an arm is a portion of a man." He goes on to state that, "the element of a liberal education is training for the business and duties of life, in other

words, Industrial Education, without some share of which it were better for a man that he had never been born; for without industrial capacity (unless a hereditary capitalist) he must either be a beggar, a thief, or a swindler.” Industrial education giving the mastery of productive arts is the second necessity as the development of the body is the first. Would it be rational to confine the baby to the cradle for ten years, on the pretext that it must first acquire language perfectly before it learns to walk? The infant would be impaired for life, as men are impaired by any system which for many years separates practical from literary culture. When industrial Education shall have become universal, we shall not only have a more honest and manly and fraternal race, but our fields will be more than doubled in their production, and our arts advanced from twofold to tenfold in their product; and in the abundance thus produced poverty and pauperism will be submerged, as the Desert of Sahara will be gone when the ocean flood is let in upon it.

The Commonwealth of Massachusetts has seen the great need along this line, and has provided an Industrial and Technical Commission, who are doing all in their power to carry out in reality those sentiments so ably and truthfully expressed by Professor Buchanan nearly thirty years ago.

As a town, it is not in our power to do much in this direction, but what little we can, we are trying to do. It is encouraging to realize that we have the State back of us, and sometimes we believe that in these small towns and villages, the State will assist our children in the matter of obtaining an industrial or technical education, even as it now assists those towns who are not able to support their own High school. Meanwhile, let us not fold our hands in willing idleness, but let us learn to labor and to wait.

Transportation.

The most serious, and in some respects most farcical, problem that confronts us as a committee, is that of transportation. When

the consolidation of the district schools was brought about, the first question that naturally arose, was that of transporting the children from their homes to the schools. The geographical situation of our town made it essential that arrangements be made for carrying those of our scholars who resided in its distant parts to the Grammar school nearest their district. From a cost of a few hundred dollars at its inception, it has now reached a stage where it requires quite a few thousands. Here, however it should stop. We believe that the town is doing all that it should be required to, and that at the present time the routes as established are ample. Of course we realize that with an increase in our population, extra barges might be required, but so long as our town lines continue as they now are, we think it unnecessary to increase the number of routes. In giving the matter our consideration last year, we believed that the crowded condition of the Grove street and West end barges, required the establishing of a new route. This would take care of the overflow from Grove street and would also accomodate the majority of the scholars who in the winter season used the North Main street barge. The remainder of these scholars we provide for by having them ride in the barge coming from the beach. These scholars, mostly resident of Blossom street, assembled at the Depot to take the barge, and were left there on their way home. In no case was the distance they had to walk more than a quarter of a mile.

Their parents, though, considered this a hardship, a discrimination, etc., and accordingly bombarded us with letters. and threatening the direst results if we did not have a barge come to their house and get their children. We, however, could not see that they were subjected to any great hardship in walking this distance, and have persistently declined to change our views. There are other parts of the town where the same conditions prevail, but those parents are not so anxious to assert that they or their children are being deprived of their rights. They evince by their compliance with the existing conditions, that they real-

ize that we as a committee are trying to handle this matter for the best welfare of the town in general, and not for the benefit of a few disgruntled ones, who by the attitude they take show that their spirit of loyalty to the town and its official representatives is at a very low ebb, and consists chiefly in furthering their own selfish motives. The true spirit of town patriotism consists not in "seeing how much can I get back for the taxes I pay," but how best can I help by my hearty co-operation those officials whom the town has elected, in their endeavor to conscientiously and economically administer the duties entrusted to them."

SCHOOL BUILDINGS.

Hatherly School. This building is in pretty good condition and its general aspect has been greatly improved by the shrubbery placed on the grounds. The amount we asked for last year to fill in and strengthen the foundation at the back of the school is not sufficient, according to estimates received, and we therefore postponed doing anything in the matter, preferring to wait until we could get another appropriation from the town to cover the estimated expense.

Jenkins School. The plaster that fell from the walls in the hall of the building has been replaced. There are some repairs needed in the sanitary arrangement, and which can come out of the appropriation for Town buildings. The greatest trouble we have experienced at this school, has been over an apparently simple matter, viz: the flag pole. The constant beating of the halyards against the slate roof results in their quickly wearing through. To overcome this we had a piece of zinc placed on the edge of the roof and bent under, but the high winds soon blew this off. We then arranged to have a small standard set up on the ground from off the building, to which the halyards could be attached to keep them from the edge of the roof. This we hope will prove satisfactory. While we before stated it is a small matter, still there is a principle behind it. That principle is the one of instilling into the hearts of our scholars, a love, respect

and admiration for their country's flag, and which cannot be well encouraged or fostered, by the sight of a bare pole.

High School. This building has outlived its usefulness. It is impossible to have good recitations in a room containing a great many more than it was originally intended it should. In the main room there is not sufficient seating capacity, and in the case of examinations, this works at a disadvantage. How to get around it is a problem. We are opposed to adding another story, or to enlarging it in general, as we feel that it is not located where it should be. We do not feel justified in asking the town at this time to build a new school, and we will therefore contrive to get along as at present. There must, however, be an additional class room added, and we have accordingly asked for estimates for this purpose. We have been hoping that some public spirited citizens of means, who had a deep sense of the value of a High School education, would volunteer to build us a new school. We still entertain these hopes.

There is one other important matter, and that is in connection with the sanitary arrangements in the building. There is only one toilet, and that located between two class rooms, and not provided with proper ventilation. Furthermore, it is only accessible at certain times. In view of the large number of scholars that attend this school, there certainly should be at least three, instead of only one as at present.

In conclusion, we desire to thank those of our citizens, who, by various ways have shown that they have more than a passing interest in the welfare of our schools. To those citizens we desire to say, that if you have any honest criticisms to offer, that will tend to promote the standard of education in our public schools, rest assured that we shall be glad to receive them, and will give them due and proper consideration. Our chief aim and desire is to have our schools conducted in such a way or manner that it will reflect not only to the credit of this good old town by the sea, but also to those who graduate from them.

Let us look forward, not backward—the future has its possi-

bilities, and we hope that one of the possibilities will be for our children to have an education that will fire them with inspiration, create in them high ideals, noble aims and aspirations. It will only be possible though, by being begun by that silent though potent influence, of the mother, at the altars of the home. If that fire is once kindled by her in the heart of her child, rest assured that no school or teacher will ever extinguish it, but will only help to fan it until it bursts forth into a fervent heat, which will permeate all with whom they come in contact by the true spirit of patriotism, and Christian citizenship as evinced by their lives.

Respectfully submitted,

SUPERINTENDENT'S REPORT.

To the Scituate School Committee—

I take pleasure in submitting, for your consideration, my second annual report.

The past year has been one of growth both in the quality of the work done and the number of pupils enrolled. There have been some changes in the personnel of the teaching force, but the work has gone steadily forward. The vacancies caused by the resignation of Miss Percy Merritt, sixth and seventh grade, at the Hatherly, Miss Sarah Bell, Commercial department, High School, and Mr. Albert S. Cragin, principal of the Jenkins school, have been filled as follows: Miss Ella Knight, Miss Marion White and Miss Lois M. Thompson.

Courses of Study.

No attempt has been made to make radical changes in our course of study. The course in reading, which was introduced into the first grade last year has been extended into the second and will be extended through the higher grades as times goes. Supplementary reading material has been added to the reading course in the upper grades. There is, however, a need for many more supplementary readers for the grades, and these should be purchased as soon as the state of your finances will allow. It is quite as important to teach the child what to read, as to teach him how to read, and selections from the masters of English should be placed in his hands as soon as he is able to read them understandingly. We should teach the child how to read in the first five or six grades, and then devote a large part of the time commonly spent on that process, in teaching some of the simple things in literature.

New arithmetics have been introduced and consequently some modifications in the course have been made. Every effort is being made to make the number work as practical as possible.

The work in language has been modified and more emphasis placed on written work in all the grades. We cannot expect to make poets or novelists of our boys and girls, but the work in language should be of such a quality as to enable them to use correct English in all of their written exercises. This can be accomplished only by long continued and conscientious work in written English. In many instances the pupils hear incorrect English at home, and on the playgrounds, and the teachers are obliged to counteract the impressions thus formed.

In all language exercises opportunity should be given for the greatest possible individuality on the part of the pupil. The language exercise must be related to the child's interests. What a child doesn't know about his pet animals and pet plants, the things he has reared and fed, or the numerous other childish things he is interested in, is scarcely worth knowing; when he begins to tell of these with tongue or pen, the story glows with warmth and individuality. A course that attempts to substitute for such work, reproduction, etc., defeats its own end.

High School.

Few changes have been made in the high school work. The Commercial Department has become well established, and is proving a valuable acquisition to the school. The course has been so arranged as to give a good practical knowledge of business and business methods, and at the same time give the pupil a broad, general education. The object of this course is not to provide an avenue of escape to the deficient or indifferent pupils, but rather to provide an opportunity to acquire a knowledge of business methods together with a good general education.

Accommodations.

The present crowded condition of the high school prevents

it from doing its best possible work. The main room can accommodate about 55 pupils comfortably. There are now in that room over 70 pupils. The Library (so called) where we are obliged to place the typewriters, is altogether too small and has no means of ventilation other than that of opening the doors into the other rooms. The sanitary conditions are such that at times sewer gas penetrates into this room from a toilet that opens from it. The Laboratory is without sinks for experimental work or proper cabinets for apparatus. It can comfortably seat about 12 pupils and under the present conditions from 20 to 25 are obliged to recite there.

The work in science cannot be done properly until we have a laboratory fitted up with the necessary apparatus. It is impossible to put the required apparatus in the present building for there is absolutely no room for it.

The importance of the work in science will be understood when one takes into consideration the fact that all the colleges and technical schools make science one of the principal features in their requirements for admission. We cannot hope to give our pupils the fit they should have in these subjects, for such institutions as The Massachusetts Institute of Technology, Harvard and other colleges of high standing, until we have a better scientific equipment. There is an increasing number of our boys striving for a technical education and we should give them the best possible fit for such an education. Again, the sanitary conditions at the high school are bad. Instead of modern sanitary toilets, etc., the high school pupils are obliged to resort to an out-house. When you consider the number that are obliged to use this out-house, and its exposed condition you will readily see that the effect is anything but healthful or proper. The citizens of Scituate have always responded with commendable generosity to the demands for educational purposes in the past, and it is to be hoped that the demand for a new high school building will prove no exception. When we expend money for any purpose, we want the greatest possible returns

for that money, and it is impossible to get such returns under the condition at our high school.

Salaries of Teachers.

Last March at the regular town meeting the citizens very generously appropriated money enough to give the grade teachers a raise of \$100 each. That was a very decided step in the right direction. Aside from placing the salary of the teachers more nearly on a par with that of the other professions, it has encouraged those teachers who have served long and faithfully and shown them that the citizens of the town appreciate their efforts.

The growth in the child is stimulated by growth in the teacher. Teachers, in order to grow in their profession, must spend time and money to keep up with the demands placed upon them. It is growing more and more difficult each year to secure good teachers, and still more difficult to keep them unless they are paid living wages. Our teachers, to do satisfactory work, must do professional work, either in the form of summer schools, reading or attending lectures. This is impossible if their salary is only enough to pay necessary living expenses.

The teacher's salary should always depend upon the efficiency of her work, regardless of term of service. In no case should a teacher's salary be raised merely because of long service. She should be given a salary that will enable her to live and perfect herself in her particular line. The teacher who will not take advantage of such opportunity, is dear at any price and should be replaced at once by one who will. It is in connection with the salaries of teachers, if anywhere, that Channing's words apply: "There is nothing on earth so precious as the mind, soul, and character of the child. . . . There should be no economy in education. Money should never be weighed against the soul of a child. It should be poured out like water for the child's intellectual and moral life."

School Physician.

Professor Search says, "If education is ever to aim at that

which is complete and best, it must comprehend the entire child. Fundamental in this, it seems right to expect that the product of the school should be an individual blessed with good health. To that end, school provisions and practices must not be simply permissive of health, but they must contribute directly to its realization.”

At our last annual town meeting, the town voted money to employ a school physician as required by law. Dr. Wm. P. Grovestein was appointed by the committee to act in that capacity. His services began Sept. 12, when school opened. Dr. Grovestein has visited at intervals, the various schools and has attended to calls from the teachers for medical aid and advice for pupils under their charge.

The importance of the law requiring medical inspection in the schools can be realized only by those who have an opportunity to visit schools frequently and who know something of the difficulties under which children are obliged to labor.

Statistics carefully collected and tabulated by eminent physicians, show an astonishing increase of physical defects in children of school age. Doubtless part of these defects is due to causes aside from their school life, but on the other hand many of them are due to causes that can be found in school. Many of these defects come on so gradually that only the practiced eye of an expert can detect them in their early stages. Then is the time to remedy them and that part of the work can best be done under the direction of a school physician.

Again comparatively few people realize what a handicap imperfect sight or hearing, adenoids, etc., are to a child. The work is laid out for a healthy child and if he is suffering from any of the many complaints of childhood, he cannot possibly do it satisfactorily. Many a child has been called dull, when he simply needed medical attention to remedy some physical defect of which he was afflicted. The importance of medical inspection in our schools can hardly be overestimated.

The Eye and Ear Test.

The importance of the senses of sight and hearing on the part of pupils needs no comment. Every effort should be made, both by parents and the school authorities to correct any defects of those senses that may be discovered.

The present school law requiring the school authorities to test the eyes and ears of the pupils, has produced some startling results. Many cases of defective eyes and ears have been discovered and reported to the parents and in most instances, the parents have sought professional advice with good results both to the health of the pupil and the quality of work done in the grades. There are cases, however, where parents have failed to have their children's eyes attended to, even after receiving several notices from the teachers. The unfortunate consequences resulting from such neglect or oversight, on the part of parents, can hardly be exaggerated. The child sustains irreparable injury through such neglect. Aside from the injury to the eyes, he is unable to do anything like his best work and consequently is obliged, in some instances, to take two years to do the work he could easily do in one, under favorable circumstances. Such neglect is, in my opinion, due to thoughtlessness, but such thoughtlessness as that which allows a child to injure a sense so important to his health, happiness, and efficiency in life, is almost criminal in its nature. The results of the eye and ear test were as follows:

School	Number enrolled	Defective in eyesight	Defective in hearing	Parents notified
High school	62	5	3	7
Jenkins school	176	22	10	20
Hatherly school	186	19	6	19
High St. school	24	7	1	8

Attendance.

The attendance on the whole has been good, but we still have

with us those who do not attend with the regularity necessary for the best results. This irregularity on the part of many pupils is due to apathy on the part of the parents. The remedy is more stringent enforcement of the truant laws. A careful and complete record has been made by means of a card catalogue system, of all the pupils in town. This is at hand in the Superintendent's office to compare with the school registers. At present the number of truant officers is insufficient, or they are too far removed from the various schools, to be of practical use. In each district a truant officer should be appointed who will not hesitate to prosecute, either for fear of retaliation or lest his political and business interests will suffer.

Teachers' Meetings.

Teachers' meetings have been held at frequent intervals and have added materially to interest and efficiency in the work. The teachers have manifested a very commendable spirit in their efforts to attend these meetings. In spite of the long distances some have to go to get to and from them, absences have been very rare indeed.

The high school and ninth grade teachers have joined the high school teachers in the other towns comprising the district in a series of joint teachers' meetings. In these meetings, papers are read on professional subjects, and are followed by discussions of problems that confront the various teachers in their work.

Owing to a misunderstanding on the part of some parents, I shall cause extracts from the school laws to be printed in an appendix to this report.

In conclusion, permit me to express my sincere appreciation of the hearty co-operation of all those with whom I have been associated in my work.

Respectfully submitted,

JOHN E. DE MEYER.

December 31, 1907.

HIGH SCHOOL REPORT.

To the Superintendent of Schools—

I have pleasure in reporting the largest enrollment in the High School during my term of service, and probably in the history of the school. We have, at this date, 72 pupils,—two more than there are desks. This number is divided among the several classes as follows: Post-graduate, 1; Senior, 13; Junior, 12; Sophomore, 19; Freshman, 27; total number of boys, 34; girls, 38.

The course of study this year has been revised in order to meet different needs. There are now three courses, i. e. College Preparatory, Commercial, and Academic. The first, as its name signifies, is designed especially for those pupils who are preparing to enter college. The commercial course has been arranged with a view to providing with a business preparation those pupils who will not go to any higher academic institution. The academic course is designed for those pupils who are not preparing for college, but who desire a general course. In the first two years the Commercial and Academic courses are nearly identical, except that the pupils in the latter course have an option between Latin and Commercial studies. The pupils in each course number as follows: College Preparatory, 17; Commercial, 33; Academic, 22. One member of the class of 1907 obtained the privilege of admission to Dartmouth College on examination, and several are planning to take college-entrance examinations in June.

The course in Trigonometry and Surveying was revived last spring, and an excellent surveyor's transit was added to the school's equipment. A class of 10 took the course last spring,

and the work has been continued this fall. Two lots have been surveyed and mapped.

The question of public speaking in High school is apt to be a difficult one to approach. The old custom of "speaking pieces" by every pupil in school at stated times does not seem to us to be the right and natural way to meet the problem, yet something along these lines should be done. This year, on Friday afternoons, we are devoting a short time to the discussion of current topics. The pupils prepare themselves previously, and speak or read their contributions before the school. They have taken hold of this plan, in most cases, with an admirable spirit, and the discussions have been of much interest. Different magazines and papers are on the reading table for reference. We have also, by the courtesy of the proprietors of the Situate Herald, started a High School Column in that paper. The school has a regular correspondent, and other pupils may and do contribute.

An Athletic Association was organized in the fall, to which both boys and girls are eligible. Through the kindness of the Selectmen the boys have the Town Hall for basket ball on three afternoons, and the girls on two afternoons a week, after the school session.

The great and pressing needs of the High School are first, *more room*; and second, *modern and sanitary toilet arrangements*. The first we must have, to properly seat and instruct our boys and girls; and the second is absolutely imperative on the grounds of health and decency. As soon as the parents realize these facts, the improvements will be forthcoming, for it is not possible that they will knowingly subject their children to these extremely adverse conditions.

One question to which I have given some thought, and which I submit for your consideration, is that of the advisability of beginning some courses of study in the winter term, making them open to young people, especially boys, who are obliged to work at home or for hire during the fall and spring. This is

done in the rural High schools of New York state, with the result that many come in for work during the winter term. These pupils are given credit for the work done, which may count towards graduation if they desire. Some are thus encouraged to go on and graduate, while many are glad simply for the added knowledge and help gained during one or two winters. This plan might make the school still more of a practical benefit to the community.

In conclusion I heartily thank you and the Committee for your helpful advice and staunch support during the year.

Respectfully submitted,

EDWARD R. CLARK, *Principal.*

DRAWING TEACHER'S REPORT.

To the Superintendent of Schools—

The drawing in the Scituate schools goes on very regularly. The pupils are interested and doing good work. The teachers, on whom its success largely depends, are doing everything to promote my plans and make the results satisfactory.

Drawing is almost as much a training for the eye as for the hand. Now and then we find an artist in embryo. The average pupil does very good work. The absolute poor workers are few in number. The well graded schools of this town make it possible to have the work very satisfactorily allotted, each child having studies suited to his age and ability.

The different mediums which we use, as pencil, ink and water colors, and the many studies and models we work from, give ever changing variety and interest. My aim in all the drawing is to make it practical for this reason. We have study in design twice during the school year, design being most often applied to industrial pursuits,

Respectfully submitted,

HARRIET J. FORD.

Duxbury, December 31, 1907.

REPORT OF THE MUSIC TEACHER.

To the Superintendent of Schools—

It becomes my pleasure to report to you the condition of the music in the schools of Scituate. It would seem that after years of earnest work on the part of the teachers, the results were beginning to show. Where we once began in the third grade to start music, we now begin with the first; and our present third grade is able to read quiet creditably simple little songs first with syllables then without, and lastly with words. Sometimes the first has no talent, and then it is up-hill work. Such may have been the case last year, as they only learned to imitate songs well, towards the last of the year, but on entering the second grade this year they surprised us all by doing excellent work in all that was given them. This year the first grade has already learned to sing the scale or sections of it and begun on skips, which is a gain on any past work. As the upper grades seem to take up more advanced music each year, we feel it necessary to pay a great deal of attention to the beginners. We regret very much the stand-still in the second grade, which as yet seems unavoidable. Children enter this grade with a fair knowledge of the scale, but all books, time and attention go to the third grade—placed in the same room—in order that the third grade may not be neglected. We may soon be driven to beg some more books from the management, borrow some more patience for the day teacher, and steal time from the program in order to move the grading along more evenly.

So, although we know that the upper grades are doing a great deal with their opportunities, we wish to push along the work in lower grades, that the future high grades may be even better.

Owing to the generosity of the school board, the High School

was given beautiful new singing books at the close of the last school year; the pupils showed their appreciation by doing as earnest and efficient work as one could hope to find in any High School chorus. In five weeks they prepared a grand opera selection, and oratorio selection, a bass song with vocal accompaniment, and a very beautiful song by Henry Leslie. This was as much as a chorus of trained singers could hope to do well in the same length of time, and seemed rather risky to attempt for public performance, but some of us know the value of concentrated thought and watching the conductor, and were not daunted. We feel, generally speaking, that the result was pleasing to all at the graduation exercises.

It may not happen that the High School shall contain the same quantity of talent in the future, but can we not make the work of last year and this year a standard to never fall short of, but to gain upon if possible? Of course this rests with the children who are growing up, as the teacher has always given the best work in our support.

Respectfully submitted,

LILLIE C. STODDARD.

SCHOOL PHYSICIAN'S REPORT.

To the Scituate School Committee—

I take pleasure in submitting the following report as School Physician.

I began my services in September when the schools opened and have visited the different rooms in town from time to time.

I have inspected the various buildings with reference to ventilation and general sanitary conditions and have attended to calls from the teachers for medical advice regarding pupils under their charge.

In no cases have I, as medical inspector, attempted to treat pupils or prescribe for them.

It has been my function merely to debar from school, any children whose presence might be a menace to the health of others, and to notify the parents in cases where medical attendance is desirable in order that the regular family physician may be called.

School buildings—

The Hatherly and Jenkins buildings are new and modern houses and are well adapted from the standpoint of health for school purposes. They are well ventilated and provided with sanitary plumbing.

The High Street school while it has no modern plumbing is large and commodious when one takes into consideration the number of pupils that attend that school.

The High school however is far from satisfactory. The sanitary conditions are bad throughout the building. Even the main room is very poorly ventilated and the recitation rooms are too small and the natural results follow: the air gets tainted with the various impurities that come from the system within a

very short time after the classes enter and the pupils are obliged to breath that bad air for a considerable time.

The building has no sanitary plumbing. The pupils are used to the modern plumbing in their school buidlings until they get to the high school and then when they are just entering the early stages of manhood and womanhood they are obliged to resort to an outhouse. Modesty and also atmospheric conditions prevents them from attending to the demands of nature as they should.

Such conditions are liable to result in physical complications which not only unfit them for their work but are liable to follow them in after life. Something should be done to better these conditions.

In conclusion I would express my appreciation of the kindness of the teachers and school authorities in assisting me in in every way possible with my work.

Respectfully submitted,

WILLIAM P. GROVESTEN.

EMPLOYMENT TICKET AND AGE AND SCHOOLING CERTIFICATE.

Section 32. The age and schooling certificate of a minor under sixteen years of age shall not be approved and signed until he presents to the person who is authorized to approve and sign it, an employment ticket duly filled out and signed. A duplicate of each age and schooling certificate shall be filled out and shall be kept on file by the school committee. Any explanatory matter may, in the discretion of the school committee or superintendent of schools, be printed with such certificate. The employment ticket and the age and schooling certificate shall be separately printed, and shall be filled out, signed and held or surrendered, as indicated in the following forms:—

Employment Ticket, Revised Laws, c. 106, sec. 32.

When (name of minor) , height (feet and inches) ,
complexion (fair or dark), hair (color) , presents an age
and schooling certificate duly signed, I intend to employ (him
or her).

(Signature of intending employer or agent.)
(Town or city and date.)

Age and Schooling Certificate, Revised laws, c. 106, sec. 32.

This certifies that I am the (father, mother, guardian or cus-
todian) of (name of minor) , and that (he or she) was born
at (name of city or town) ' in the county of (name of county,
if known) , and state (or country) of ' on the (day
and year of birth) , and is now (number of years and months)
old.

(Signature of father, mother, guardian or custodian.)
(City or town and date.)

Then personally appeared before me the above-named (name
of person signing) , and made oath that the foregoing certi-
ficate by (him or her) signed is true to the best of (his or her)
knowledge and belief. I hereby approve the foregoing certi-

ficate of (name of minor) , height (feet and inches) , complexion (fair or dark) hair (color) , having no sufficient reason to doubt that (he or she) is of the age therein certified. I hereby certify that (he or she) (can or cannot) read at sight and (can or cannot) write legibly simple sentences in the English language.

This certificate belongs to (name of minor in whose behalf it is drawn) , and is to be surrendered to (him or her) whenever (he or she) leaves the service of the corporation or employer holding the same: but if not claimed by said minor within forty days from such time, it shall be returned to the superintendent of schools, or, if there is no superintendent of schools, to the school committee.

(Signature of person authorized to approve and sign, with official character or authority.)

(City or town and date.)

In the case of a minor who cannot read at sight and write legibly simple sentences in the English language the certificate shall continue as follows, after the word language:—

I hereby certify that (he or she) is regularly attending the (name) public evening school. This certificate shall continue in force only so long as the regular attendance of said minor at the evening school is indorsed weekly by a teacher thereof.

SCHOOL ATTENDANCE.

ATTENDANCE COMPULSORY BETWEEN SEVEN AND FOURTEEN YEARS OF AGE.

Section 1. Every child between seven and fourteen years of age shall attend some public school in the city or town in which he resides during the entire time the public day schools are in session, subject to such exceptions as to children, places of at-

tendance and schools as are provided for in section three of chapter forty-two and sections three, five and six of this chapter. The superintendent of schools or, if there is no superintendent of schools, the school committee, or teachers acting under authority of said superintendent or committee, may excuse cases of necessary absence. The attendance of a child upon a public day school shall not be required if he has attended for a like period of time a private day school approved by the school committee of such city or town in accordance with the provisions of the following section, or if he has been otherwise instructed for a like period of time in the branches of learning required by law to be taught in the public schools, or if he has already acquired such branches of learning, or if his physical or mental condition is such as to render such attendance inexpedient or impracticable. Every person having under his control a child as described in this section shall cause him to attend school as herein required; and if he fails for five day sessions or ten half day sessions within any period of six months while under such control to cause such child, whose physical or mental condition is not such as to render his attendance at school harmful or impracticable, so to attend school, he shall, upon complaint by a truant officer and conviction thereof, be punished by a fine of not more than twenty dollars. Whoever induces or attempts to induce a child to absent himself unlawfully from school, or employs or harbors a child who, while school is in session, is absent unlawfully from school shall be punished by a fine of not more than fifty dollars.

AN ACT RELATIVE TO THE APPOINTMENT OF SCHOOL PHYSICIANS.

Chapter 502, Acts of 1906.

Section 1. The school committee of every city or town in the Commonwealth shall appoint one or more school physicians.

shall assign one to each public school within its city or town, and shall provide them with all proper facilities for the performance of their duties as prescribed in this act: *provided, however*, that in cities wherein the board of health is already maintaining or shall hereafter maintain substantially such medical inspection as this act requires, the board of health shall appoint and assign the school physician.

Section 2. Every school physician shall make a prompt examination and diagnosis of all children referred to him as hereinafter provided, and such further examination of teachers, janitors and school buildings as in his opinion the protection of the health of the pupils may require.

Section 3. The school committee shall cause to be referred to a school physician for examination and diagnosis every child returning to school without a certificate from the board of health after absence on account of illness or from unknown cause; and every child in the schools under its jurisdiction who shows signs of being in ill health or of suffering from infectious or contagious disease, unless he is at once excluded from school by the teacher; except that in the case of schools in remote and isolated situations the school committee may make such other arrangements as may best carry out the purposes of this act.

Section 4. The school committee shall cause notice of the disease or defects, if any, from which any child is found to be suffering to be sent to his parent or guardian. Whenever a child shows symptoms of smallpox, scarlet fever, measles, chickenpox, tuberculosis, diphtheria or influenza, tonsillitis, whooping cough, mumps, scabies or trachoma, he shall be sent home immediately, or as soon as safe and proper conveyance can be found, and the board of health shall at once be notified.

Section 5. The school committee of every city and town shall cause every child in the public schools to be separately and carefully tested and examined at least once in every school year to ascertain whether he is suffering from defective sight or hearing or from any other disability or defect tending to prevent his

receiving the full benefit of his school work, or requiring a modification of the school work in order to prevent injury to the child or to secure the best educational results. The tests of sight and hearing shall be made by teachers. The committee shall cause notice of any defect or disability requiring treatment to be sent to the parent or guardian of the child, and shall require a physical record of each child to be kept in such form as the state board of education shall prescribe.

Section 6. The state board of health shall prescribe the directions for tests of sight and hearing and the state board of education shall, after consultation with the state board of health, prescribe and furnish to school committees suitable rules of instruction, test-cards, blanks, record books and other useful appliances for carrying out the purposes of this act, and shall provide for pupils in the normal schools instruction and practice in the best methods of testing the sight and hearing of children. The state board of education may expend during the year nineteen hundred and six a sum not greater than fifteen hundred dollars, and annually thereafter a sum not greater than five hundred dollars for the purpose of supplying the material required by this act.

Section 7. The expense which a city or town may incur by virtue of the authority herein vested in the school committee or board of health, as the case may be, shall not exceed the amount appropriated for that purpose in cities by the city council and in towns by a town meeting. The appropriation shall precede any expenditure or any indebtedness which may be incurred under this act, and the sum appropriated shall be deemed a sufficient appropriation in the municipality where it is made. Such appropriation need not specify to what section of the act it shall apply, and may be voted as a total appropriation to be applied in carrying out the purposes of the act.

Section 8. This act shall take effect on the first day of September in the year nineteen hundred and six. (*Approved June 20, 1906.*)

TOWN OFFICERS, 1908

Town Clerk. — JETSON WADE.

Town Treasurer. — ERNEST L. BONNEY.

Collector. — FENTON W. VARNEY.

Selectmen, Assessors and Overseers of the Poor. — JOHN D. FERGUSON, E. PARKER WELCH, CHARLES H. WATERMAN.

School Committee. — JULIA E. WEBB, CLARA M. SKEELE, PETER W. SHARP.

Superintendent of Schools. — JOHN E. DEMEYER.

Board of Health. — GEORGE O. ALLEN, FRED COLE, THOMAS H. FARMER.

Highway Surveyor. — J. FRANK CRANE.

Park Commissioners. — WILLIAM H. NORTH, CLEMENT J. PROUTY, WALTER H. SPOONER.

Board of Fire Engineers. — Chief Engineer, ALFRED A. SEAVERNS.

District Engineers. — District No. 1, FRANK L. YOUNG; District No. 2, FRANK W. LITCHFIELD; District No. 3, ALFRED A. SEAVERNS; District No. 4, WALTER H. SPOONER; District No. 5, JOHN F. TURNER.

Registrars of Voters. — CHARLES F. CLAPP, CHARLES T. CHUBUCK, WALTER J. STODDARD; JETSON WADE, Clerk.

Constables. — JOHN F. TURNER, WILLIAM E. SUPPLE, CHARLES M. LITCHFIELD.

Tree Warden. — PERCIVAL S. BROWN.

Auditor. — CHARLES W. PEARE.

Town Physician. — T. BRANCH ALEXANDER, M.D.

Keeper of the Lockup. — CALEB W. PROUTY.

Inspector of Cattle. — WILLIAM W. WATERMAN.

TO THE INHABITANTS OF THE TOWN OF SCITUATE:

The Selectmen, Assessors and Overseers of the Poor submit the following report for the year 1908:

Owing to the large sums appropriated for roads at our last annual meeting, the Selectmen did not ask for an appropriation for the building of the highway leading from Willow to Brook Street, as ordered by the County Commissioners. An extension of time was granted to June 1, 1909.

An estimate of the cost of same has been made and the town is asked to make an appropriation of \$800 to pay damages as awarded and complete the road to the satisfaction of the County Commissioners.

Last summer it was considered necessary to have a patrolman at Scituate Harbor to serve at night, and for the sake of economy one other than a regular constable was appointed.

The Board was criticised for so doing, and, owing to numerous complaints about illegal liquor selling, Mr. Supple was appointed in October to serve as liquor officer for three months.

We trust his services were appreciated. Though liquor may be sold in town, the Board does not consider it one of its duties to do detective work, as some evidently expect; and unless complaints are made direct to the Selectmen, they are not in a position to see as much of such traffic as other citizens about town.

On the whole the Board thinks this town compares favorably with other towns under no-license rule.

Our roads generally are in a good condition, and a little

money from the general or a special appropriation spent in clearing up along our main streets would add much to the appearance of our town. The Board suggests a small sum be appropriated for that purpose.

As our macadam roads increase in length, more money is needed to keep them in repair, and the Board suggests the advisability of investigating the asphalt or oil process before making an appropriation for sprinkling purposes.

The North Scituate Improvement Association has had one-half mile treated that has proved far superior to sprinkling.

Our Fire Department lacked equipment in certain houses.

During the year considerable has been added, and we hope a sufficient appropriation will be made to maintain same the coming year.

A good fire department is cheap insurance for the town, especially at North Scituate Beach and Scituate Harbor, where a fire once started would wipe out a large amount of valuable property, which would mean a loss of thousands of dollars income to the town.

Our town should have improvements made in our town hall, and while the Board recommends economy in its appropriations, believes that decent accommodations should be provided for its town officers.

During the year the Selectmen considered making some necessary repairs and discontinuing the playing of basketball in the hall. So much opposition was presented that nothing was done and permits were granted to various teams to play basket-ball.

More room is needed for the Selectmen and Assessors, and the improvements as planned two years ago would make a desirable hall with good accommodations for years to come.

We therefore recommend an appropriation for that purpose.

Last year the Selectmen recommended a change in the method of tax collection, and think facts will prove the jus-

tice of their claim, when the amount of uncollected taxes is seen as presented in the tax collector's report.

The law says that taxes are due and should be met the first of October.

Interest should be charged on uncollected taxes and a sum provided for discounts, if a discount is given.

As the rate is figured on the amount of money required for expenses, the town should receive the amount levied for such purposes as required by law. Otherwise there must be a deficit. You wonder why the town cannot show more reduction in its debt. The simple reason is that the town gives away two to three thousand dollars yearly in discounts.

An appropriation is made for abatements, therefore the Board recommends an appropriation for discounts.

This year the State appointed Supervisors of Assessors, whose duty it is to make periodical visits to the towns and cities in their respective districts.

Their recommendations and orders are such that much more time must be spent in the Assessors' department.

With the present amount allowed town officers the Assessors cannot do the work required. The State requires more and more work to be done by the Selectmen, Assessors, and Overseers of the Poor each year, and no town officer can be expected to give his time without proper recompense.

The Board therefore recommends an increase in the appropriation for town officers sufficient to meet additional outlay for services or clerk hire in the Assessors' department.

A sum of fifty cents could be assessed on every poll tax payer in town for Tree Warden purposes.

Rather than do that a small increase should be made in the usual appropriation.

The more trees set out annually help to beautify the town and is money well spent.

You will probably be asked to make appropriations for improvements in our school buildings. The Board suggests that whatever sum may be needed for that or other pur-

poses, the same be raised by direct taxation in the ensuing year, instead of increasing our debt.

In a few years, with proper economy and continuing the present method of taking up certain notes annually, the town will be in a financial condition that will warrant the building of good, substantial town buildings without increasing the burden on the taxpayers.

The appropriation for the suppression of the gypsy and brown-tail moths was overdrawn considerably this year, much against the wishes of the Selectmen.

The State law is such that unless towns expend an amount equal to their liability as apportioned by the Moth Commission, the State may take up the work and complete it to their own satisfaction, which has been done in some towns. In that case our town would be under considerable more expense than at present. Owners of trees should take enough interest in the town's welfare to care for their own trees without further expense to the town.

Rather than overdraw the appropriation in 1909, the town's whole liability should be appropriated.

The Board therefore recommends an amount of \$1,700 be raised for moth work in 1909.

The town last year appropriated \$5,000 for the support of the poor, and our report shows how same has been expended. No doubt there are some cases in town that should receive aid, but who are too independent to apply for same. There are others who will not exert themselves to earn a dollar if the town will provide.

The Overseers of the Poor have tried to be just to all with the means provided, but do not feel that the latter cases should have any sympathy or help, and hope to have the support of the town's people in refusing aid to such persons.

JOHN D. FERGUSON,

E. PARKER WELCH,

CHARLES H. WATERMAN,

Selectmen, Assessors, and Overseers of Poor.

CHARLES W. PEARE,
Auditor.

OLD LIGHTHOUSE, SAND HILLS, SCITUATE

A PAPER READ AT A MEETING OF THE CHIEF
JUSTICE CUSHING CHAPTER, D.A.R., AT
FIRST PARISH CHURCH, SCITUATE,
SEPTEMBER 5, 1908

The lighthouse at the extremity of Cedar Point, which forms the northerly side of Scituate harbor, was authorized by Act of Congress, May 1, 1810, with an appropriation of \$4,000. The lower part of the tower was built of granite blocks and the upper part of brick, the whole structure being painted white. A substantial dwelling-house, connected with the tower by a long, low shed, was also erected, the whole being completed and the light established in 1811. It was a fixed white light, and was of great service at that time and for many years after, as can be readily understood from the fact that there was in those days a fleet of about one hundred sail of vessels owned at Scituate harbor alone, besides a large number at each of the ports of Cohasset, Duxbury and Plymouth.

On account of vessels bound for Boston mistaking this light for Minot's, which was then also a fixed white light, it was decided in 1860 to abolish it, the new lighthouse on Minot's Ledge then being fully established.

The decadence of the mackerel and other fisheries, as well as the falling off of the coastwise business, owing to the advent of steamships and railroads, had also greatly reduced the number of vessels hailing from Scituate and adjacent ports, so that the necessity for the lighthouse at Scituate was greatly diminished. In 1891 there was established at the extremity of the northerly breakwater at Scituate har-

bor a small red light on an iron spindle, which is visible at a distance of about four miles and serves all the present needs of the limited number of vessels now making the port.

The first keeper of the lighthouse was Capt. Simeon Bates, who was succeeded in the following order by Anthony Watterman, William Osborne, Alonzo Jones and Thomas Richardson. The present incumbent is J. F. Cushman, who has charge of the red light, and resides in the summer time with his family in the dwelling-house attached to the old tower.

Many people are attracted here in summer time, owing to the following romantic story of the War of 1812. The British warship *Bulwark* had been lying at anchor at the harbor several weeks and had repeatedly sent demands on shore for fresh beef and vegetables, which the citizens, however, did not furnish.

On the morning of June 11, 1814, two barges had entered the harbor and set fire to the shipping. By this act, hardly to be called honorable warfare, ten vessels, fishing and coasting craft, were lost. Thoroughly aroused by this cowardly act of depredation, the citizens petitioned the government for protection, with the result that a regiment under command of Col. John Barstow was despatched to the protection of the people of Scituate and guards kept posted. These energetic measures seemed successful in keeping the enemy off; unfortunately the discipline became relaxed as time passed on and the enemy did not appear in sufficient force to indicate that they again expected to make an attack. About September 1, 1814, when the guards supposed to be on duty at the lighthouse were absent, the British frigate *La Hogue* appeared. It anchored near the lighthouse, in which at that time there was no one but the wife of the lightkeeper, Simeon Bates, and his two daughters, Abigail and Rebecca Bates. The guards had left a fife and drum as well as their firearms in the lighthouse. As the family

watched the troops disembarking preparatory to an attack, they felt the terrible responsibility upon them, and tried to devise some plan to meet the emergency. Nothing seemed practicable until Rebecca proposed to her sister to take the fife and drum and, concealing themselves behind the lighthouse, play the tunes which would ordinarily be used in assembling the guard. By this means she hoped to frighten off the British, or at least delay their landing until the regular guard should come. Placing themselves so as not to be seen from the water, Rebecca commenced playing "Yankee Doodle" and Abigail beat the roll call. Two barges packed with British soldiers had left the *La Hogue* and had covered about half the distance to the landing when the stirring roll of a drum, calling the soldiers to arms, and the martial strains of "Yankee Doodle" from a fife rang warlike from behind the lighthouse. The boats stopped at once, the officer in command considering the force with him too small to meet the warm reception he feared was awaiting him on shore. The commander-in-chief, who was watching from the warship, also became alarmed and the boats, recalled by the firing of a gun from the *La Hogue*, returned to the ship, which hoisted her sails and left the harbor.

There had been no guard to receive the attack. The drummer was Abigail Bates, and the fifer Rebecca Bates. A British ship-of-war and its force of soldiers had been frightened away by two quick-witted American girls, a so-called "army of two."

TOWN MEETING

ANNUAL TOWN MEETING, MARCH 2, 1908

Ballot Clerks, E. Clayton Hyland and James E. Driscoll.
Charles F. Clapp and Walter J. Stoddard checked the names of voters before depositing their ballots in the ballot box.
Tellers, George S. Bailey and John Cummings. Herbert E. Webb had charge of the tally sheets.
These officers were sworn to the faithful performance of their duties by the Town Clerk.
The meeting was opened at 7 o'clock A.M. by the Town Clerk, who read the warrant and took charge of the meeting.
Henry T. Bailey was chosen Moderator by ballot, and then took charge of the meeting, being the Presiding Election Officer of the voting with the Official Ballot.
The ballot box was opened at 9.15 A.M. and fifty ballots taken out and the counting of votes commenced.
The polls were declared closed at 12.33 P.M. The Ballot Box registered 460; the number of voters checked on the two voting lists was 460.
Male, 443. Female, 17.
The total vote as announced by the Presiding Election Officer was as follows:

Selectman for three years:
John D. Ferguson 301

Selectman for two years:
Charles H. Waterman 325

Selectmen for one year:

Henry E. Damon	190
E. Parker Welch	237

Assessor for three years:

John D. Ferguson	294
----------------------------	-----

Assessor for two years:

Charles H. Waterman	295
-------------------------------	-----

Assessors for one year:

Henry E. Damon	194
E. Parker Welch	225

Overseer of the Poor for three years:

John D. Ferguson	277
----------------------------	-----

Overseer of the Poor for two years:

Charles H. Waterman	300
-------------------------------	-----

Overseers of the Poor for one year:

Henry E. Damon	182
E. Parker Welch	212

Town Clerk for one year:

Jetson Wade	360
-----------------------	-----

Town Treasurer for one year:

Ernest L. Bonney	366
----------------------------	-----

Collector of Taxes for one year:

Fenton W. Varney	376
----------------------------	-----

Auditor for one year:

Charles W. Peare	326
----------------------------	-----

School Committee for three years:

Clara M. Skeele	247
Hamilton W. Welch	173

Surveyor of Highways for one year:

J. Frank Crane	199
James W. Turner	138
Henry Webb	93

Board of Health for three years:

Frederic Cole	323
-------------------------	-----

Tree Warden for one year:

Percival S. Brown	254
Edward Bush	111
Charles B. Carpenter	37

Constables for one year:

Charles M. Litchfield	286
Liba F. Litchfield	197
William E. Supple	251
John F. Turner	324

Shall licenses be granted for the sale of intoxicating liquors in this town?

Yes, 165; No, 241.

OFFICERS ELECTED MARCH 2, 1908

Selectmen, Assessors, and Overseers of the Poor. — John D. Ferguson, three years; Charles H. Waterman, two years; and E. Parker Welch, one year.

Town Clerk. — Jetson Wade.

Town Treasurer. — Ernest L. Bonney.

Collector of Taxes. — Fenton W. Varney.
Auditor. — Charles W. Peare.
School Committee. — Clara M. Skeelee.
Highway Surveyor. — J. Frank Crane.
Board of Health. — Frederic Cole.
Tree Warden. — Percival S. Brown.
Constables. — Charles M. Litchfield, William E. Supple and John F. Turner.

ARTICLE 2

Voted, *Surveyors of Lumber, Measurers of Wood and Bark.*
 —Ansel F. Servan, George S. Bailey.
Fence Viewers. — Jonathan Hatch, Hosea J. Stockbridge and Clement J. Prouty.

State Tax, estimated	4,500 00
County Tax, estimated	4,500 00

ARTICLE 5

Voted, That the rate of wages for removing snow be 25 cents per hour.

ARTICLE 6

Voted, That the town do authorize the Overseers of the Poor to contract at their discretion for the support of the town's poor.

ARTICLE 7

Voted, That the town authorize the Town Treasurer, with the approval of the Selectmen, to borrow during the muni-

cipal year beginning March 2, 1908, in anticipation of the collection of taxes of said year, such sums of money as may be necessary for the current expenses of the town, but not exceeding the total tax levy for said year, giving the notes of the town therefor payable within one year from the dates thereof. All debts incurred under authority of this vote shall be paid from the taxes of the present municipal year.

ARTICLE 8

Voted, To hear the report of any Committee heretofore chosen, or act thereon.

No Committee to report.

ARTICLE 9

Voted, That the town do authorize the Selectmen to prosecute, compromise or defend any suit or suits within the Commonwealth in the name of the town.

ARTICLE 10

Voted, That the taxes be collected in the same way and manner as last year.

A discount of 5 per cent to be allowed on all taxes paid on or before October 1, 1908.

Four per cent discount on taxes paid on or before November 1, 1908.

Three per cent discount on taxes paid on or before December 1, 1908.

That the Collector receive one per cent for collecting the taxes.

ARTICLE 11

Voted, That the town do abate the poll tax of each individual fireman.

ARTICLE 12

Voted, That the town raise and appropriate the sum of \$2,500 to be expended under the direction of the Highway Surveyor to complete the building of the macadam road from Front Street to the Scituate railroad station by the way of Central Street, and that said road be completed on or before June 1, 1908.

Voted, To take up Article 18.

Voted, That the town raise and appropriate the sum of \$2,500 to build a section of macadam road from the house of Walter C. Cogswell, easterly, on Beach Street.

Voted, That said road be completed on or before May 1, 1908.

ARTICLE 13

Voted, To raise and appropriate the sum of three hundred dollars (\$300.00) to be expended under the direction of the Highway Surveyor, to put in condition the road from the northerly end of the Second Cliff to the northerly end of the First Cliff.

ARTICLE 14

Voted, That the town do raise and appropriate the sum of \$500.00 to be expended under the direction of the Highway Surveyor to raise the grade of the road leading from Webb's Corner to the Second Cliff.

ARTICLE 15

Voted, That the town raise and appropriate the sum of \$100.00 to be expended under the direction of the Highway Surveyor in graveling "North River Avenue," so called, at Humarock Beach.

ARTICLE 16

Will the town direct, under Section 49, Chapter XLII, R. L., that the Selectmen have general charge and superintendence of schoolhouses, the keeping of them in good order, providing them with fuel, etc.?

Voted, No.

ARTICLE 17

Voted, That the town raise and appropriate the sum of \$300.00 for the purchase of a hose reel and five hundred feet of hose to be located at Scituate Centre, said sum to be expended under the direction of the Chief of the Fire Department.

ARTICLE 19

Voted, That the town do raise and appropriate the sum of \$1,500 to continue construction of macadamized road westerly, via Blossom and High Streets.

ARTICLE 20

Voted, That the town raise and appropriate the sum of \$50.00 for the use of the Park Commissioners for incidental expenses for the year ensuing, and that hereafter all appropriations for the improvement of squares, playgrounds, commons or parks be expended under the direction of the Park Commissioners.

ARTICLE 21

Voted, That the town raise and appropriate the sum of \$150.00 for the purpose of beautifying the grounds around Union Hall, and that said amount be expended for grading around Union Hall in conjunction with the Park Commissioners.

ARTICLE 22

Voted, To raise and appropriate the sum of \$500.00 to be expended under the direction of the School Committee to put the Jenkins School building into condition to accommodate the High School and to make such arrangements as may be expedient for the transportation of High School pupils.

ARTICLE 23

Voted, To raise and appropriate the sum of \$150.00 to be added to the unexpended appropriation of last year for the purpose of strengthening the foundations, also to provide the necessary drains for carrying off the water that now accumulates in the basement at the Hatherly School.

ARTICLE 24

Voted, That the town raise and appropriate the sum of \$250.00 for School Committee services.

ARTICLE 25

Voted, That the town raise and appropriate the sum of \$300.00 to purchase five hundred feet of hose, to be kept at the "Sand Hills Beach," so called, in the custody of Jonathan Hatch.

ARTICLE 26

Will the town instruct its Selectmen to appoint Special Police at the Sand Hills Beach?

Voted, To pass over.

Voted, That the Moderator appoint a Board of Park Commissioners, one member for three years, one for two years, one for one year, the old Board to serve until the new Board is nominated.

Under Transportation:

Voted, That the School Committee be instructed to transport all children under ten years of age to the Grammar and Primary Schools.

Voted, That the Moderator be paid \$5.00 for his services.

Attest:

JETSON WADE,
Town Clerk.

May 30, 1908.

In accordance with the vote of the town, I hereby appoint as Park Commissioners:

Mr. William H. North, to serve for three years; Mr. Walter H. Spooner, to serve for two years; and Mr. Clement J. Prouty, to serve for one year.

HENRY T. BAILEY.

A true copy. Attest:

JETSON WADE,
Town Clerk.

SPECIAL TOWN MEETING, JUNE 22, 1908.

At a legal meeting of the inhabitants of the town of Scituate, qualified to vote in elections and in town affairs, held at the Town Hall, in said Scituate, on Monday, the twenty-second day of June, 1908, at 7.30 o'clock in the afternoon, the vote was as follows:

ARTICLE 1

Alfred A. Seaverns was chosen Moderator.

ARTICLE 2

Voted, That the town do instruct its Selectmen to sign a release or releases to indemnify and save harmless the Commonwealth against all claims and demands for damages which may be sustained by any person whose property is taken for or is injured by the construction of its highway about to be built.

ARTICLE 3

Voted, To accept the layout of the Selectmen, widening and straightening road at the junction of Blossom and High Streets.

ARTICLE 4

Voted, To accept the widening and straightening of the road west of Union Hall, from Union Street to Central Street, as laid out by the Selectmen.

ARTICLE 5

Voted, That the town do accept the layout of the Selectmen, widening Garfield Avenue at its junction with Beach Street, to a point about one hundred feet on said Garfield Avenue.

ARTICLE 6

Voted, To raise and appropriate \$100.00 to be expended under the direction of the Park Commissioners.

ARTICLE 7

Voted, That the town do rescind the Article passed at the Annual Meeting held March 2, 1908, whereby the sum of \$500.00 was raised for the purpose of removing the High School to the Jenkins School building.

ARTICLE 8

Voted, That a Committee of three be appointed to consider the accommodations of the High School and its needs, and print its findings in the next Town Report.

Voted, That said Committee of three be appointed by the Chair before July 1, 1908.

ARTICLE 9

Will the town raise and appropriate the sum of \$3,750.00 to add another story to the present High School and provide same with heating and plumbing and furnishings?

Voted, That Article 9 be referred to the same Committee.

ARTICLE 10

Voted, That the town do raise and appropriate the sum of \$500.00 for the purpose of providing rear exits from the Jenkins and Hatherly schools, and also for continuing the driveway at the Jenkins, so that the entrance on the right-hand side facing building can be used, to be expended under the direction of the School Committee.

ARTICLE 11

Will the town raise and appropriate the sum of \$125.00 for a flagpole to be erected on the grounds of the Jenkins School?

Voted, That Article 11 be referred to the Special Committee.

ARTICLE 12

Will the town raise and appropriate the sum of \$200.00 to be expended under the direction of the State Highway Commissioners in making wider construction of State Highway about to be built from Union Street to bridge near Clapp's Mill.

Voted, That the town raise and appropriate the sum of \$200.00 under Article 12.

ARTICLE 13

Will the town vote to change the number of Constables from three to five, to be chosen at the next Annual March Meeting, 1909?

Voted, No.

ARTICLE 14

Voted, That the town do instruct its Selectmen to sell its horse road roller.

Voted, To dissolve the meeting.

Attest:

JETSON WADE,
Town Clerk.

June 25, 1908.

In accordance with instructions of the Special Town Meeting, held Monday evening, June 22, 1908, I hereby appoint Messrs. E. Parker Welch, William H. North and Peter W. Sharp a Committee to consider the question in regard to the High School building as per vote of the town.

A. A. SEAVERNS.

Peter W. Sharp resigned, and Henry T. Bailey was appointed to fill the vacancy.

A. A. SEAVERNS,
Moderator of said Meeting.

STATE ELECTION, NOVEMBER 3, 1908

At a legal meeting of the inhabitants of the town of Scituate qualified to vote in elections, held in the Town Hall in said Scituate on Tuesday the third day of November, 1908, it being the Tuesday after the first Monday of said month, at six thirty o'clock in the forenoon, the meeting was called to order by the Town Clerk, who read the warrant, after which the meeting was taken in charge by John D. Ferguson, the Presiding Election Officer.

The polls were then formally opened.

Fenton W. Varney and Frank L. Bates took the oath of office as Ballot Clerks, and had charge of the giving out of ballots to voters who passed through into the polling places.

Hamilton W. Welch and Joseph A. Ward took the oath of office as Tellers and checked the names of voters who passed the desk and deposited their ballots in the ballot box.

One box of nine hundred ballots was delivered to the Ballot Clerks before the opening of the polls.

Selectman E. Parker Welch had charge of the ballot box.

The first block of fifty ballots was taken from the ballot box at 9.30 o'clock A.M. and counted.

The polls were declared closed at 3.20 o'clock P.M.

The ballot box registered 352 votes; the names of the voters checked upon the voting list kept by the Tellers corresponded with the list kept by the Ballot Clerks.

The ballots taken from the ballot box and counted gave the same result, 352 ballots having been cast.

The ballots were counted upon the counting board by Selectman Charles H. Waterman and Fenton W. Varney, under the supervision of John D. Ferguson, Presiding Election Officer.

The Town Clerk had charge of the tally sheets. The result of said count is hereby given, as shown on the total tally sheet.

JETSON WADE,
Town Clerk.

At a meeting of the Town Clerks of the several towns comprising the Second Plymouth Representative District, held at the Town Clerk's office at Marshfield, on Friday, November 13, 1908, at 12 o'clock noon, it was ascertained by the returns from each town that the number of ballots cast for each candidate for Representative on Tuesday, November 3, was as follows:

	CHURCH	MOORE	BLANKS	TOTAL VOTE
Marshfield .	52	142	34	228
Duxbury . .	37	163	35	235
Norwell . .	95	121	12	228
Scituate . .	111	195	47	352
Pembroke .	125	60	15	200
	420	681	143	1,243

William S. Moore of Duxbury, having a majority of votes returned, was declared elected and his certificate was made out in accordance therewith.

GEORGE H. WEATHERBEE, *Town Clerk of Marshfield.*

JOSEPH F. MERRITT, *Town Clerk of Norwell.*

GEORGE H. STEARNS, *Town Clerk of Duxbury.*

JETSON WADE, *Town Clerk of Scituate.*

MR. HALLIDAY, *Town Clerk of Pembroke.*

Attest:

JETSON WADE,

Town Clerk of Scituate.

REPORT OF TOWN CLERK

MARRIAGES RECORDED IN SCITUATE, 1908

January 1, Harry A. McBride, South Hero, Vt., and Gertrude Webster Tilden of Scituate, married by Howard Key Bartow at Cohasset.

February 1, Herbert Davis Litchfield of Scituate and Alice Foster Clapp of Scituate, married by Frederick B. Noyes at Scituate.

April 28, Leon F. Knox of Scituate and Mrs. Annette (Corless) Crosier of Scituate, married by George A. Hathaway at Scituate.

May 27, Edwin Otis Stoddard of Scituate and Sarah Rebecca Damon of Scituate, married by Thomas Simms at Braintree.

May 5, Robert D. Webster of Scituate and Minnie May Huntley of Scituate, married by Hartnell J. Bartlett at Scituate.

May 3, Elmer Stanley Williams of Cohasset and Florence Bates Lincoln of Scituate, married by Hartnell J. Bartlett at Scituate.

September 29, Frank H. Barry of Scituate and Mary E. Collins of Scituate, married by Charles F. Donahoe at Cohasset.

October 3, Leon Cobbett of Norwell and Eunice Burbank of Scituate, married by Melvin S. Nash at Hanover.

October 3, Henry Osborne Davis of Plymouth and Julia Morton Allen of Plymouth, married by Frederick B. Noyes at Scituate.

October 19, Gustaaf Marius Flu of Cambridge, Mass., and Louisa Bryant James of Scituate, married by Hartnell J. Bartlett at Scituate.

October 28, Patrick J. McGuinniss of Scituate and Mary Sheehan of Dedham, married by John H. Fleming at Dedham.

November 4, Wesley L. Poole of Scituate and Mary B. Sullivan of Scituate, married by P.L. Van Wicklen at Scituate.

December 2, Benjamin Nichols of Scituate and Gladys M. Turner of Scituate, married by Frederick B. Noyes at Scituate.

December 8, William Fletcher Patten of Chicago and Susan M. Rich of Scituate, married by Howard Key Bartow at Scituate.

Town Clerk.

LAYOUTS OF ROADS

March 14, 1908.

To the Honorable Board of Selectmen, Town of Scituate, Mass.:

We, the undersigned, respectfully petition your Board that in connection with the improvement of the grounds around Union Hall, the street west of the hall be widened from Central Street to the bridge.

ERNEST L. BONNEY AND OTHERS.

April 1, 1908.

LOCATION OF TOWN WAY NEAR UNION HALL

Acting under a petition of Ernest L. Bonney and others, to the Selectmen of Scituate, in the County of Plymouth and Commonwealth of Massachusetts, after a view and a public hearing on the premises, on the first day of April, 1908, at ten o'clock in the forenoon, due notice having been given in writing to the owner of the land as required by law, have laid out a town way on the west side of Union Hall from a point on Central Street upon the land of Carrie W. Litchfield to a stake on Union Street, distance about twenty-five rods. The owner of the land taken for said town way, as aforesaid, is required to remove her trees, fences and other obstructions from the land so taken before the first day of July next, A.D. 1908.

Beginning at a point in the northerly side line of Central Street, said point being North $68^{\circ} 0'$ East 121 feet distant from the northwest corner of Miss C. W. Litchfield's house and North $59^{\circ} 50'$ East 97 feet 5 inches distant from the northeast corner of said house; thence South $83^{\circ} 39'$ East 70 feet to an angle; thence North $74^{\circ} 47'$ East 25 feet to an angle; thence North $60^{\circ} 28'$ East 84 feet to an angle; thence North $55^{\circ} 53'$ East 63 feet to an angle; thence North $47^{\circ} 50'$

East 80 feet to a point in the westerly side line of the road leading to Brook Street; all these courses and distances being in the land of Miss C. W. Litchfield; thence southerly and westerly along the side line of the present road to the point of beginning. All points and angles to be marked by stone bounds. Land taken 12 rods, Miss C. W. Litchfield.

The inhabitants of the town of Scituate aforesaid are ordered to cause said town way to be worked and constructed, made safe and convenient for the public travel on or before the first day of August next, A.D. 1908.

At the same time awarded Miss Carrie W. Litchfield, whose land is taken for said town way, the sum of fifty (\$50.00) dollars, to be paid from the town treasury so soon as said town shall enter upon and take possession of said land for the purpose of constructing said town way, and such other improvements as said petition calls for about said Union Hall.

PLAN FILED WITH SAME

And the Selectmen order that the foregoing return and plan be filed with the Town Clerk of said Scituate for their acceptance at some future town meeting duly held for that purpose.

In witness whereof the said Selectmen have hereunto set their hands at Scituate, Mass., this first day of April, A.D. 1908.

JOHN D. FERGUSON,
E. PARKER WELCH,
CHARLES H. WATERMAN,
Selectmen of Scituate.

Attest:

JETSON WADE,
Town Clerk

SCITUATE, March 14, 1908.

To the Honorable Board of Selectmen of the Town of Scituate:

We, the undersigned, voters, represent that public necessity and safety require the re-location of the street at the junction of High and Blossom Streets.

And we pray your Honorable Board to view said premises and make said improvements.

LIBA F. LITCHFIELD AND OTHERS.

April 1, 1908.

FOR WIDENING TOWN WAY, HIGH AND BLOSSOM STREETS,
ACTING UNDER A PETITION OF LIBA F. LITCHFIELD
AND OTHERS

The Selectmen of Scituate in the County of Plymouth and Commonwealth of Massachusetts, after a view and public hearing held on the premises on the first day of April, 1908, at two o'clock in the afternoon, due notice of said hearing and view having been given in writing as required by law to the landowners and interested parties, have laid out a town way by widening the old way on said corner of High and Blossom Streets in said Scituate, Mass., upon the land of the estate of the late Geo. W. Merritt, as follows:

Beginning at a point in the westerly side line of Blossom Street from which point the northwesterly corner of the house on the estate of Geo. W. Merritt bears South $23^{\circ} 30'$ East 71 feet 3 inches distant, and the southeasterly corner of same house bears South $9^{\circ} 5'$ East 82 feet distant; thence South $72^{\circ} 20'$ West 30 feet to an angle, thence South $82^{\circ} 16'$ West 37 feet to an angle; thence North $74^{\circ} 14'$ West 40 feet to an angle; thence North $57^{\circ} 48'$ West 38 feet to an angle; thence North $46^{\circ} 45'$ West 87 feet to a point in the northerly side line of High Street, the foregoing course and distances on lands of the estate of Geo. W. Merritt; thence

easterly along the side line of the present road to the point of beginning. All points and angles to be marked by stone bounds.

Land taken, 9 rods, on estate of Geo. W. Merritt.

Plan filed herewith.

The owners of the land taken for said widening of town way as aforesaid are requested to remove their trees, fences and other obstructions from the land so taken before the first day of July, A.D. 1908.

The inhabitants of the town of Scituate aforesaid are ordered to cause said town way to be worked and made safe and convenient for the public travel on or before the first day of August, 1908.

At the same time and place awarded to the heirs of the estate of Geo. W. Merritt, whose land is taken for said improvement of town way, the sum of twenty-five (\$25.00) dollars, to be paid from the town treasury so soon as said town shall enter upon and take said land for the purpose of widening and improving said town way as aforesaid.

And the Selectmen order that the foregoing return be filed with the Town Clerk of said Scituate to be presented to the inhabitants of said town of Scituate for their acceptance at some future town meeting duly held for that purpose.

In witness whereof the Selectmen have hereunto set their hands at Scituate, Mass., this first day of April, 1908.

JOHN D. FERGUSON,
E. PARKER WELCH,
CHARLES H. WATERMAN,

Attest:

Selectmen of Scituate.

JETSON WADE,
Town Clerk.

To the Selectmen of the Town of Scituate:

Respectfully represents your petitioners, citizens of said town, that public necessity and convenience require the widening and re-location of Garfield Avenue in said town at its junction with Beach Street as follows:

Beginning on said Beach Street at a point in the northerly line thereof to be determined by the prolongation of the westerly line of Hatherly Road, and distant about ten feet from the present western corner of Garfield Avenue and Beach Street, thence northerly through land of Bailey one hundred feet, more or less, to the westerly line of said Garfield Avenue; thus making the westerly lines of said road and said avenue continuous.

Wherefore we pray that your Honorable Board will lay out, widen, alter and re-locate said Garfield Avenue as above set forth.

Dated at Scituate this thirteenth day of April A.D. 1908.

ARTHUR P. CUSHING *et al.*

PROPOSED WIDENING OF GARFIELD AVENUE,
NORTH SCITUATE BEACH, MASS.

Acting under petition from A. P. Cushing and others, the Selectmen of Scituate in the County of Plymouth and Commonwealth of Massachusetts, after a view and public hearing held on the premises, Garfield Avenue, on the fifteenth day of May, 1908, at ten o'clock in the forenoon, due notice of said hearing and view having been given in writing as required by law to the owner and all interested parties, have laid out a town way, by widening said Garfield Avenue in said Scituate as follows:

Beginning at a stone bound at the westerly corner of Garfield Avenue and Beach Street, thence North $14^{\circ} 0'$ West 64 feet 8 inches along the westerly side line of Garfield Avenue to a point; thence South $0^{\circ} 19'$ West 68 feet across the

land of Henry N. Clark to a point in the northerly side line of Beach Street; thence along said line North 72° 0' East 17 feet to the beginning.

Land taken, Henry N. Clark, 544 feet.

The owner of the land taken for said town way as aforesaid is requested to remove his trees, fences and other obstructions from said land so taken before the first day of July, A.D. 1908.

The inhabitants of the town of Scituate aforesaid are ordered to cause said town way to be worked and constructed, made safe and convenient for public travel on or before the first day of August, A.D. 1908.

At the same time awarded to Henry N. Clark, whose land is taken for said town way, the sum of twenty-five (\$25.00) dollars, to be paid from the town treasury, so soon as said town shall enter upon and take possession of said land for the purpose of widening said town way as aforesaid.

And the Selectmen order that the foregoing return be filed with the Town Clerk of said Scituate to be presented to the inhabitants of said town of Scituate for their acceptance at some future town meeting duly held for that purpose.

In witness whereof the said Selectmen have hereunto set their hands at Scituate, Mass., this sixteenth day of May, in the year one thousand nine hundred and eight.

JOHN D. FERGUSON,
E. PARKER WELCH,
CHARLES H. WATERMAN,
Selectmen of Scituate.

Scituate, May 18, 1908.

Attest:

JETSON WADE,
Town Clerk.

MOTH EXTERMINATION

REPORT OF SUPERINTENDENT ON THE EXTERMINATION OF THE GYPSY AND BROWN-TAIL MOTHS

The work of examining orchards, street trees, shade and ornamental trees and woodlands has been carefully carried out, under the direction of State Agent John A. Farley and Inspector Calvin S. Mixter, Jr., in regard to locating and destroying the nests of the gypsy and brown-tail moths. Last spring more than 8,000 trees were burlaped in town, the burlap examined and more than 125,000 gypsy caterpillars killed by the men employed on the work, outside of all caterpillars destroyed by property owners and tenants.

In the fall, looking over the orchards again for new nests, it was found that 102 infested places had been cleaned up, no gypsy moth nests having been found. At the same time other orchards and more woodlands were found to be infested, the caterpillars of the gypsy moth having been scattered by crows and other birds. It is said the crow feeds its young on the gypsy moth caterpillar where they may be found; in doing that the crow in carrying them drops some of them, and they in time turn into the moth and make new nests in the woods or pastures. Knowing that to be true, all the woodlands and single trees, especially the white oak, must be examined and looked over carefully. As more gypsy nests are found on the white oak than any other tree in the woodlands, it is for the good of the whole town at large that the woodlands be examined, as required by the State authorities, and by so doing treat all nests found with creosote, destroying the eggs (each nest contains from three to six hundred eggs), and save the forests from destruction. It is of vital importance to take care of all trees found to be infested, and keep

the gypsy moth under control until the parasites, the natural enemy of the gypsy caterpillar, multiply and spread out in New England and destroy them the same as in other countries in Europe, where the gypsy moth has been a pest for many years, but kept down by the parasite so that little harm has been done.

The parasite is now being bred in this country in Malden, and I am told will be successful; some of them will be liberated on the South Shore next summer.

A number of near-by towns after having raised and expended their liability in this work have taken advantage of the money raised by the State for the extermination of the moths and have been helped to the amount of \$2,500, or more in some cases, mostly in taking care of woodlands.

In one wood lot alone, near the centre of the town, more than 15,000 nests of the gypsy moth have been treated with creosote. The work on the four or five acres is not finished at the present time; if nothing was done to destroy the eggs we would have very few trees alive three years from this date.

I would advise that this town raise the total liability assessed by the State, according to a town's valuation, of one twenty-fifth of one per cent, which this year is \$1,661.85, to be used if necessary. It surely benefits the town in taking care of all its trees. The nests of the brown-tail moth are cut from the trees where found and burned. This year the nests are plenty only near the salt water and salt marshes. In other parts of the town it is an easy matter to take care of them, except on high elm trees where an extension ladder and climbing irons must be used..

Spraying infested trees with arsenate of lead in the early summer, when the caterpillars are small, where available, is a most desirable and effective way of extermination.

Respectfully submitted,

JETSON WADE,

Local Superintendent.

January 14, 1909.

TREE WARDEN'S REPORT

SCITUATE, MASS., January 11, 1909.

To the Citizens of the Town of Scituate:

The town appropriated, at its meeting in March, \$250.00 to be expended by the Tree Warden. Of this sum \$80.00 has been spent for young trees, having set sixty medium-sized trees and ten larger ones, the planting of which cost \$47.00.

During the dry spell in July, I had all the trees that have been set in the last few years dug around and mulched with hay, the cost of this being \$40.00.

In August we went over all the roads in town, cutting out the lower limbs that most interfered with travel; cost, \$53.00.

The worst limbs only were removed, and there are streets in town today almost impassable on this account. Neal Gate Street is one of these.

Since then I have been called upon to move some trees at North Scituate on account of the widening of the road, and have bolted up several trees which were split, also other necessary work.

There are several trees which should have been replaced last fall, and I would have done this had the money been available. The young trees ought to have been manured; and many of our larger ones — notably the big elms on Central Street, between the depot and harbor — are so full of dead wood as to make them dangerous in a high wind.

Revised Laws, Chapter 51, Section 10, says: The officer having charge of the trees belonging to the town, and his assistants, but no other person, may trim trees and bushes

standing in public ways; and that the surveyors or road commissioners shall cause whatever obstructs such ways or endangers, hinders, or incommodes persons traveling thereon, to be removed. So it would seem that the surveyor was responsible for the condition of the streets, and should order the Tree Warden to do any trimming he might deem necessary, to be paid for from the highway appropriation.

The reason your attention has been called to this is that I have been called upon to spend about \$50.00 of my appropriation for this work, and believe that while this is so small, it should all be spent in the setting of young trees and the care of larger shade trees.

I would recommend the appropriation of \$500.00 for the coming year, as I think that young trees planted along our streets are one of the best investments a town like ours can make. Also, if the elm-tree beetle is as destructive this year as it was last in the towns north of us, the trees will have to be sprayed, which will be quite expensive.

The Tree Warden has no authority to cut trees or bushes along the state road, and any complaints regarding the condition of the same should be made to the Massachusetts Highway Commission.

Respectfully submitted,

PERCIVAL S. BROWN.

SCITUATE PARK COMMISSIONERS' REPORT

To the Citizens of Scituate:

Now that the Park Commission is a permanent institution in the town, one member being elected annually for a term of three years, much can be done to beautify the town and make it more attractive for those in search of a summer residence or a permanent home, providing the citizens of the town will give their support and coöperation. Last year the Commissioners had the pleasure of announcing the deeding of Hollett's Island to the town, for park purposes, by Mr. and Mrs. Silas Peirce. This year, through the generosity of Mr. Everett Torrey of Boston, they wish to state that Elm Park on Highland Street will be bequeathed to the town and also sufficiently endowed to insure its being kept in its present good condition and attractiveness. Several years ago Mr. Torrey set out a row of elm trees, completely encircling the park, some of which are now twenty inches in diameter and still growing rapidly. Seats were constructed in the shade of these trees which have been greatly appreciated by all who frequent that section of the town.

By action of the Woman's Club an article was inserted in the town warrant asking for an appropriation of \$150.00, which was granted, to grade and improve the grounds about Union Hall. By working in conjunction with the highway surveyor, who was widening the street in the rear of the hall, excellent value for the amount of money expended was received.

In the spring the Woman's Club will set out trees, shrubs and ornamental plants and vines to add to the beauty of

these grounds, which for years were an eyesore to the residents of that section of the town.

The Commissioners will ask for a general appropriation this year of \$200.00 to improve and beautify the small squares and triangles in various sections of the town and have the same cared for after the improvements are made. They will also ask for \$100.00 to complete the grading of the Common on Union Street, so that the boys will have fairly good baseball and football grounds.

The Commissioners earnestly hope that the example set by Mr. Peirce and Mr. Torrey will be followed by other public-spirited citizens in different sections of the town, until Scituate can have a park system equal to any town of its size in the Commonwealth. The Commissioners will welcome any suggestion or honest criticism; they serve without pay and ask only the support of those interested in making Scituate the most attractive town on the South Shore.

Respectfully,

WILLIAM H. NORTH.
WALTER H. SPOONER
CLEMENT J. PROUTY.

January 17, 1909.

FIRE DEPARTMENT

SCITUATE, January 1, 1909.

To the Honorable Board of Selectmen:

GENTLEMEN: We herewith make a report of the Fire Department of Scituate for the year 1908. During the past year forest fires have been more frequent and extensive than usual, some being caused by sparks from locomotives along the line of railroad, while others were the result of carelessness. Fire has occurred in several buildings as follows:

The residence of Mr. Aaron Bates on Church Street was totally destroyed, the cause being a defective chimney.

The Fourth Cliff Hotel was totally destroyed, cause of fire unknown.

A shed belonging to Dr. Robert A. Reid at North Scituate Beach was destroyed, the fire being caused by putting hot ashes in a wooden box; the fire was extinguished before it communicated with the house by the timely arrival of the Life Saving Crew and Hose Company No. 4.

The dwelling of Mr. Henry T. Cole was slightly damaged by fire, caused by a defective flue.

Mr. Charles Copeland's residence was greatly damaged by fire and water, cause of fire not known.

The dwelling of Mrs. Caroline O. Prouty, Main Street, was badly damaged by fire, caused by a defective chimney.

During the year the Department has been furnished, in accordance with the requirements of the State law, with ladders, life net, etc.

One new hydrant has been put in during the year, making the number, at present, one hundred and nine.

By vote of the Board of Engineers, District Engineer John F. Turner was instructed to organize a hose company at Scituate Centre. We recommend that one thousand (\$1,000) dollars be raised for the maintenance of the several hose companies and the general expenses of the Department.

We also recommend the purchase of one thousand feet of good hose to replace the rotten and damaged hose among the various hose companies.

We suggest that more care be exercised in giving an alarm of fire, especially a grass fire, which could be easily extinguished without the aid of the Department.

Very respectfully yours,

A. A. SEAVERNS, *Chief.*

F. W. LITCHFIELD, *Clerk.*

F. L. YOUNG.

JOHN F. TURNER.

W. H. SPOONER.

BOARD OF HEALTH

SCITUATE, MASS., January 1, 1909.

To the Citizens of the Town:

On March, 1908, at the Annual Town Meeting, it was evidently your pleasure to re-elect Mr. Cole, and at a subsequent meeting the Board of Health was organized with the same presiding officers.

In submitting this report I have the pleasure to announce that for the past year there have been fewer cases of contagious diseases and fewer complaints made.

During the year there has been reported one case of diphtheria, that had been brought from Boston, four of scarlet fever, five of measles and two of typhoid fever. In regard to the latter, samples of water were tested from wells on one of the places, the premises inspected, and one well condemned.

We consider that at the beaches the condition has never been better, but it is the intention of the Board for another year to install the same arrangement at the Sand Hills which has so successfully worked at North Scituate and Humarock Beaches.

This consists in appointing a responsible man to take care of garbage through the summer months and enable residents to make proper disposal of the offal at a nominal expense. All not availing themselves of the privilege thus offered will be amenable to the requirements of the Board of Health.

Inspections of the milk farms in town have been made as requested by the State Board of Health, and it has been unanimously voted by this Board to require all milk dealers

to obtain a license from the Board of Health; full requirements of which will appear in the published rules and regulations that will be issued April 1, 1909.

All minor matters have been investigated and proper attention given.

Respectfully submitted,

GEORGE O. ALLEN, *Chairman.*

FREDERIC COLE.

THOMAS H. FARMER, *Secretary.*

REPORT ON HIGH SCHOOL ACCOMMODATION

To the Voters of the Town of Scituate:

Your Committee on High School Accommodations, believing that it was your desire to have the conditions investigated completely and without prejudice, approached the subject with an open mind.

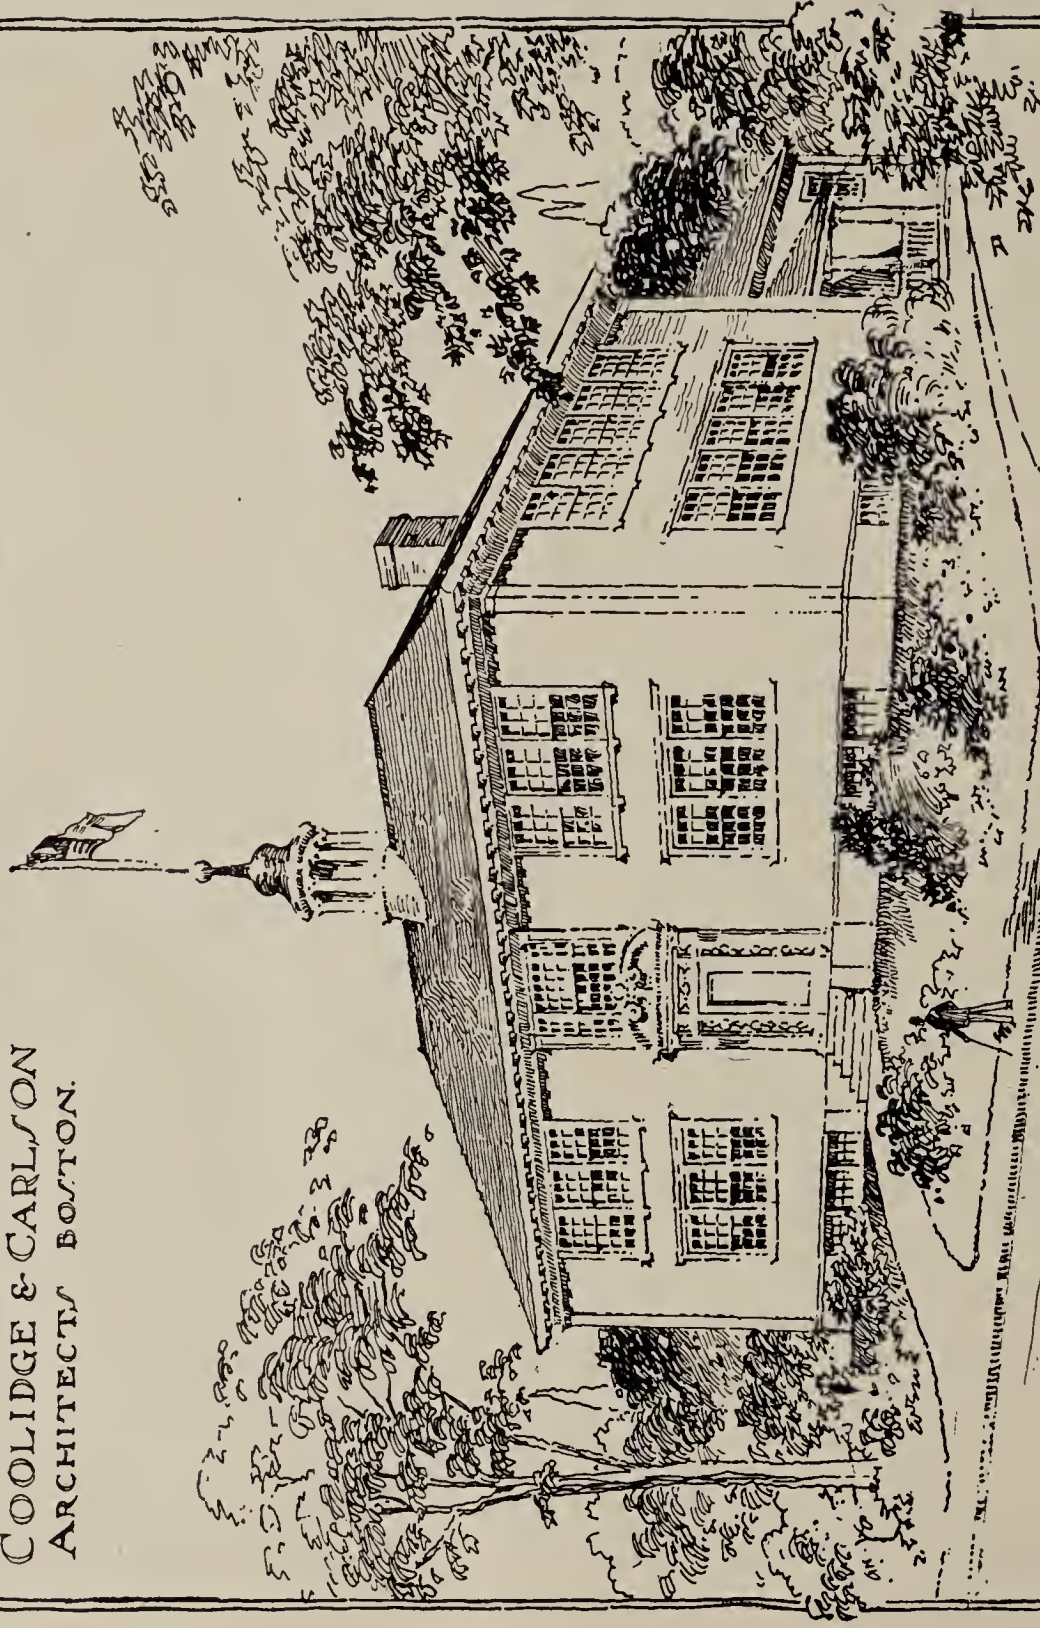

CONDITIONS

On September 22 a meeting was held at the High School-house, Mr. Scott, the principal, being present by invitation. The building was thoroughly inspected and careful notes were made upon the conditions under which the pupils are being instructed.

We found the main room inadequate, its seating capacity overtaxed. The State documents require 16 square feet of floor space for each pupil and 250 cubic feet of air space. This room furnishes less than 15 square feet of floor space, and about 170 cubic feet of air space per pupil. The aisles, which should be at least 24 inches wide, are in some cases only 18 inches wide. The amount of fresh air required by each pupil varies from 1,800 to 2,500 cubic feet per hour. This means that each pupil should be provided with at least 30 cubic feet of fresh air per minute, this amount of air having a temperature of not less than 60 degrees. The heating and ventilating system is wholly inadequate to meet these requirements, and the windows of the room must be frequently opened and some of them kept open all the time, a constant danger to pupils who are obliged to sit near them.

In the recitation-rooms the conditions are much worse. Here we found aisles only a foot wide, and rooms with no

COOLIDGE & CARLSON
ARCHITECTS BOSTON.

ADDITION TO HIGH SCHOOL AT SCITUATE MASS.

ventilation whatever, affording but 82 cubic feet of air space per pupil, just one-third of the amount which the conditions of health require. The girls' dressing-room is only 8 x 12 feet, and yet it has to be used by 47 girls. At recess or at the close of school all the girls cannot put on their wraps in that room at the same time, and in an emergency such a condition would prove fatal.

The sanitary accommodations are criminally inadequate. One toilet-room, about 3 x 4 feet, with entrance from a classroom only, lighted only by ground glass panels in the door, and practically without ventilation, has to serve as accommodation for the lady teachers and 47 girls. The recitation-room which gives entrance to this toilet is almost always occupied by both boys and girls. The outbuildings are not properly constructed and most unsanitary in arrangement and in condition.

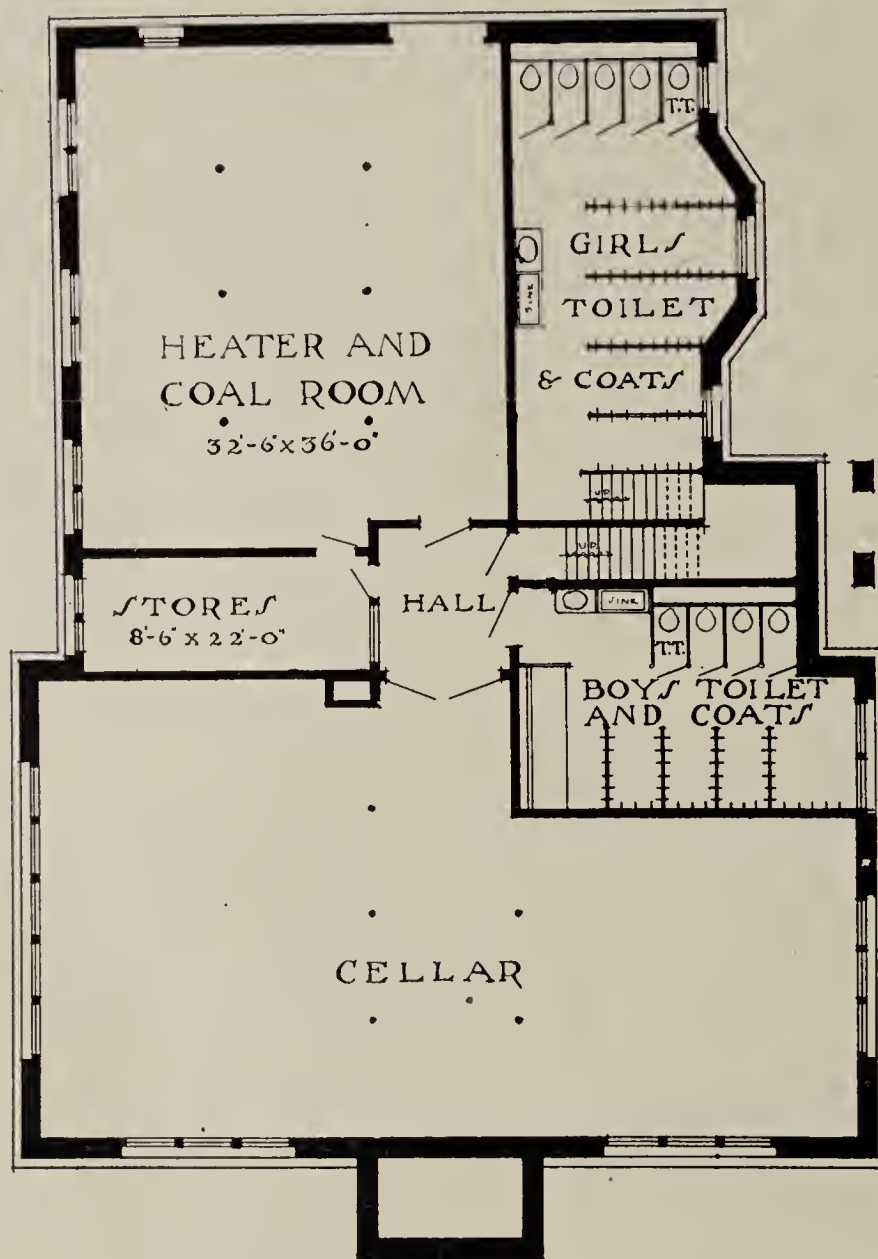

HEARINGS

On September 28 your committee held a meeting at which the Superintendent of Schools, the principal of the High School, and all the High School teachers were present. From these school officers most intimately acquainted with the needs of the school your committee learned the minimum of accommodation required for carrying on satisfactorily the courses of instruction in the school at the present time, and the probable needs of the school in the immediate future.

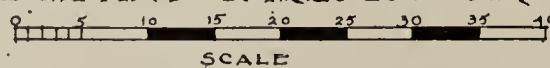

To gather information and suggestions from the citizens of every section of the town, public hearings were held as follows: at the Jenkins School, Scituate, Tuesday evening, December 1; at the residence of Mr. Peleg Ford, Greenbush, Tuesday evening, December 8; at the Peirce Memorial Library, North Scituate, Friday evening, December 18.

On Monday evening, December 21, a meeting was held at the residence of Miss Skeele for consultation with the School Committee and the Superintendent of Schools.

PLAN OF BASEMENT

ADDITION TO HIGH SCHOOL
 IN SCITUATE MASSACHUSETTS
 COOLIDGE AND CARLSON ARCHITECTS

FINDINGS

From these hearings the committee gathered many suggestions for the remodeling of the present building, and for the erection of an entirely new structure, and were able to secure a fairly correct impression of the attitude of the townspeople in general toward the High School. After giving the whole matter the most conscientious and careful consideration, your committee has come to the following conclusions:

First. That better accommodations for the High School are imperative and must be secured at the earliest possible date.

Second. That any ordinary alteration of the present building would be simply a makeshift, sure to prove again inadequate in the near future and in the long run expensive to the town.

Third. That while the majority of those interested in the welfare of the town would be glad to have a new High School building, the expenditure of thirty or forty thousand dollars for that purpose at the present time is out of the question.

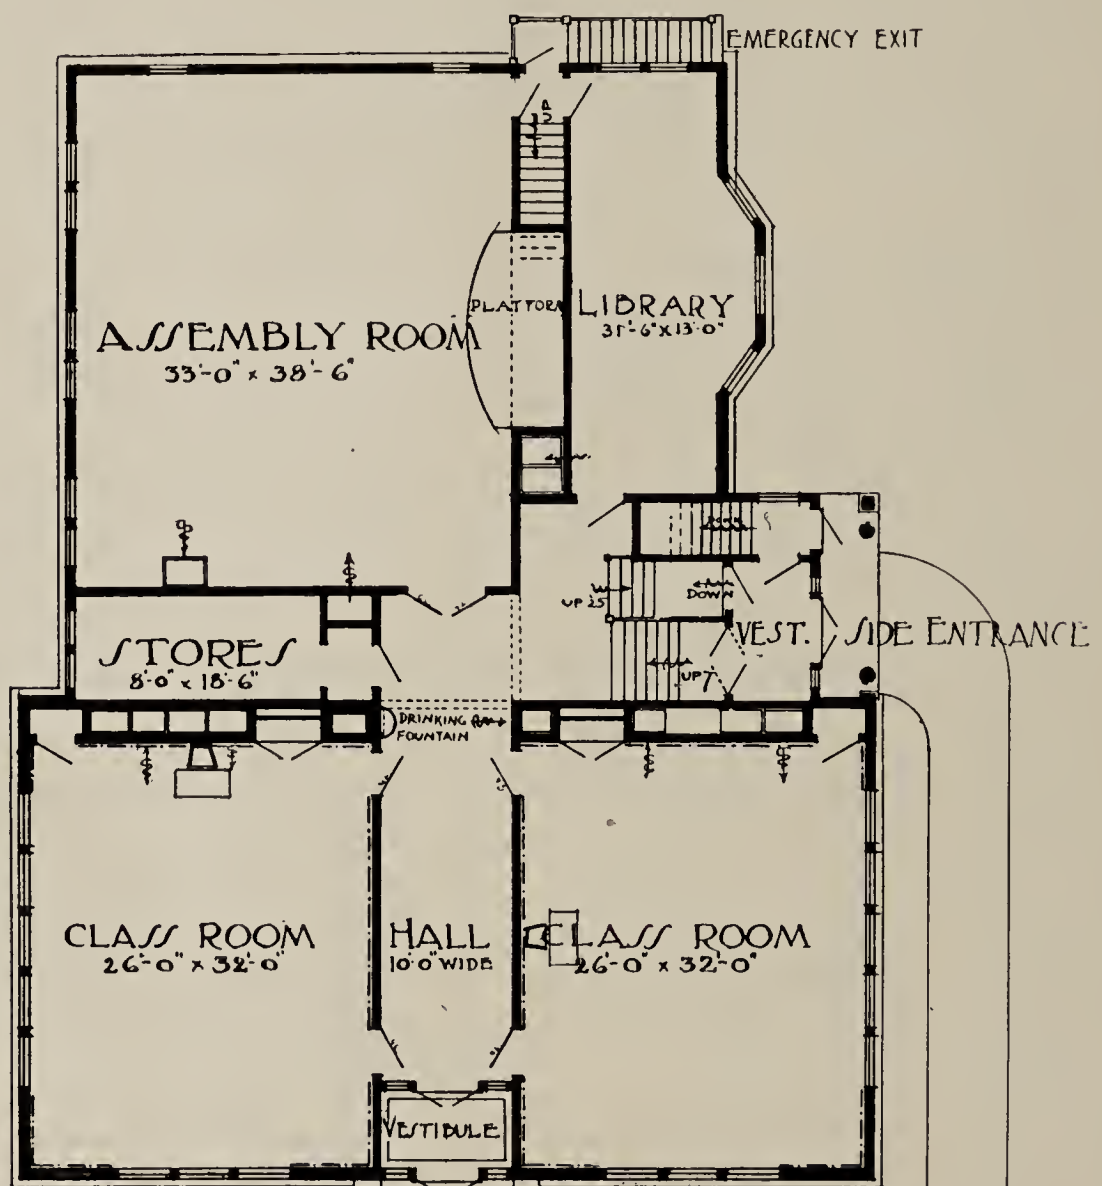

Fourth. That it will be economy for the town to remodel its present High School building so thoroughly that it shall be adequate to its purpose for at least twenty years.

Fifth. That we should provide for our young men and women a High School building having all the modern requirements of light, air, sanitary conveniences, and equipment for teaching.

Sixth. That a commodious and up-to-date building would induce a larger number of students to take advantage of its opportunities for a better education, and therefore insure to a larger number a more efficient life and to the town a more solid prosperity.

Seventh. That of all the plans suggested the only one worthy of serious consideration by those who have an eye to the future, is a compromise between an entirely new High School and a cheap and temporary alteration of present building.

· ADDITION TO HIGH SCHOOL ·
 · IN SCITUATE MASSACHUSETTS ·
 · COOLIDGE AND CARLSON ARCHITECTS ·

PLAN OF FIRST FLOOR

Your committee then secured the advice of a reputable firm of architects in the city of Boston, Messrs. Coolidge & Carlson, thoroughly familiar with schoolhouse architecture. Mr. Carlson met members of the committee at the High School building on December 14, made himself thoroughly familiar with the limitations and possibilities of the present structure, considered thoughtfully the various plans which had been suggested to the committee at the public hearings, and later submitted to your committee sketches of all these plans, together with a rough estimate of the expense of each. Your committee then selected a single plan which the architects elaborated in the form of sketches to scale. These were submitted to the Superintendent of Schools, the High School teachers, and the School Committee for final criticism and suggestion. The committee again, in consultation with the architects, revised the plans and new drawings were made. These have been reproduced and are presented herewith.

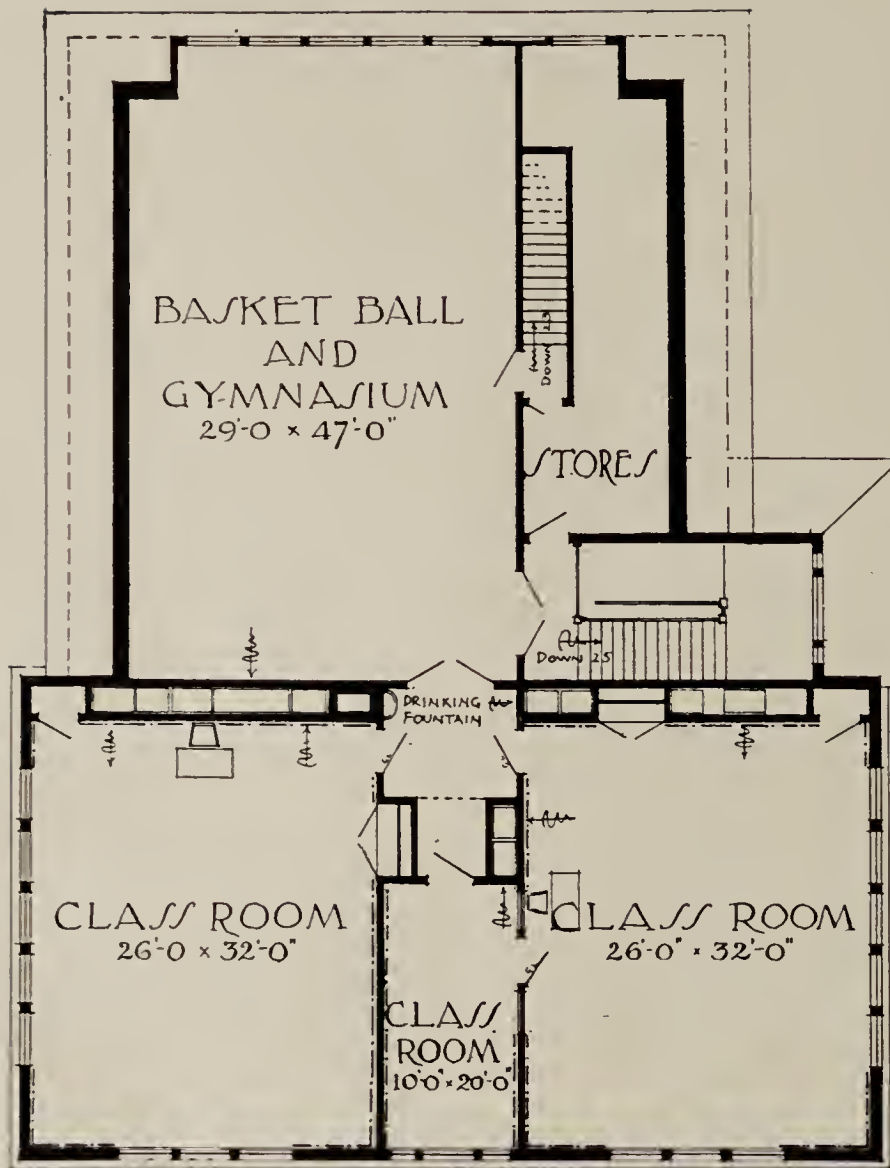

These plans provide for the utilization of the present building practically without change in its main features. This structure would be moved back from the street a sufficient distance to allow for the building of a two-story addition above the present cellar, somewhat enlarged. It will be seen that this scheme has many advantages:

First. It provides an assembly hall equipped with chairs only for the general gatherings of the school as a whole, as a quiet study room, and as a place where in stormy weather the pupils may be housed during the lunch hour, under the observation of a teacher.

Second. It provides a sufficient number of classrooms of regulation size and equipment for carrying on the work of the school.

Third. It provides for a much needed reference library and for the storing of books and supplies.

Fourth. It provides for adequate toilet accommodations under cover for both boys and girls.

PLAN OF SECOND FLOOR

NOTE. — In this plan the large, dark and useless loft now in the old building is utilized as a gymnasium and basket-ball room, thus making possible the reservation of the Town Hall for only appropriate uses. The Town Hall can then be put into good condition and so maintained.

Fifth. It provides for adequate lighting, heating and ventilating of all the rooms.

Sixth. It provides a large room which can be used for basket-ball and athletic purposes, thus freeing the neighboring Town Hall from inappropriate uses.

Seventh. It presents to the street the appearance of a new building of good proportions, handsome in detail, and highly creditable to the town.

Eighth. The cost of this modification and enlargement of the High School building would be approximately \$18,000, as against the \$30,000 or \$40,000 which an entirely new building would cost at the present time.

Your committee believes that this remodeling of the High School should be commenced at the earliest possible date under the direction of a special committee appointed by the town. Your committee recommends that the money necessary for this work be raised by taxation during a period covering perhaps the next ten years, payments being made in yearly installments. In this way, with economical expenditure in other directions, the financial burden would rest lightly and entail no unnecessary hardship on the present taxpayers.

Respectfully submitted,

WILLIAM H. NORTH,
E. PARKER WELCH,
HENRY T. BAILEY,

Special Committee on High School Accommodations.

ANNUAL REPORT

OF THE

SCHOOL COMMITTEE

FOR THE

TOWN OF SCITUATE

FOR THE YEAR ENDING
DECEMBER 31

1908

REPORT OF SCHOOL COMMITTEE

January 1, 1909.

To the Citizens of Scituate:

In presenting to you our annual report, we wish first of all to draw your attention to the fact that it is made in compliance with the laws of this State, also with a desire to present to you the business part of the school system during the past year, together with the needs of the years to come. With this introduction we trust you will carefully read the report and consider it seriously.

Before considering the present status of the schools, we desire to present to you a brief retrospect of educational development in Scituate for the last twenty years. When the system of consolidated schools was adopted, it became essential at the same time to furnish transportation to these schools; then our troubles began and our expenses increased.

Before the establishment of the Central Grammar Schools the expense per scholar in 1888, with a total attendance of 380, was \$10.60. Ten years later, 1898, with an attendance of 424, it was \$19.00. Today with a total attendance of 500, the cost per pupil is \$36.00. The average in the State is about \$38.00.

When we take into consideration the fact that the average cost of living has increased from one-third to one-half during the past ten years, it will readily account for the increase in cost of maintaining our schools. The greatest increase has been in transportation. In 1898 it cost \$841.38; in 1908, \$4,800, an increase of over five hundred per cent.

In 1898 wood was purchased as follows: oak, \$3.85; pine, \$2.95 per cord. Today we pay \$7.00 to \$7.50 for hard wood and \$9.00 to \$10.00 for pine.

Coal in 1898 cost us \$6.00 per ton; in 1908, \$6.35 to \$6.70.

Ten years ago our grade teachers' salaries averaged \$400.00; today, \$500.00.

The idea of consolidated schools is in accordance with the views of progressive educational theories, and in most cases works advantageously. In Scituate, however, we labor under peculiar disadvantages. In the first place, those who have the proper equipment to handle it are few in number, and those who might handle it cannot, on account of the amount paid per route, and the uncertainty of the continuance of the contract, — a contract awarded in the past to the lowest bidder. If the town passed a vote to allow the committee to contract at their discretion for a term of one to three years, it might result in a different state of affairs. Complaints were made that the barges were crowded and that good order was not maintained. These were investigated with the result that we found children riding who lived inside of the mile limit, contrary to the vote of the town. In order that all concerned might know the exact bounds, we had the various roads surveyed by Henry Litchfield, C.E. (one of our former High School boys). A copy of this plan and survey has been placed in the Post Offices at Scituate and North Scituate, the Superintendent's office, and one given to each of the contractors. By enforcing this mile limit we think the problem of overcrowding will be solved.

In regard to behavior in barges, we have had two complaints made during the last three years. This apparently does not indicate a very serious state of affairs, but we are led to believe that there are many petty cases of misbehavior that are not brought to our notice. We know that boys will be boys, and girls, girls; but the exuberance of youth should be curbed at certain times and places, and not allowed to run wild. We, therefore, instructed our Superintendent to visit each school-room and caution the scholars as to their behavior while in the school barges. We think that the youth of Scituate, both

male and female, on the whole compares favorably with those of the surrounding towns, and we are egotistical enough to think that in a great many cases they even excel. No parent expects his child is going to be a little angel, neither does he want him to be an "imp of Satan," but he should, and probably does, desire that his children shall grow up to be manly men and womanly women. If he desires this, does he himself set them the right example, or does he expect that the school must furnish the moral as well as the intellectual training? It is the duty of the school to *foster* the moral habits of purity, temperance, reverence, self-control, obedience and respect for the rights of others, but it is preëminently the *duty* of the parent to first instill into the mind of the child the knowledge of what is good, and the sin of that which is evil. The environment of the home determines the character and morals of the child. Of what use is it for a parent to complain that his child uses bad language, and to attribute it to the public schools, if he himself habitually uses profane and indecent language? If parents only realized their responsibility and their own needs, and would pray often and earnestly the prayer of Socrates, "Ye gods, make me beautiful within," the prayer would be answered by the very act of uttering it. The beauty of the life within would find its way into the hearts of their children and become a part of the glory of humanity.

SCHOOL ACCOMMODATION

Scituate, like all shore towns, is growing. Ten years ago we thought the Hatherly School was large enough for years to come. Today some of its rooms are crowded, and an additional room or two ought to be added. We believe though that it would be much better to consider the advisability of building a small union school, near the Conihasset Hall in the west part of the town. This could be done at an expense

of about \$7,000.00. By establishing such a school it would relieve the congestion of the Hatherly, and would do away with three barge routes, which now cost the town \$1,560.00 per annum. The children from Blossom Street, west of Main Street, Grove Street, Pincin Hill and High Streets would attend this school; certainly the fact is, that sooner or later something must be done in this direction, and it seems to us more feasible to establish such a school than to enlarge the Hatherly, and still have to pay over \$1,500.00 each year for the transportation of these scholars. The committee urges the citizens to consider which would be better, to pay this for transportation, with its attendant disadvantages, or build a good schoolhouse and let the pupils walk, and in no case would the distance exceed one and one-fourth miles.

In regard to the High School, we understand the Special Committee are submitting plans for the addition of four rooms to the present building, and the installation of the necessary plumbing and heating. After serious consideration we arrived at the conclusion that the plan they submit to you is the most feasible of those shown to us. To build a new schoolhouse is out of the question. We should set our children the example of thrift. With the debt we are now under it would not be doing them justice to impose a burden of \$40,000 to \$50,000 on their shoulders, for them to pay when they arrive at the age of maturity. We believe that this proposed addition can be built for far less money than estimated, and still at the same time furnish us with all that is needed in the way of rooms and appliances. [It is no use for the town to say the present building is adequate, for it is not; the question is simply as to what is the best return we can get for the money we can afford to pay.] We thoroughly believe in the doctrine of environment, and are of the opinion that the school buildings and surroundings tend largely to affect the life of the scholars. The physical appointments of the schools should be pleasing and uplifting. Flower beds, grass plots, scrupulous

cleanliness indoors and out, pleasing tints and harmonies of color, artistic furnishing, graceful architecture, well selected pictures, refinement of speech, dress and movements, these are the silent but all powerful harbingers of the higher life which get in their work during every hour of the day.

During the past year we have had some changes in our teaching force. Our highly esteemed and former principal, E. R. Clarke, resigned last August in order to accept the principalship of the Milford, Mass., High School. In his stead the committee elected Frank A. Scott, A.B., of Harvard, and former principal of the Holliston High School. Mr. Scott gives evidence of being in all respects a capable principal and successful teacher, a worthy successor to Mr. Clarke.

Miss Wilkins, of the Commercial Department, resigned, and Miss Florence Andrews of Mount Holyoke, '99, has been elected in her place.

The other members of the teaching staff are the same as last year, and Scituate is to be congratulated on the fact that it has such an effective corps, many of whom are native born, and some of whom have served the town for many years. The work of our Superintendent, John E. DeMeyer, continues to be effective and praiseworthy.

Those of you who read the papers and magazines are probably aware that there is considerable comment being made regarding the efficiency of the public schools of today. From the President of the United States down to the latest utterance of our newly inaugurated Governor, Eben S. Draper, all have had their say. A perusal of these published statements will show the same trend of thought in all, viz., that the education of today is not practical, that it is too academic. President Roosevelt said in his article on the "Emancipation of Education": "We have to deal now and will have to deal in the future with a nation of families on the land, and our system of public education should be so broadened in its scope as to include not merely the traditional cultural studies,

excellent and indispensable in their way, but also instruction relative to the farm, the trades and the home. Our immediate purpose is to take the first step in providing for the ninety-five per cent who are not now trained for a vocation, advantages corresponding to those enjoyed by the relatively few who are trained in the professional and technical schools. Industrial training, training which will fit a girl to do work in the home, which will fit a boy to work in the shop if in a city, to work on a farm if in the country, is the most important of all training, aside from that which develops character; and it is a grave reproach to us as a nation that we have permitted our training to lead the children away from the farm and shop, instead of toward them." In other words, "the school system should be aimed primarily to fit the scholar for actual life, rather than for a university."

It is undoubtedly true that the scholar of today is not competent or able to earn his living when he graduates from the High School. The training he has received has been purely an academic one, consequently all he can do is to become an errand boy or clerk, unless he be one of the few favored ones whose parents can send him to college, or he has the moral stamina and physical backbone to make his own way. As the result of the present awakening, and the tremendous interest that is being shown by the American people in regard to the question of education, important changes are sure to be made in public school courses in the near future. It may not be this year or even next, but sooner or later they are bound to come.

Meanwhile we would say to our fellow citizens that because of these sentiments they should not imagine the Scituate schools have been tried and found wanting, for it is not so. They do not differ in kind from schools elsewhere.

"It is always true, that new times demand new measures and new men.

"The world advances, and in time outgrows the thoughts that in our fathers' day were best."

We think that when comparison is made forty years hence, it will be found that the children of our day were in reality better educated than those of forty years ago.

Before concluding we would call your attention to Superintendent DeMeyer's report, which we consider exceptionally good. We would ask that you give those parts relative to statistics, and the problem of transportation, your thoughtful consideration, as they undoubtedly will have great weight in deciding our policy for the ensuing year, and possibly years to come.

In closing we wish to thank the citizens for the continuation of the interest they have manifested for so many years, and to express the hope that this new year will be one of marked improvement, a red-letter year in the annals of education in Scituate. If the past has not fully met your expectations, we would quote to you these words of Clough:

"Go with the Sun and the Stars,
And yet evermore in thy spirit
Say to thyself, It is good.
Yet there is better than it,
This I see is not all, and this that I do is but little,
Nevertheless it is good, though there be better than it." •

Respectfully submitted,

PETER W. SHARP.

JULIA E. WEBB.

CLARA M. SKEELE.

Estimated appropriation for support of schools for 1909,
\$13,500.

This does not include transportation.

CORPS OF TEACHERS

NAME, SCHOOL, ADDRESS

Mr. Frank A. Scott, A.B., principal High School, Egypt.

Louise Adams, A.B., assistant, High School, North Scituate.

Florence Andrews, A.B., Commercial Department, High School, Scituate Centre.

Grace B. Simmons, A.B., principal Hatherly School, North Scituate.

Ella S. Knight, grades sixth and seventh, Hatherly School, North Scituate.

Lilliete C. Jenkins, grades fourth and fifth, Hatherly School, Scituate.

Sarah M. Kane, grades 2d and 3d, Hatherly School, Greenbush.

Eleanor E. Curtis, grade one, Hatherly School, Scituate.

Lois Thompson, principal Jenkins School, Egypt.

Nellie E. Adams, grades sixth and seventh, Jenkins School, Scituate.

Josephine J. Barry, grades fourth and fifth, Jenkins School, Scituate.

E. Gertrude Gardner, grades 2d and 3d, Jenkins School, Scituate.

Mary E. Gillis, grade one, Jenkins School, Scituate.

Josephine G. Ward, High Street School, Scituate.

Lillie C. Stoddard, music, North Scituate.

Harriet J. Ford, drawing, Millbrook.

SUPERINTENDENT'S REPORT

To the School Committee:

I hereby submit for your consideration my third annual report.

The year has been one of very material progress along many lines and has opened up new problems which I shall discuss in this report, together with such suggestions as seem to me to be advisable.

TEACHERS

We have been very fortunate in retaining our grade teachers. The only change in the grades during the past year was caused by the resignation of Miss Nellie Adams, grades six and seven, at the Jenkins School. Miss Lena Sewall finished the year, and in September we were fortunate enough to secure Miss Adams again. In the High School conditions have been different. Miss Marion White, of the Commercial Department, resigned in June, and she was succeeded by Miss Lillian Wilkins, Vassar College. During the summer vacation Mr. Edward R. Clarke resigned as principal to accept the principalship of the Milford High School. Mr. Clarke had served efficiently for a number of years, and under his leadership the school made very material progress, not only in number of pupils, but in the efficiency of the work done. Mr. Clarke deserves the commendation and appreciation of his townspeople.

Mr. Frank Arthur Scott, Harvard, 1903, was elected to succeed Mr. Clarke. At the close of the fall term Miss Wilkins resigned, and Miss Florence Andrews, Mt. Holyoke, 1899, was elected to succeed her as commercial instructor.

GENERAL CONDITIONS

There is nothing new to report concerning the usual routine work of the schools. The work in general is and always will be much the same year after year. The problem that always confronts us is how to obtain more satisfactory results in the various departments. We have not arrived at that degree of perfection which will allow us to cease, even for a moment, in our efforts to improve our system of education.

There are so many conditions that affect the general work of the grades that it is necessary to be always on the alert, and even with constant vigilance it is sometimes impossible to avoid conditions which prove detrimental to the schools, such as changes of teachers, sickness, etc. During the past year we have been fortunate in having no serious drawbacks. The work has moved steadily forward under the direction of the same competent teachers; and while I do not feel that the work has reached the standard of excellence we are striving for, yet I do feel that we have made decided progress in that direction. While conditions have, in the main, been favorable, there are circumstances that prove a handicap to our work. Certain rooms are overcrowded, so much so as to seriously impair the standard of work done.

The fourth and fifth grade room in the Hatherly School has had as many as fifty-seven pupils at one time during the past year. There are now fifty-two pupils in that room. It is possible for a good teacher to *handle* that number, but she can hardly be expected to do *excellent* work with so many. This overcrowded condition does not confine itself to the same room year after year, but occurs in various rooms.

A *fair* standard of work is not satisfactory, and when a child is obliged to spend two years in an overcrowded room, as our pupils are, owing to the fact that we have two grades in each room, it proves a serious drawback to him, for under

such conditions he can hardly get the best possible instruction. Superintendent Cooley of Chicago, in a recent report, said that the overcrowding of the class-rooms is "wasteful of the lives and efforts of the children." "Under existing circumstances," he says, "it is impossible for the teacher to give special attention to the personal peculiarities of the pupils, and the deplorable insufficiency of personal attention which the pupils receive from their teachers has forced a large number of children out of schools into workshops and factories." This is true in all towns where similar conditions exist. The percentage of boys and girls who fail to graduate from our ninth grade is too large. If the teachers could give such pupils more personal attention that percentage could be lessened.

REMEDY

The number of pupils in the west part of the town has increased materially during the past two or three years, and the question of transportation has become a serious one. We are maintaining a school at High Street in which are grades one, two and three. This school is situated very near the extreme limit of the school population of the town and now accommodates only eighteen pupils.

It seems to me that there are three possible solutions to this problem. First, to enlarge the Hatherly building by putting another room over the present first grade room. That would make it possible to relieve the crowded conditions in the Hatherly School, but would not relieve the barges. Second, to put the above-mentioned addition on Hatherly building and close the High Street School and transport all pupils. That would mean an extra barge, but the pupils could be so divided as to relieve the present overcrowded condition both in the barges and the Hatherly School. The objection to this plan is the undesirability of transporting young pupils.

The third plan, and the one which seems to me by far the best of the three, is to move the High Street School towards North Scituate and re-locate it near the present location of Conohasset Hall, and add another room. It would then accommodate a much larger number of pupils and would obviate both the transportation question and that of the overflow at the Hatherly School. The objection to transporting young boys and girls would then be overcome, and I believe this plan would prove fully as economical and much more satisfactory to all concerned.

HIGH SCHOOL

At a special meeting last May the town appointed a committee to investigate and report on conditions relative to the High School building. In consideration of the fact that that committee will make their report at this time I shall make no comments on the subject. Should, however, any one care to know my position in the matter, I would refer him to my report of last year, and would add that conditions have grown steadily worse, owing to the increased numbers at the High School.

During the three years that I have had supervision over the High School it has grown from sixty-two pupils until now there are eighty-eight. One teacher was added the first year of my official connection with the school, and at the same time a Commercial Department was added to the curriculum. The commercial teacher has been, and is now, obliged to teach other branches, thus putting much time and attention on subjects foreign to her department. This plan worked very well so long as the Commercial Department was in its infancy, so to speak, but now it has grown to such proportions that it needs the entire time of one teacher.

The classical subjects, even with the present arrangement, are suffering because of lack of time. Should this extra

work, now done by the commercial teacher, be dispensed with, it would be absolutely necessary to give up some of the branches now taught. The school has grown beyond a three-teacher system. It must have at least four, if it is to continue to do good work.

I hear the argument that we had a good school with only two teachers, and why can't we now? That argument is too absurd to receive consideration even for a moment. It would be just as good logic to say that Scituate once got on without a railroad, and why can't she now? The conditions of society change so rapidly that the luxuries of today frequently become the necessities of tomorrow. We must not judge the needs of today by those of the past, but rather by the demands of the present and even of the future so far as we are able to anticipate them.

I believe that the cost of the extra teacher can be saved out of the present cost of transportation without impairing our school system. At present we are paying \$16.00 per week extra for High School transportation: \$4.00 to transport from the Hatherly School to the High School and \$12.00 to transport from the Harbor to the High School. I would suggest that those barges run only ten weeks, beginning at the opening of the winter term, and that during the rest of the year the pupils living in the north and west parts of the town be transported as far as the Hatherly School and those living at the south and east parts of the town be transported to the Jenkins School. High School boys and girls are, it seems to me, perfectly able to walk from either the Hatherly or Jenkins School to the High. The money saved in this way would practically provide for another teacher. Our High School boys and girls need better educational facilities more than they need free rides.

The question arises as to the possibility of reducing the number in the High School if we compel them to walk even the distance I have mentioned. I know of one case when it

would seem to me to be a hardship, but aside from that case I feel that boys and girls who have arrived at High School age and won't walk a mile or even a mile and a half to get an education are better out of school than in it, for as students they can neither be a credit to themselves, their parents, nor the school. The sooner such are put to work at some legitimate occupation the better, for they are obviously wasting their time in the public High School. The fundamental element necessary for a boy or girl to get a higher education is a desire for knowledge, and the boy or girl who refuses to make any physical exertion or sacrifice certainly hasn't any very deeply rooted desire for special training.

A glance at the record of last year's class at the High School will convince any one of the imperative need of placing our school on a par with other similar schools. Out of a class of thirteen, six have gone on to higher institutions, one to a technical school; two to college, two to normal schools and one to a business college. We can no longer claim that our pupils finish their education at the High School; and it becomes the duty of the town to furnish the best possible instruction to those who care to go on. We are especially weak in our science course, inasmuch as we have no laboratory and haven't proper apparatus to do the experimental work that should be done. When we consider that science forms a very large part of the basis for higher education, and that the demands of all higher institutions along this line are increasing, we can realize under what a serious handicap our High School is laboring.

PROBLEMS

The problem of education is an ever-present one, and we have by no means arrived at a satisfactory solution. That many things have and are still being done under the name of education, which future experience will prove to be unwise,

there is little doubt. That, however, does not prove that those same unwise methods were not born of good and wise motives. In the ever-changing conditions of man the right of yesterday frequently becomes the wrong of today. Especially is this true of American society. Dr. C. Hanford Henderson says: "Modern life is quite unlike anything that has ever gone before it. The modern man is a totally new product; and not only is he new, but he is unstable. He is still in the making. No sooner have we analyzed him and catalogued his qualities, than he changes into something else and our analysis is quite without value. One need not marvel then that education, which seeks to offer a process by which social ideals are to be realized, should constantly lag behind, should constantly wear that belated look which makes our so-called practical friends so impatient of it and its votaries."

The attempt to discredit the present school system and to prove that schools are not as good as they were forty years ago has proven merely that the modern schools are still in the process of evolution; that we have not, nor cannot arrive at the ultimate solution of the problem until modern society ceases to change with that rapidity that has characterized it in the past.

THE TEST

Comparative examinations prove conclusively that the schools of today are superior to those of half a century ago. The partisans of the "old schools" are begging the question; the real issue is, I believe, are we meeting the *needs of today*? The demands placed upon the youths of today are far greater than those of fifty years ago, and the public school must meet those increased demands or accept the verdict of inefficiency. The ideals of American education

have changed since the days of our forefathers; today the predominating idea is utilitarianism. The public places more stress on the practical value of a subject than upon its cultural value. The parent asks, "Will this or that subject be of practical value to my boy?" This is not the "fad" of a day, but is the natural outgrowth of modern society and must be treated as such. It is an undeniable fact that the present methods are inadequate to meet the needs of today.

The result of this condition is the plea for industrial education throughout the whole country. Our boys and girls leave schools and go out into the world, and with the exception of an occasional graduate from the commercial course at the High School there is no occupation for which they are trained. Rural communities are fitting their pupils for clerks and bookkeepers, and in order to get employment they must leave the country town and go to the city. Is it any wonder that the youths of the rural town emigrate to the city? They are obliged to. As Superintendent Record of Abington says: "They are unskilled with respect to all industries, hence are of but little value either to themselves, to their employers or to the community."

I feel that Scituate should not wait longer before establishing a course in manual training. It should be added for its educational value, and especially because it fills an imperative need of the times. With an enlarged teaching force at the High School it will be possible, in due course of time, to introduce other branches of industrial education without great additional expense. I make this recommendation, not with the idea that it will remove all present defects, but with confidence that it will be a decided step in the right direction.

I shall give in an appendix to this report some statistics to which I would call your attention, as some of them show very clearly the growth of our schools, especially the High School. I would also call your attention to the report of

the principal of the High School and those of the special teachers.

In conclusion, allow me to express my appreciation of the cordial support I have received from all with whom I have been associated in my work.

Respectfully submitted,

JOHN E. DEMEYER.

HIGH SCHOOL REPORT

To the Superintendent of Schools:

In accordance with custom, I beg leave to submit a report as to the condition and needs of the High School. Our school opened on September 9 with an enrollment of 83 pupils, which increased to 88 in November. At the present time there are 87 pupils in the school, 35 boys and 54 girls. There has been an increase of 16 pupils over the last year's enrollment, or a gain of 22.2 per cent. The seating of this number has been a problem. A temporary solution was found by ordering twenty-one new desks. Eleven of these were placed in Miss Adams's room and occupied by the Senior Class. The rest of the school, 77 in number, have been seated in the main room, which should not under normal conditions hold more than 60.

During the Fall Term the Commercial Department was in charge of Miss Lillian G. Wilkins of Arlington, Mass., a graduate of Vassar College and a post-graduate student at Simmons College. Miss Wilkins resigned at the end of the term and was succeeded by Miss Florence M. Andrews of Lynn, Mass., a graduate of Mount Holyoke College, who has taught in Maine, New Hampshire and Massachusetts.

Last year the Scituate High School was granted the privilege of sending pupils to Worcester Polytechnic Institute on the certificate of the principal. The class of 1908 sent one member to that institution and five others to other colleges and higher schools. The list is as follows:

Mr. Paul F. Otis, Williams College, Williamstown, Mass.; Mr. Frank W. Clapp, Worcester Polytechnic Institute, Worcester, Mass.; Miss Katherine Hill, Burdett's Business College, Boston, Mass.; Miss Harriet E. Gannett, Boston

University, Boston, Mass.; Miss Elizabeth H. Litchfield, Bridgewater Normal School, Bridgewater, Mass., and Miss Agnes E. Flanders, Hyannis Normal School, Hyannis, Mass. The showing of this class, together with the record of previous classes and the number of pupils in school now who hope to go to higher schools, justifies the expenditure of more money for teachers to bring this school fully up to the standard of Massachusetts high schools.

We are planning to have during the year a number of addresses at the High School by prominent citizens of Scituate and other places. This course was admirably begun with a lecture by Professor Henry T. Bailey on "Recent Discoveries in Ancient Greece." If possible we shall have one of these addresses each month, at which the parents and public will be cordially welcomed.

Having noticed some of the conditions of our work, I beg leave to call your attention to some of our most pressing needs.

The need of an addition to our building is now evident to all, and the committee appointed by the town to suggest a plan for such an addition has in hand an excellent one that will meet the conditions satisfactorily. Some of the most urgent needs that it will satisfy may be stated as follows: it will give us a good laboratory for chemical and physical science, and will thus put Scituate on a par with other towns which are able to fit students for college and for practical life in those subjects; it will provide good toilet facilities, and thus solve that much vexed question; it will give us a room to store our books and supplies in a systematic and careful way, instead of by the present chaotic method, a room that can also be used as a library where pupils may have access to the best books on any subject they may be studying; it will also give us a room that can be used as an assembly hall and gymnasium combined, and will make it unnecessary to ask for the use of the Town Hall in the future for that purpose.

Our next greatest need is in the size of our teaching force.

We are trying to teach almost ninety pupils with the same force that many towns provide for forty or sixty students. In order to teach this number of pupils well we need at least one more teacher to take the English and History. It has been very difficult to obtain teachers who are willing to teach commercial work together with English and History, and this difficulty will increase rather than diminish.

We also need a much larger reference library. At present we have no encyclopedia that is up to date; the one in our school is thirty or forty years old, and therefore comparatively useless in the study of the sciences. Perhaps this lack of books of reference can be partially filled by private donations.

The course of study needs revision for the sake of economy, efficiency and justice to pupils taking the different courses. There should be a definite amount of work required of all pupils and a larger freedom of election and substitution. In our school, as in all others, there are some who are not adapted to many of the school subjects and who therefore take little interest in and expend little effort on them. In past experience I have found that this class of pupils have been materially benefited by some sort of manual work. They usually take naturally to it, do it, and this success in one subject reacts upon the rest and produces a general toning up of all the school work. This is a matter worthy of careful consideration.

I wish to express my thanks to the committee and yourself for your help and support in our work.

Respectfully yours,

FRANK ARTHUR SCOTT,

Principal.

EGYPT, MASS., January 9, 1909.

DRAWING TEACHER'S REPORT

To the Superintendent of Schools:

Another year has passed. The drawing goes on very regularly and continues to improve. With nature study from flowers, fruits and berries in the fall, followed by applied design before the holidays, the pupils find practical application of their previous studies.

During the Winter Term all through the schools we are to have mechanical drawing and in some classes construction work. This will be very practical and interesting, especially to the boys, and a kind of drawing which any one can do with the exercise of a little thought and care.

At the Jenkins School the exhibition room has proved a great incentive to good work; the drawing all through the building has much improved. It is esteemed an honor to have one's work exhibited, and a privilege to visit the room. At the Hatherly School the accommodations for exhibition purposes are not as good, but the pupils are interested and we do the best we can to show the best work.

Two of our Scituate young people are studying at the Normal Art School; both have artistic taste and ability. I trust later on there will be others to take a course of study there.

Thanking through you the School Committee and the teachers for their coöperation and interest,

Very respectfully,

HARRIET J. FORD.

REPORT OF THE MUSIC TEACHER

To the Superintendent of Schools:

It becomes my pleasure to once more make you a report on music in the schools of Scituate.

When one considers the difference in conditions in the rooms from one year to another, it seems a little difficult to speak of the work of part of one school year and part of the next, without making contradictions.

We can take, as an instance, the singing in the High School. Last year the pupils accomplished results that made us all justly proud of them. Even at the graduating exercises, when their regular conductor was absent, they sang their numbers very creditably; but at the beginning of the present year they found they had lost a large force, and in readjusting themselves seemed to be accomplishing very little. However, we all feel that there is still a good amount of talent, and that when they regain poise we cannot help being charmed.

This condition of change necessarily affects every room to a certain extent, but not in a marked degree except in one or two rooms. If for any reason the pupils become discouraged in their work, there seems to be no better way than to promptly take a step backward, and allow them to advance with more confidence. To be exact, we have taken only one small step backward, while in two other instances we have only taken a slower step forward.

Through the kindness of the School Board we now have everything to help us to do excellent work; our books are of the newest and most generally accepted course, and unanimously enjoyed by teachers and pupils.

The teachers agree in feeling that there now is no reason

why classes should not advance steadily, especially as some of the work requires no more talent than a speaking voice.

In passing it seems only fair to speak of the *most* excellent work done in the eighth and ninth grades in the Hatherly building, — the eighth leading the ninth. Even in the first term several difficult arias arranged for three parts have been *thoroughly* mastered; this success is partly due to an unusual amount of leading voices, and partly to a noble determination to work the difficult passages out at all costs.

And when I think of each school in turn, I remember some specially good lessons, or some difficult thing conquered, which shows much patient work on the part of the teachers, and feel that I would like to speak of all, but as that is impossible, I will just express my most sincere thanks to each teacher for the earnest assistance given me, and for the delightful periods spent with her pupils.

Respectfully submitted,

LILLIE C. STODDARD.

NORTH SCITUATE, December 31, 1908.

SCHOOL PHYSICIAN'S REPORT

To the Scituate School Committee:

I take pleasure in submitting for your consideration my second annual report as School Physician. I have conducted my work along the same lines as last year, namely, inspecting the different buildings with reference to sanitary conditions and ventilation. I have examined the pupils in the various rooms from time to time. I have answered all calls from the teachers to investigate the suspected cases of contagious diseases. As hitherto it has been merely my function to debar pupils from school when their presence might prove a menace to others, and to notify parents in cases where medical attendance was desirable.

SCHOOL BUILDINGS

The Hatherly, Jenkins and High Street buildings are in the same excellent sanitary condition that I reported last year. I do not feel that it is necessary for me to comment on the sanitary conditions at the High School. It has been brought very forcibly to the minds of the public in the past, and the town has appointed a committee to investigate the matter. We have been very fortunate in having no epidemics of a serious nature. There have been a few isolated cases of measles and chicken pox, but these did not become general enough to seriously affect the schools.

In my examination of the pupils I have found a large number with enlarged tonsils and adenoid growths. While it is true that these growths are very common among children, so common indeed that parents are liable to overlook them,

thinking the child will outgrow them, it is true that the growths themselves will partially disappear, but the effect will remain with the child through life. In each instance where I have found such troubles I have notified the parents, and advised medical attention. Some parents have employed a physician, but too many have neglected to attend to the matter, and at my next examination I found the same unhealthy condition. Such neglect on the part of parents is very serious in its consequences to the child. I have also found that a very large percentage of the pupils have not had proper care taken of their teeth. I have found a great many badly decayed teeth, which keep the mouth in a decidedly unhealthy condition and make the child more susceptible to other diseases, and make their presence obnoxious to others, inasmuch as they give them a fetid breath. There are many other cases of unclean mouths which could be easily remedied by a consistent use of a toothbrush. In conclusion, I wish to thank the committee and teachers for their cordial coöperation.

Respectfully submitted,

WILLIAM P. GROVESTEIN,

School Physician.

REPORT OF THE TRUANT OFFICER

To the School Committee:

Whole number of cases brought to my notice four; two of sickness and two actual cases of truancy.

Respectfully submitted

JOHN F. TURNER,
Truant Officer for the Town of Scituate, 1908.

APPENDIX

STATISTICS CONCERNING SCHOOLS IN GENERAL

Population of Scituate (Census 1905)	2,597
Number of boys between the ages of 5–15 years (1908)	224
Number of boys between the ages of 5–15 years (1907)	216
Number of girls between the ages of 5–15 years (1908)	209
Number of girls between the ages of 5–15 years (1907)	211
Number of boys between the ages of 7–14 years (1908)	186
Number of boys between the ages of 7–14 years (1907)	185
Number of girls between the ages of 7–14 years (1908)	169
Number of girls between the ages of 7–14 years (1907)	165
Total membership for the year ending June 30, 1908	497
Number attending school during year under 5 years of age	2
Number attending school during year over 15 years of age	76
Number attending school during year between the ages of 7–14 years	337
Average membership	453.73
Average attendance	419.22
Percentage of attendance to membership	90.2
Number of schools	4
Number of teachers (regular)	14
Number of teachers who have graduated from or attended college or normal schools	9
Number of different pupils at High School during year ending June 30, 1908	77

Number of different pupils at High School, September, 1908	88
Number of pupils graduated from High School, 1908 .	13
Number admitted to freshman class September, 1908 .	36
Number of graduates from High School who have gone to higher institutions	6
Number graduated from ninth grade, June, 1908 . .	35
Number of graduates from grammar grades who went to Scituate High School	31
Number who are attending other High Schools . . .	2
Number who have not entered High School here or elsewhere	2

DISTRIBUTION OF PUPILS

The following table shows how the pupils are distributed at the time of this report:

Grades . .	I	II	III	IV	V	VI	VII	VIII	IX	X	XI	XII	XIII
NAME													
Jenkins . .	20	27	15	22	26	27	20	22	18	..	..	..	..
Hatherly .	29	28	14	27	25	27	15	14	17	..	..	..	..
High Street.	4	6	8	..	..	..	..	..	..	..	..	..	..
High	..	..	..	..	..	..	..	..	..	36	26	15	11

The per cent of High School pupils to the entire number of pupils is 17.6; for the entire State, at the time of the last State report, it was 9.6.

TABLE OF ATTENDANCE

(Year ending June 30, 1908)

NAME	AVERAGE MEMBERSHIP	AVERAGE ATTENDANCE	PER CENT OF ATTENDANCE TO MEMBERSHIP
High	71	67	94
Jenkins . . .	187.13	171.72	91.9
Hatherly . .	176.5	163.2	91.4
High Street .	19	17.3	91.5

EYE AND EAR TESTS

Whole number of pupils tested	458
Number found defective in eyesight	53
Number found defective in hearing	17
Number of parents notified	68

ROLL OF HONOR

1907-1908

NOT ABSENT DURING THE YEAR, TWENTY:

Roland Turner

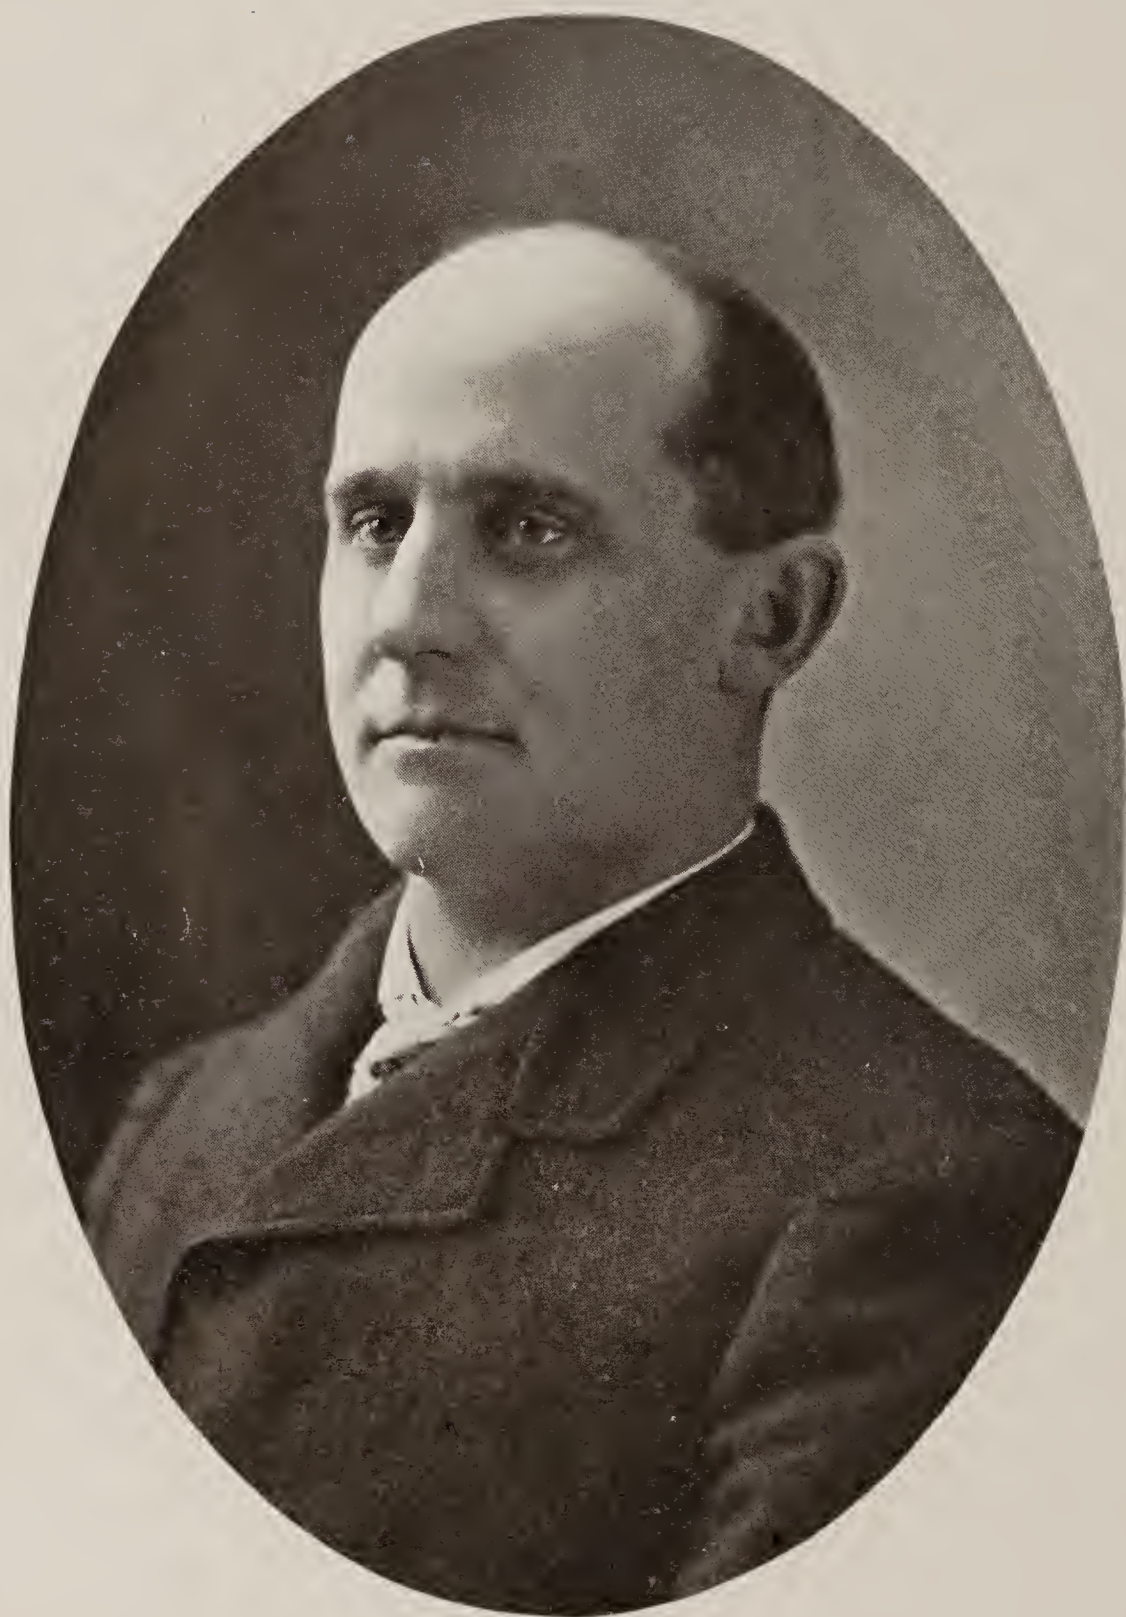

MR. TURNER WAS BORN IN SOUTH SCITUATE, NOW NORWELL, SEPTEMBER 29, 1820, AND DIED IN SCITUATE, AUGUST 23, 1909.

AS A YOUNG MAN HE FOLLOWED VARIOUS OCCUPATIONS, BUT FOR FIFTY-FIVE YEARS, TO 1908, WAS ENGAGED IN THE DRY GOODS BUSINESS.

MR. TURNER SERVED THE TOWN CONTINUOUSLY FROM 1854 TO 1902 (WITH THE EXCEPTION OF 1901) AS TAX COLLECTOR AND TREASURER, AND IN 1863 WAS ELECTED SELECTMAN AND ASSESSOR, SERVING FOUR YEARS IN THAT OFFICE.

HE ALSO REPRESENTED HIS DISTRICT IN THE MASSACHUSETTS LEGISLATURE DURING 1887.

MR. TURNER WAS A GOOD CITIZEN AND FAITHFUL TOWN OFFICER, ALWAYS INTERESTED IN THE WELFARE OF SCITUATE.

Ernest Linwood Bonney

ERNEST LINWOOD BONNEY WAS BORN IN SCITUATE, JUNE 23, 1864, AND DIED MAY 7, 1909.

MR. BONNEY WAS EDUCATED IN THE PUBLIC SCHOOLS OF HIS NATIVE TOWN, AND, AS THE SUCCESSOR OF HIS FATHER, CONDUCTED A PROSPEROUS BUSINESS AT THE HARBOR FOR MANY YEARS.

HE WAS FIRST ELECTED TREASURER OF THE TOWN IN 1902, AND SERVED CONTINUOUSLY IN THAT OFFICE UNTIL HIS DEATH.

HE ALSO REPRESENTED THE SECOND PLYMOUTH DISTRICT IN THE MASSACHUSETTS LEGISLATURE DURING THE YEARS 1903 AND 1904.

A MAN OF INTEGRITY, UNIFORMLY GENIAL, A TRUE FRIEND, A FAITHFUL OFFICER AND A CITIZEN WHOSE INFLUENCE WAS USED FOR THE BETTERMENT OF THE TOWN.

TOWN OFFICERS, 1909

Town Clerk. — JETSON WADE.

Town Treasurer. — ERNEST L. BONNEY to May 1. JOHN D. FERGUSON, *pro tempore*.

Selectmen, Assessors, and Overseers of the Poor. — CHARLES H. WATERMAN, E. PARKER WELCH, JAMES W. TURNER.

School Committee. — JULIA E. WEBB, CLARA M. SKEELE, PETER W. SHARP.

Superintendent of Schools. — JOHN E. DEMEYER, WILLIAM E. CHAFFIN.

Board of Health. — THOMAS H. FARMER, FRED. COLE, H. F. CLEVERLY, M.D.

Highway Surveyor. — HENRY T. COLE.

Park Commissioners. — WILLIAM H. NORTH, CLEMENT J. PROUTY, WALTER H. SPOONER.

Board of Fire Engineers. — Chief, JOHN F. TURNER.

District Engineers. — District No. 1, FRANK L. YOUNG; District No. 2, FRANK W. LITCHFIELD; District No. 3, ERNEST R. SEAVERNS; District No. 4, WALTER H. SPOONER; District No. 5, JOHN F. TURNER.

Registrars of Voters. — CHARLES F. CLAPP, CHARLES T. CHUBUCK, WALTER J. STODDARD; JETSON WADE, Clerk.

Constables. — JOHN F. TURNER, WILLIAM E. SUPPLE, CHARLES M. LITCHFIELD.

Tree Warden. — PERCIVAL S. BROWN.

Moth Superintendent. — PERCIVAL S. BROWN.

Auditor. — CHARLES W. PEARE.

Town Physician. — T. BRANCH ALEXANDER, M.D.

Keeper of the Lockup. — CALEB W. PROUTY.

Inspector of Cattle. — WILLIAM W. WATERMAN.

Sealer of Weights and Measures. — WILLIAM P. RICHARDSON.

TO THE INHABITANTS OF THE TOWN OF SCITUATE:

The Selectmen, Assessors, and Overseers of the Poor submit the following report for the year 1909:

The town has been unfortunate the past year in having to make several settlements due to accidents on highways.

The case of *Fish v. Scituate* was tried before the Superior Court at Plymouth; the jury rendering a verdict in favor of Fish.

The claim of Howard Damon of Marshfield was settled by the Selectmen in preference to having the case tried in court.

William H. Wade was paid for injuries received while in the employ of the Highway Surveyor. While in this case the town was not legally responsible, it was considered just by the Selectmen and Surveyor to pay him in part for expenses incurred.

The petition to the Legislature for a relocation of the boundary line between Scituate and Cohasset was, we hope, settled for years to come.

Scituate, during the summer months, has probably a population of six or seven thousand people, and emergencies are liable to arise that would call for prompt attention by the police.

An orderly town, such as the Selectmen have endeavored to maintain, should be the aim of all, and the Selectmen feel that better results could be accomplished by increasing the appropriation for Police and Constables.

The roads of Scituate are superior to those of many surrounding towns, as is shown by the increased amount of travel into and through the town. The State Highway Commissioners, after receiving a petition from the Selectmen, made an allotment for Scituate, and have, including this

year, spent about \$37,000.00 and built about five miles of State road to date. Added to what the town has built makes in all about twelve miles of macadam roads in Scituate.

It would seem advisable to investigate other methods of road building than stone macadam. Automobile travel is disastrous to same, unless some preservative is used to prevent the wear, and the future expense of maintenance is bound to increase yearly.

Owing to the unusually severe storms this winter, great damage has been done to the sea walls and beach roads.

It will be necessary to rebuild both walls and roads in different localities at considerable expense to the town, the greatest damage having been done at North Scituate Beach.

The road appropriations should be carefully considered before voting large sums for different sections of the town.

The appropriation for street sprinkling and asphaltting was spent under the direction of the Selectmen and Highway Surveyor. After investigating various methods and considering that we had about five miles of macadam roads to treat, the Emulsion process was used, with good results as far as laying the dust was concerned.

An appropriation sufficient to allow of thorough treatment of all the macadam roads owned by the town is recommended for 1910, as it will be economy in the end to keep the roads in good repair.

Owing to the dissatisfaction of abutters with the awards and layout as made by the County Commissioners, the Selectmen petitioned for a relocation of Hazel Avenue layout, asking that same be made thirty feet wide and changing direction. The County Commissioners considered the petition favorably, and granted an extension of time in which to complete the road, as will be seen in the Town Clerk's report.

The town has been fortunate the past year as regards losses by fires, there having been no serious fire during the

year. The appointment of a forest warden, as required by the State, has no doubt been instrumental in controlling the setting of fires and lessening the danger from grass or brush fires to a great extent.

In making the appropriation for the Fire Department it would seem well to specify a certain amount for each company for incidental supplies.

The Park Commissioners' and Tree Warden's work, if properly conducted, should be encouraged by the town.

In beautifying the wayside, grading and setting out of shade trees help to make the town attractive to prospective residents and townspeople.

The gypsy moth work has been carried on at a great expense under the direct supervision of the State authorities.

The 1910 liability for Scituate is \$1,790.26, the whole of which must be spent before reimbursements for further expenditures are made by the State.

During the year the employees on road and moth work requested that they receive their pay weekly instead of semi-monthly, as has been customary for several years. This required the meeting of Selectmen weekly and increased the expense of town officers.

The Water Company has extended its service considerably the past year, enough to warrant the installing of extra hydrants, four of which were authorized by the Selectmen, making a total of ninety-eight hydrants rented by the town, besides the extra ones furnished free of charge.

The company contemplates much new work in the spring, and for that reason the usual appropriation for hydrant rental should be increased.

The Assessors' report shows a substantial increase in valuation of real and personal property for 1909. It was considered advisable by the Board to make some increase in the assessed value of shore property.

Beginning at the Humarock Beach and extending to the

Glades a careful consideration was given to all property, and while in some places the valuation may seem high, the aim of the Assessors has been to have adjoining property show an equal valuation, according to location and surroundings. In looking at the tax levy you will see that you voted about \$12,000 more than in 1908 for town expenses.

In view of that increase the present rate cannot be considered excessive.

Real estate must be assessed to the record owners, and if property owners would have their deeds promptly recorded, much trouble would be avoided.

The transfers increase every year, causing much extra work in changing records of same.

In 1910 a substantial reduction in the tax rate can be looked for if at the annual meeting proper economy is used.

Beginning with 1910 all assessments will date from April first instead of May first.

Notices are posted according to law requiring all persons to bring in sworn statements of their property. It would be much more satisfactory to the Assessors if taxpayers would do so.

The method of giving discounts on taxes should be abolished. We know of no other town giving so high a rate of discount.

Taxes are due as soon as the book and warrant are placed in the hands of the Collector and bills sent out. Interest charged after certain dates would bring far better results, with no more hardship to taxpayers, at the same time bringing in a just revenue on overdue taxes.

It is a fair business proposition and should be carefully considered by the voters at the annual meeting.

The Overseers of the Poor financial report shows an account of expenditures by that Board. Fifty-eight persons have been aided during the year; thirty-six persons being aided at present.

The death of our late Treasurer, Ernest L. Bonney, May 7, necessitated the appointment by the Selectmen of a Treasurer *pro tempore*.

Mr. John D. Ferguson was so appointed and has served up to the present time.

Respectfully submitted,

C. H. WATERMAN, *Chairman*,
E. PARKER WELCH,
JAMES W. TURNER,
Selectmen, Assessors, and Overseers of Poor.

CHARLES W. PEARE,
Auditor.

TOWN MEETING

ANNUAL TOWN MEETING, MARCH 1, 1909

Ballot Clerks, E. Clayton Hyland and Eugene T. Brown.

Charles F. Clapp and Walter J. Stoddard checked the names of voters before depositing their ballots in the ballot box.

George S. Bailey, John Cummings and Herbert E. Webb took the oath of office as Tellers.

Frank L. Bates was appointed by the Moderator to attend to the ballot box when the official count of votes commenced.

These officers were sworn to the faithful performance of their duties by the Town Clerk.

The meeting was promptly opened at 7 o'clock A.M. by the Town Clerk, who read the Warrant and took charge of the meeting.

Article No. 1 was taken up and Henry T. Bailey was chosen Moderator by ballot and then had charge of the meeting, being the Presiding Election Officer of the voting with the Official Ballot.

The ballot box was opened at 10.30 A.M. and fifty ballots taken out and the counting of votes commenced.

The polls were declared closed at 1.05 P.M. The ballot box registered 516, the number of voters checked on each voting list being the same.

Male, 506. Female, 10.

Voted, That the town do authorize the Overseers of the Poor to contract at their discretion for the support of the town's poor.

ARTICLE 7

Voted, by unanimous vote, 105 in favor, That the town do authorize the Town Treasurer with the approval of the Selectmen, to borrow during the municipal year beginning March 1, 1909, in anticipation of the collection of taxes of said year, such sums of money as may be necessary for the current expenses of the town, but not exceeding the total tax levy

for said year, giving the notes of the town therefor. All debts incurred under authority of this vote shall be paid from the taxes of the present municipal year.

ARTICLE 8

To hear the report of any committee heretofore chosen.
No committee to report.

ARTICLE 9

Voted, That the town do authorize the Selectmen to prosecute, compromise or defend any suit or suits within the Commonwealth in the name of the town.

ARTICLE 10

Voted, That the taxes be collected in the same way and manner as last year.

A discount of 5 per cent to be allowed on all taxes paid on or before October 1, 1909.

Four per cent discount if paid on or before November 1, 1909.

Three per cent discount on taxes paid on or before December 1, 1909.

That the Collector receive one per cent for collecting the taxes.

ARTICLE 11

Voted, That the town do abate the poll tax of each individual fireman.

ARTICLE 12

To see if the town will raise and appropriate the sum of \$3,500 for the enlargement of the Town Hall, according to plans made or modification of the same, or act thereon.

Voted, To indefinitely postpone.

ARTICLE 13

Voted, That the town raise and appropriate the sum of \$2,500 to continue the building of macadamized road from the Scituate railroad station west by the way of Central Street.

ARTICLE 14

Voted, That the town raise and appropriate the sum of \$1,000 to be expended under the direction of the Highway Surveyor in resurfacing and putting in good repair Branch Street from junction of land of Henry Merritt and Thomas W. Lawson, on easterly side of said street, to Central Street.

ARTICLE 15

Voted, That the town raise and appropriate the sum of \$500 to be expended under the direction of the Highway Surveyor in repairs on bridge road (Marshfield Avenue) and building of sidewalk at Humarock Beach.

ARTICLE 16

Voted, That the town raise and appropriate the sum of \$800 for building of new town way from Willow Street to Brook Street as laid out by the County Commissioners.

ARTICLE 17

Voted, That the town raise and appropriate the sum of \$1,000 to be expended under the direction of the Highway Surveyor in the improvement of Pond Street from its junction with Main Street to the Cranberry Bog.

ARTICLE 18

Voted, That the town raise and appropriate the sum of \$200 for the use of the Park Commissioners.

ARTICLE 19

Voted, That the town raise and appropriate the sum of \$100 to complete the grading of the Common on Union Street.

ARTICLE 20

Voted, That the town raise and appropriate the sum of \$2,500 to continue the macadam construction of Beach Street and to asphalt it from the creek bridge to the end of the new work.

ARTICLE 21

Will the town authorize the Treasurer to borrow upon the notes of the town a sum not exceeding \$20,000 to be expended in altering and rebuilding the High Schoolhouse, as recommended by the High School Improvement Committee?

Voted, No.

ARTICLE 22

Will the town appoint a committee to expend any sum authorized under the foregoing article and to take charge of such alteration and rebuilding?

Voted, No.

ARTICLE 23

Voted, That the town increase the salary of the Town Treasurer to \$300 per annum.

ARTICLE 24

Voted, That the town raise and appropriate the sum of \$225 for the purchase of fire hose.

ARTICLE 25

To see if the town will vote "That none but taxpayers of the town be employed for work to be done on roads, bridges and sidewalks and public buildings of the town."

Voted, To pass over.

ARTICLE 26

Voted, That the town rescind its vote of March 4, 1901, whereby it was voted to authorize the Selectmen to deposit in the State archives a volume of the laws of the General Court, made in 1658 and continued until 1691, as requested by Robert T. Swan, Commissioner of Public Records, and instruct the Town Clerk to consult the Secretary of the Commonwealth in regard to its return to the town.

ARTICLE 27

Voted, That the town do authorize the Selectmen to transfer, at their discretion, unexpended balances of the previous year to current appropriations.

ARTICLE 28

Article 28, taken up with estimated expenses, street watering, macadam road, \$1,000.

Voted, That the town choose a committee to take action toward having its macadam-built roads treated with any form of asphaltum or other preparation.

Voted, That the Selectmen and the Highway Surveyor be a committee to expend \$1,000.

ARTICLE 29

Voted, That the town do instruct the Selectmen to prohibit the game of basket-ball in the Town Hall.

ARTICLE 30

Voted, That the town raise and appropriate the sum of \$500 to repair the highway from Barkers Lane by the way of the Sand Hills and Turner Avenue to Hatherly Road.

ARTICLE 31

Voted, That the town raise and appropriate the sum of \$1,500 to continue the building of macadam road along

Charles Street, Egypt, beginning at a point near the Egypt railroad station and connecting with macadam construction on said street near residence of Charles M. Ferguson.

ARTICLE 32

Voted, That the town raise and appropriate the sum of \$350 for repairs on Second Cliff bridge.

ARTICLE 33

Voted, That the town raise and appropriate the sum of \$1,500 to extend the macadam construction on High Street westerly from a point near the residence of Wm. T. Clapp, to be expended under the direction of the Highway Surveyor.

ARTICLE 34

Voted, That the town raise and appropriate the sum of \$250 to pave the sides of driveway leading from street to Jenkins School and continue the driveway around to west end of said school.

ARTICLE 35

Will the town raise and appropriate the sum of \$5,000 to build and establish a Union School at or near Conihasset Hall?

Voted, No.

ARTICLE 36

Voted, That the town raise and appropriate the sum of \$3,200 for the purpose of transporting its school children, in connection with estimated expenses.

ARTICLE 37

Voted, That the town raise and appropriate the sum of \$250 for School Committee services.

ARTICLE 38

Voted, That the town raise and appropriate the sum of \$1,500 for the purpose of rebuilding, repairing and resurfacing

Central Street easterly from Mongoe's Corner, the same to be expended under the supervision of the Highway Surveyor.

ARTICLE 39

To see if the town will instruct a committee, to be appointed at this meeting, to appear before the Legislative Committee on Towns at a hearing to be held March 4 next, on petition to relocate the boundary line between Scituate and Cohasset.

RESOLUTIONS BY HARVEY H. PRATT, ESQ.

At the annual meeting of the inhabitants of the Town of Scituate, qualified to act in municipal affairs, it is

Resolved, That the division line between Scituate and Cohasset, once the boundary of the ancient Colonies of Plymouth and Massachusetts Bay, standing as it now does with slight deviation from its establishment two hundred and fifty-three years ago, ought not now to be changed without grave, adequate and sufficient reason.

That the location of this line having been for nearly a quarter of a century in the early days of the Colonies a matter of serious controversy, which called to its settlement Bradford, Winslow, Hatherly and Tilden, Endicott, Stoughton, Clapp and Fisher, ought to remain — a fitting and enduring evidence of the pride which the Commonwealth takes in the works of these early Puritans.

That this town which gave to Harvard University its second president; to the Supreme Court of the United States a member whom Washington would have made Chief Justice; to the statecraft, Hoar and Tilden; to the judiciary, Cushing, Gray, Lowell, Barker and Lathrop; and to the muses, Bryant, now earnestly protests this sacrilege.

Voted, That a copy of these resolutions be conveyed to the Moderator of the annual meeting of Cohasset now assembled, with the request that it be read to the town.

Voted, That the Selectmen be a Committee to appear before the Legislative Committee on Towns, at a hearing to be held on March 4 next, and oppose the relocation of the boundary line between Scituate and Cohasset, and that \$500 be raised for that purpose.

Voted, That the thanks of the meeting be extended to Henry T. Bailey for the able manner in which he had conducted the meeting, and that he receive \$5.00 for his services.

Voted, To dissolve the meeting.

Attest:

JETSON WADE,
Town Clerk.

STATE ELECTION, 1909

At a legal meeting of the inhabitants of the Town of Scituate, qualified to vote in elections, held in the Town Hall in said Scituate on Tuesday, the second day of November, 1909, it being the Tuesday next after the first Monday of said month, at six-thirty o'clock in the forenoon, the meeting was called to order by the Town Clerk, who read the Warrant, after which the meeting was taken in charge by the Chairman of the Board of Selectmen, Charles H. Waterman, he being the Presiding Election Officer.

The polls were then formally opened. Fenton W. Varney and Frank L. Bates took the oath of office as Ballot Clerks, and had charge of giving out the ballots to voters who passed through into the polling place.

Hamilton W. Welch and Joseph A. Ward took the oath of office as Tellers and checked the names of voters who passed the desk and deposited their ballots in the ballot box.

Selectman E. Parker Welch had charge of the ballot box.

One box of 800 ballots was delivered to the Ballot Clerks before the opening of the polls.

The first block of fifty ballots was taken from the ballot box at 10.30 A.M. and counted.

The polls were declared closed at 2.25 o'clock P.M.

The ballot box registered 235 votes; the names of the voters checked upon the voting list kept by the Tellers registered 234; the voters checked by the Ballot Clerks registered 234; the ballots taken from the ballot box and counted registered 234; two hundred and thirty-four ballots having been cast.

The ballots were counted upon the counting board by Hamilton W. Welch and Fenton W. Varney under the supervision of Charles H. Waterman, Presiding Election Officer.

The Town Clerk had charge of the tally sheets; the result of said count is hereby given as shown on the total tally sheet.

Votes cast for Governor:

JETSON WADE,
Town Clerk.

At a meeting of the Town Clerks of the several towns comprising the Second Plymouth Representative District, held at the Town Clerk's office in Marshfield on Friday the twelfth day of November, 1909, at 12-o'clock noon, it was

ascertained by the returns from each town that the number of ballots cast for each candidate for Representative to the General Court on Tuesday, the second day of November, 1909, was as follows:

	HITCHCOCK	MOORE	BLANKS	TOTAL VOTE
Marshfield. .	33	122	6	161
Pembroke .	15	69	7	91
Scituate . .	59	163	12	234
Duxbury . .	21	113	5	139
Norwell . .	50	127	21	198
	—	—	—	—
	178	594	51	823

William S. Moore of Duxbury, having a majority of the votes returned, was declared elected and his certificate was made out in accordance therewith.

GEORGE H. WEATHERBEE, *Town Clerk of Marshfield.*

WILBERT E. HALLADAY, *Town Clerk of Pembroke.*

GEORGE H. STEARNS, *Town Clerk of Duxbury.*

JOSEPH F. MERRITT, *Town Clerk of Norwell.*

JETSON WADE, *Town Clerk of Scituate.*

JETSON WADE,
Town Clerk of Scituate.

RELOCATION OF HAZEL AVENUE

COMMONWEALTH OF MASSACHUSETTS

PLYMOUTH, SS.

On the petition of Selectmen of Scituate and others presented to the County Commissioners of Plymouth County at their meeting holden at Plymouth on the twenty-fourth day of August in the year of our Lord nineteen hundred and nine, representing that the lines of Hazel Avenue in Scituate in said county as recently laid out under petition of W. P. Richardson and others are unsatisfactory, and that a change in said lines be made which will reduce land damage and better satisfy landowners without detriment to public interests, and requesting a view thereof and such alterations as public safety and convenience may require, reference being had to the petition filed of record in the case.

The County Commissioners, pursuant to an order of notice duly published, posted and served, by which all persons and corporations interested had due notice thereof, met to view the premises at the store of George F. Welch in said Scituate on the eighth day of October, A.D. 1909, at 10.30 o'clock in the forenoon, and after viewing the premises and hearing all persons and corporations who desired to be heard, they adjudicate and determine that common convenience and necessity require that the prayer of said petition be granted as hereafter set forth, no person or corporation then or at any other time objecting thereto.

And they continue and adjourn said proceedings from time to time for further consideration and to make return thereof, all persons and corporations interested having due notice thereof, to a meeting of the County Commissioners held at the Court House at Plymouth on the nineteenth day of

October, A.D. 1909, when and where they proceed to complete said proceedings and make return thereof as follows, to wit:

The easterly line thereof is described as follows, viz.:

Beginning at a stone bound in or near the northerly line of Brook Street seven feet easterly from the southwest corner of Nicholas Wherity's house lot, thence north $1^{\circ} 36'$ west, on land of said Wherity, two hundred thirty-nine and six-tenths ($239\frac{6}{10}$) feet to a stone bound marking the northwest corner of said Wherity's land; thence same course sixty-seven and ninety-five hundredths ($67\frac{95}{100}$) feet on land of Mary J. Litchfield to a stone bound; thence north $15^{\circ} 10'$ east, one thousand one hundred eighty (1,180) feet to a stone bound in the southerly line of Willow Street, one hundred seventy-eight (178) feet of last-named course being on land of said Litchfield, four hundred and ten (410) feet on land of heirs of George Doherty, and five hundred ninety-two (592) feet on land of Charles L. Ritter and Wilmer H. Dawkins.

The westerly line thereof to be thirty feet distant therefrom and parallel to the above-described line.

And the laying out of the town way under petition of W. P. Richardson and others is hereby discontinued and all acts appertaining to said decree are annulled.

The grade of the center of the above-described highway when fully completed in accordance with this decree is to conform to the grade of the said highway as at present constructed. Owners of land taken as aforesaid are required to remove their trees, fences, buildings and other obstructions from the land so taken before the first day of December, A.D. 1909.

The inhabitants of the Town of Scituate aforesaid are hereby ordered to cause said relocation to be constructed as aforesaid, made safe and convenient for the public travel, and to the acceptance of the County Commissioners before the first day of June, A.D. 1910.

At the same time awarded to the several persons and corporations whose lands are taken for said relocation or who suffer damages on account thereof, the several sums hereafter named to be paid from the town treasury so soon as said town shall enter upon and possession take of said lands for the purpose of constructing said relocation as aforesaid, to wit:

Ritter and Dawkins. No award on account of benefits received.

Heirs of George Doherty, 12,240 sq. ft. of

land taken	\$100 00	
Benefits assessed	50 00	\$50 00
Mary J. Litchfield, 7,000 sq. ft. land taken.	35 00	
Special damage	25 00	60 00
Nicholas Wherity, one-fiftieth of one acre .		30 00
Ellen C. Burke, 6 front feet taken. \$36 00		
Lane	24 00	60 00
Benefits assessed	35 00	25 00

And said Commissioners order that the foregoing return be filed, accepted and recorded, and that an attested copy thereof be transmitted to the Clerk of the Town of Scituate within the limits of which said highway described therein lies.

In witness whereof the said County Commissioners have hereunto set their hands this nineteenth day of October, 1909.

WALTER H. FAUNCE,
 LYMAN P. THOMAS,
 JERE B. HOWARD,
County Commissioners.

A true copy. Attest:
 EDWARD E. HOBART.

Attest:
 JETSON WADE,
Town Clerk.

REPORT OF TOWN CLERK

MARRIAGES RECORDED, 1909

January 21, Joy K. Gannett, Jr., of Scituate and Dolly (Williams) Heiple of Scituate, married by George Bullen at Hingham.

SUMMARY

Number of births in Scituate for the year 1909	38
Males	21
Females	17
Number of marriage licenses issued	12
Number of marriage licenses recorded	15
Number of deaths for the year	57
Males	31
Females	26
Brought to town for interment and recorded	11
Hunters' licenses issued in 1909	145
Paid to State Treasurer	\$145 00
Number of dog licenses issued for the year	171
Amount, less Town Clerk's fees, paid into the County Treasury	\$439 80

REGISTERED VOTERS IN THE TOWN OF SCITUATE
DECEMBER 1, 1909.

Males	678
Females	49

All persons are requested to report omissions or corrections in the births, marriages and deaths. Blanks for the return of births will be furnished to those applying therefor by the Town Clerk.

JETSON WADE,
Town Clerk.

REPORT OF TREE WARDEN

SCITUATE, MASS., January 14, 1910.

To the Citizens of Scituate:

I have planted seventy-five young trees this year in different parts of the town; and it has taken about twenty-five trees each year to replace those that die or get broken, while quite a number are killed by people allowing their horses to get at them and gnaw the bark, break them off, etc.

Have trimmed the elms on Central and Front Streets, which were full of dead wood and dangerous in a high wind.

We have about seven hundred young trees planted since the Tree Warden law went into effect.

We had to buy a small hand sprayer that, with the necessary hose, etc., cost about \$60. This was the cheapest thing we could find that was heavy enough to do good work.

We were obliged to spray all the elms for elm beetles. Those that were sprayed first went through the summer in good shape, but with our light hand outfit it was impossible to cover more than a third of the town at the right time; the trees sprayed late, being already badly eaten, did not show much effect of the spraying, but of course it killed large quantities of the beetles that otherwise would come down into the ground and be all ready for business in the spring.

The spraying cost about \$250, including the poison used. This spraying for elm beetles is paid for by the town independent of moth work, and should consider it advisable to make the appropriation large enough to cover it.

The town is very much in need of a power sprayer that would be powerful enough to cover the entire town in season, as it will be only a few years when it will be as necessary to spray woodland, orchards and ornamental trees as it now is to Paris-green potatoes.

We adopted the policy of spending the moth appropriation in the first few months, and by so doing have been able to get about \$1,500 from the State—it seeming to me to be better than to make the appropriation last all the year and get nothing—for the State authorities will insist that our allotment be spent any way.

It was necessary to spend nearly half of our appropriation on a woodland colony back of Webster Hunt's, as it was said by the State authorities to be the most badly infested place this side of Boston. There were about 85,000 egg clusters creosoted; and when one takes into consideration that each cluster contains from 300 to 600 eggs, it means that we had that number less of moths.

In June we hired the Cohasset sprayer and sprayed about six acres of the colony under the direction of one of the State experts, killing a great many caterpillars, so that it now is in a condition easily handled if attended to.

There were nearly 10,000 trees burlaped and the burlaps turned during the past summer, and it is estimated that upwards of half a million caterpillars were destroyed in this way.

We also sprayed the most badly infested places in town, this being one of the best methods of destroying the pests under these conditions.

In the early spring we went over all the residential section, removing browntail nests, destroying nearly five bushels of nests in the North Scituate Beach section alone.

This work I consider necessary, not only because of the caterpillars being so destructive to trees, etc., but on account of the spines which are very poisonous to many persons.

The orchard work is one of the most important parts of this work, the State authorities insisting that every orchard shall be trimmed of all dead wood, and all holes carefully closed with zinc or cement, and all worthless trees cut down, holes and dead bark making just the place that the female gypsy moth chooses to lay her eggs.

In this town there are many trees in like condition, and if the property owners would only attend to the matter it would make the work much easier for the town.

I can report the residential section in fair shape, but the woodlands are infested in many places. While at this time the infestation is only scattering, it will be only a few years, unless some of the parasites become common, that all woodlands will become thoroughly infested.

I have found that nearly all of the property owners realize the importance of this work, and wish to thank them for their coöperation, and it is only by such coöperation that good work can be accomplished.

I have found the State agents and inspectors to be honest, conscientious men, willing to help the town or individuals in this work if they will only help themselves.

The gypsy moth, working silently and spreading as it is over a broader area every year, is one of the most destructive insect pests we have ever had, and it behooves all of us to do all in our power to suppress it.

Respectfully submitted,

PERCIVAL S. BROWN.

PARK COMMISSIONERS' REPORT

To the Citizens of the Town of Scituate:

The Park Commissioners in submitting their annual report to the citizens of the Town of Scituate wish to call especial attention to the work performed by the members of the Woman's Club in beautifying the grounds about the town lockup. In place of the former ugly spot we now have a well-graded lawn ornamented with hardy shrubs, vines and trees, which will all need careful attention each year; therefore the Commission recommend that a payment of twenty-five dollars additional to the salary of the keeper of the lockup be made that the grounds may be kept in as neat a manner as the interior of the building.

The Common has been carefully graded, all the rubbish about the foundation of the old East Grammar School removed, and the left field of the ball grounds raised so that the boys will have a very fair field on which to play the national game.

Work has also been done on different triangles at the intersection of streets which the Commission hope to complete this year, and also to extend this work in various sections of the town, requiring an amount of \$250.00 for same, which the town will be asked to raise and appropriate for use of the Park Commission.

The death of Mr. Walter H. Spooner, a very active and interested member of our Board, was not only a great loss to us, but also to the whole Town of Scituate, as few, if any, of its citizens have done more the past few years for the

general good of the town than he. In trying to make Scituate an ideal summer resort, Mr. Spooner gave his very best efforts, and it is to be regretted that he could not have lived to see many of the improvements made in which he took the initiative.

It will be necessary to elect one member of the Board for a term of three years at our coming March meeting.

Respectfully submitted,

WILLIAM H. NORTH,
CLEMENT J. PROUTY,
Park Commissioners.

FIRE DEPARTMENT

SCITUATE, January 1, 1910.

To the Honorable Board of Selectmen:

GENTLEMEN: We herewith make a report of the Fire Department of Scituate for the year 1909. During the past year forest fires have been less frequent than usual, two being caused by sparks from a locomotive along the line of railroad, while two others were the result of carelessness. Fire has occurred in one building only; that of Christopher O. Neill at Peggotty Beach, which was totally destroyed; the cause being the explosion of an oil stove, and only for the efficient work of Hose 1, at Scituate Harbor, the adjoining buildings would have been destroyed. During the year the department has been furnished with the extra hose that was needed and fire extinguishers, wrenches, gates, nozzles, etc. Four new hydrants have been put in during the year, making the number at present one hundred and thirteen. We recommend that six hundred dollars be raised for the maintenance of the several hose companies and the general expense of the department.

Very respectfully yours,

JOHN F. TURNER, *Chief.*
F. W. LITCHFIELD, *Clerk.*
FRANK L. YOUNG.
E. R. SEAVERNS.

BOARD OF HEALTH

SCITUATE, MASS., January 1, 1910.

To the Citizens of Scituate:

The past year has seen some changes in the Board of Health, and the inauguration of some new work which we trust will be of benefit to the health and welfare of the community.

At the Town Meeting in March, Mr. Geo. O. Allen, who had acceptably filled the position of Chairman since the formation of the Board in 1902, refusing to be a candidate for reëlection, Dr. H. F. Cleverly was elected a new member for three years.

In the retiring of Mr. Allen the Board wish to express their thanks for the services he has always so freely and faithfully performed.

Early in March a meeting was called and the Board organized, Thos. H. Farmer being chosen Chairman, and Frederic Cole, Secretary.

This year the regulations have been revised, and we trust that they now amply provide for most matters which may require the attention of the Board.

Early in the year it was deemed advisable to have a specified time for meeting, and it was decided to hold regular monthly meetings on the first Monday in every month, and this practice has been followed through the year.

In compliance with a notice from Governor Draper, it became incumbent upon the Board of Health to appoint a Meat Inspector, and April 26 Thos. H. Farmer was elected to fill that position, and an account of the work performed appears under the Meat Inspector's report.

For improvement of the sanitary conditions of the beaches, and to more thoroughly control the systematic removal of

swill, garbage, etc., it was decided to issue licenses to responsible parties for such work in the more thickly settled portions of the town, and they were granted to Mr. Chas. Turner at North Scituate, Mr. David O'Hern at the Sand Hills, Shore Acres, and Third Cliff, and Mr. Chas. Williamson at Humarock Beach.

We feel that these parties have faithfully performed their duties, and we thank all who have complied with our requirements.

This is a matter which seriously affects the health of many of the summer residents and one which it is incumbent upon us to particularly enforce.

In the sections of the town where this has been started for the first time, to some it may have seemed a hardship to be obliged to expend a small sum in this way, but if they will only stop and consider the ultimate good that will result, we trust for a more hearty coöperation the next season.

In the past few years there have been many complaints made to the Board in regard to the milk question and why there was no Milk Inspector in town.

By a change in the State laws, the power of appointing a Milk Inspector has been placed in the hands of the Board of Health, and at the regular July meeting the Board appointed Thos. H. Farmer for that position.

The town has been particularly free from contagious diseases the past year.

There have been reported six cases of diphtheria, only two of which were natives of Scituate, two of scarlet fever, and eight of measles, six of which were in one family, and one of typhoid fever.

The State Board of Health have requested the local Board to assist them in the abolishment of the common drinking cup, especially in the schools.

This matter has been brought to the attention of the Superintendent of Schools, and we take this method of requesting

parents to see that their children are provided with individual cups, and that the danger that lurks in the common cup is impressed upon their minds.

Recent investigation has shown that innumerable troubles and epidemics may result from this source.

Owing to the possible contamination of the North River clam flats from typhoid fever in Marshfield, it was deemed advisable to prohibit the digging of clams in that locality for a time, but as the trouble has now been remedied the restriction has been removed.

The Board has endeavored to faithfully attend to and remedy all complaints brought to their attention.

We wish to thank all who have complied with our requirements, and shall at all times be pleased to consider suggestions tending to the common good.

THOS. H. FARMER, *Chairman.*

FREDERIC COLE, *Secretary.*

H. F. CLEVERLY, M.D.

INSPECTOR OF MILK

SCITUATE, MASS., January 1, 1910.

To the Board of Health:

GENTLEMEN: In appointing a Milk Inspector I feel that the Board has made decided progress, for the matter of pure milk of good quality is a subject largely in the public eye.

The first work was to send notices and application blanks to all milk dealers selling milk in this town, and as a result twenty-one licenses were issued.

As it was late in the year before this was accomplished, not as much work has been done as can be another year.

The policy has been to look into the quality of the milk furnished, and about twenty-five samples have been analyzed, some obtained directly from the dealer and some from customers.

The average result has shown a favorable comparison with other localities, some samples being exceptionally good.

Ample time now having been given dealers to know that samples may be required at any time, it behooves them to take pride in the quality and cleanliness of their product.

Respectfully submitted,

THOS. H. FARMER, PH.G.,
Milk Inspector.

INSPECTOR OF MEAT

SCITUATE, MASS., January 1, 1910.

To the Board of Health:

GENTLEMEN: Upon accepting the position of Meat Inspector I have endeavored to inform myself of the requirements and have spent some time in the large slaughter houses in order to familiarize myself with the required duties.

There are two licenses for the slaughter of cattle granted by the Selectmen, and the holders of these have notified me and I have inspected the animals slaughtered.

Since my appointment in April I have inspected 34 calves, 1 bullock, 67 pigs, 20 sheep, and found them all in good condition.

Yours respectfully,

THOS. H. FARMER, PH.G.,
Meat Inspector.

REPORT OF THE CUSTODIAN OF BURIAL GROUND, MEETING-HOUSE LANE

SCITUATE, MASS., January 1, 1910.

To the Board of Selectmen:

The usual work has been done this year in keeping the yard mowed and free from briars and weeds. An unusual expense has been incurred in relaying the northeast corner of the ancient wall, which fell into the street, and in repairing other parts of the wall which seemed likely to fall. The entire wall has been put in good shape and looks fairly well. A large tree which had been killed during the winter has been replaced, and several of the old headstones were reset. Much interest in the preservation of this ancient cemetery is felt by the New England Historic Genealogical Society of Boston, where a record of these old headstones is kept. The oldest stone is 1690.

Respectfully submitted,

ELLA BATES,
Custodian.

SCHOOL PHYSICIAN

Dr. William P. Grovestein.

REPORT OF SCHOOL COMMITTEE

To the Citizens of Scituate:

In presenting to you a brief retrospect of the work of the public schools of Scituate for the past year we desire to draw your attention to the fact that it does not differ very materially from those of former years, excepting that the past year has been one of progress, and not simply a year of marking time.

That our schools have reached perfection it would be folly to claim; with the trend and ideas of what constitutes an adequate education, changing more or less each year, it is out of the question. Centuries ago one named Seneca uttered this statement: "*Now teach me what is necessary*"; and Canon Farrar adds this comment:

"Considering the condition of much which in modern times passes under the name of 'Education,' we may possibly find that the hints of Seneca are not yet wholly obsolete."

We have refrained from introducing fads, and have endeavored to confine our school curriculum to the fundamental studies, and in the grammar schools to a more thorough training of what constitutes the "spinal cord of education," known of old as the three R's.

New teachers coming to our town comment on the fact that our High School scholars cannot read as they ought. This shows a lack of thorough training in the grammar school. We are endeavoring to combat this weakness by devoting special efforts to this particular study. A student may lack a thorough knowledge of physiology, hygiene, botany and other studies, but there is no excuse for his not being proficient in reading, writing and arithmetic.

While "short steps" to education may assist us a little, yet we cannot really obtain a thorough, comprehensive education unless we have the roots well grounded.

The evolution of education is now in process, and it behooves us to keep to the straight and narrow path, so well defined by Seneca, and not to try and pluck the fruit which is not yet ripe, even though it hangs so low and looks so tempting. When the present innovations have proved practical and successful, rest assured we will have them; until such time we must learn to labor and to wait.

We were unfortunate in losing the services of our Superintendent, John E. DeMeyer, who resigned in August to accept the superintendency of the Abington-Bridgewater district. During the time Mr. DeMeyer was with us our schools showed marked progress, and it was with reluctance that we accepted his resignation.

The joint committee met at Duxbury and elected William E. Chaffin of Dennis as Superintendent, at a salary of \$1,600, each town paying one-third of this amount, and receiving the same share of his services.

Mr. Chaffin is a man of long experience in school supervision, and we hope that this experience will prove of value to us, and that the present high standard will be maintained, or even excelled, under his administration.

Principal Frank A. Scott resigned in July to accept a position as Junior Master in Physics at the Somerville English High. Mr. William J. B. MacDougald of Topsfield was recommended by Mr. DeMeyer to fill the vacancy, and was accordingly elected.

Miss Helen L. Woodfin of Cambridge was elected Commercial Teacher in place of Miss Florence Andrews. Miss Kellogg accepted a position in Newton, and Miss Georgina K. Fiske of Wellesley, '08, was elected teacher of English and History in her place.

Miss Lois Thompson resigned from the principalship of the

Jenkins School on account of ill health, and in her place was elected Miss Sarah L. Meigs of Abington.

In regard to transportation, we have saved some money by extending the limit to one and one-half miles, which enabled us to eliminate several routes. By distributing the routes amongst different contractors, we have obtained very satisfactory results. In connection with our policy for the ensuing year, would say we have decided to leave this entirely with the town. We would simply suggest the advisability of putting on some supplementary winter routes.

The school buildings are in pretty good condition. The Jenkins has been repainted; the Hatherly will have to be next year. This year the High Street School will need renovating.

Through the efforts of pupils and citizens a telephone has been installed in the Jenkins; there ought to be one in each school building.

The High School problem still confronts and confuses us. We need a new building, but we need our town debt reduced first. What to suggest is a problem; something must be done, and now. Either lengthen the building out or raise it another story. It is out of the question to let it go for another year. If you will visit the school and see the present conditions for yourself, you will then be able to vote intelligently on the matter.

We wish we could feel that the parents were intensely interested in the education of their children; perhaps they are, but refrain from showing it. Make a new resolution this year, and when you have a spare hour or even a few minutes drop in and see how things are going. We know the teachers will be pleased, even if your boy or your girl may not be.

It is with great regret that we announce that the senior member of this Board has declined, on account of ill health, to be a candidate for reelection. We invite your attention to the resolutions appended herewith.

We invite your attention to the reports submitted by the various officials; that part of the Superintendent's referring

to habits of punctuality is worthy of your particular notice. The High School principal's reveals the facts of the case, both in regard to the conditions of the High School building, as well as the need of proper application to studies.

In regard to the question of tardiness of scholars, we agree with our Superintendent that if conveyances are late, scholars should not be marked tardy. We purpose, if possible, arranging a system of signals for "no school," to be given at 8 A.M. on stormy days, to be rung at the Baptist and Methodist churches. In the event of its clearing before noon, afternoon session will be held unless roads are impassable.

We thank you, in closing, for your interest as manifested in the past, and which we hope will continue through this and many years to come.

Respectfully submitted,

PETER W. SHARP.
JULIA E. WEBB.
CLARA M. SKEELE.

SCITUATE, January 17, 1910.

Julia Elizabeth Webb was first elected to serve on the School Committee of this town in 1880, previous to which she taught at the Brook, Common and Willow Street Schools. For eight years she served as Secretary, and has for the last twenty-two been Chairman. In 1880 there were 406 pupils, today nearly 500.

The first year her associates were Rev. H. H. Hibben and I. Franklin Merritt. These gentlemen served only five months, and for the balance of the year Mrs. Webb was alone.

In 1880 the first complete High School course was adopted, and in 1882 the first graduation took place.

It has been Mrs. Webb's privilege to serve with three other women, Mrs. A. F. E. Hammond, Miss Ella Bates, and the present member, Miss Clara M. Skeelee.

During the time that Mrs. Webb has been in office the schools have undergone vast changes. For thirty long years Mrs. Webb has constantly and earnestly endeavored to keep up with the trend of modern educational development, and has been eminently successful; for today, while not perfect, still Scituate schools rank high in the county, and compare favorably with those of the entire State.

Such measure of progress could not have been brought about without some one at the helm to steer the ship along. Mrs. Webb, by her untiring perseverance, her readiness to listen patiently to complaint or advice, who has weathered the storm of district schools, consolidation and transportation; who was, and still is, beloved by scholars, teachers, parents and citizens, has now reached the conclusion that her health will not permit of her being a candidate for reelection next March.

In view of these facts, and considering their importance, it was therefore voted that the following resolutions be adopted and spread upon the records of this Committee, and a copy thereof be sent to Mrs. Webb.

PETER W. SHARP.
CLARA M. SKEELE.

January 17, 1910.

For a period of thirty years Julia Elizabeth Webb, having labored earnestly and faithfully, in season and out, in behalf of the public schools and the cause of education in the Town of Scituate, it is hereby

Resolved, That this Committee, as a token of deep appreciation and esteem, do extend to her our hearty thanks; and it is further

Resolved, That these resolutions be made a part of our permanent records, that a copy of same be sent to Mrs. Webb, and that at the annual town meeting to be held on March 7, 1910, the town be asked to adopt these, or other suitable resolutions, in order that they may become a part of the permanent town records, so that future generations may thereby become acquainted with these facts.

PETER W. SHARP.

CLARA M. SKEELE.

SUPERINTENDENT'S REPORT

To the School Committee:

In accordance with your regulations I herewith submit my first annual report. As I have been with you but a single term, this report will have to do with the statistics for the year ending in June, 1909, and the present condition of the schools, together with such suggestions as seem pertinent at this time, rather than with the work of the schools for the past year.

The consolidation of the schools at the Jenkins and Hatherly buildings some years ago has given to the Town of Scituate an excellently graded system of schools for a town of its size. At present neither of these buildings has any overcrowded rooms. The report this year shows that the largest number of pupils in any room in either of these buildings is 48. While this is some more than an ideal number for one teacher, it is not so many pupils as are frequently found in schoolrooms throughout the State, and should not prevent satisfactory progress. The High Street School has a reasonable number of pupils and is doing well. Of the High School I will speak later.

Some of the barges are so crowded that something should be done to improve the condition.

The register returns for the year indicate much chance for improvement. The percentage of attendance is materially below the average for the State. With the transportation furnished, this should not be the case. The registers also show that there has been much more tardiness than there should have been. The schools cannot do their best work until the attendance is improved. Tardiness can to a considerable extent be controlled by the teachers, but parents can do much to improve the schools by seeing to it that their

children start for school in ample time to arrive promptly; to allow no absences unless for sickness or other serious cause; and to see that when in the higher grades they have regular and undisturbed study periods at home.

It should be remembered that the habits formed during school life are more important than the facts learned from books. A pupil by his daily faithfulness to class work and study periods, and by his uniformly regular and punctual attendance, should have the habits of industry and faithfulness wrought into his character.

It does not seem right that pupils be marked for tardiness when the barge is late, as the tardy mark is supposed to record unfaithfulness of the pupil, and a child's sense of justice will lead him to feel that a wrong is done if he is marked when it is the driver's fault. When parents delay their children until tardy, the child's record must suffer for the neglect of the parent, as school authorities cannot be held responsible. They are responsible for the barges being on time, and should not tolerate tardiness in drivers.

With the exception of some records kept by individual teachers, no records of class work, deportment or attendance of the pupils have been permanently kept. The High School principal informs me that there is no record even of last year's work of the pupils to be found. The pupil should feel that day by day he is making a record that is to stand for life. Business concerns frequently write for information concerning the school records of young people who apply for positions some years after leaving school. If no records are permanently kept on file, there is no means of giving one credit for his school work. This defect should be remedied at once. The upper grammar grade rooms and the High School should be furnished with record books suitable for keeping a full and permanent record of all pupils: as these books are filled they should be placed on file at the school office and other similar books furnished to the schools. This would form a system

of permanent records of original entry; and as a system of original entry is the only system adapted to local conditions, it should be required, at least until some better system is feasible.

It seems that too many pupils have been "kept back," or in other words failed of promotion at the close of the year. This has not occurred through withholding promotion to deserving pupils, but because too many pupils were not fitted for promotion. It seems that this condition has arisen largely from two causes: first, from children entering the first grade too young to do the work of the grade well, and consequently getting more or less hazy impressions of school work; second, from lack of thoroughness in some of the work of intermediate grades.

In general the work in the schools continues much the same as last year. Effort is being made to strengthen it at weak points, and some things have been deemed worthy of special attention. Endeavor is being made to increase the accuracy of pupils in the fundamental operations in arithmetic. Memory gems have been learned by all grades below the High, and story-telling in the lower grades is to receive more attention. Muscular movement penmanship has been introduced in the grammar grades, and the principals of the Hatherly and Jenkins Schools have each taken up the work with an energy and ability that are worthy of the highest praise. Marked progress has already been made in this subject.

Through the efforts of the principal, the pupils and their parents, a telephone has been installed at the Jenkins School.

Industrial work is being tried at this school, and part of the lunch hour is being devoted to the work. Sewing and Sloyd — such as the making of paper-knives and book-racks — are being taken up in the sixth and seventh grades. Brass work is being done by the eighth and ninth grades. The principal and Miss Nellie Adams are deserving of credit for this work. We should do all we reasonably can to promote

industrial work in the schools. It is difficult to find a city, State or government annual school report that does not devote much attention to industrial work. At present all cities of 20,000 or more inhabitants are required by law to teach manual training. Some of the smaller towns are taking up the work, and the time will probably come when manual training will be required by law to be taught throughout the State. The following on this subject is quoted from the latest report of the United States Commissioner of Education: "What the school needs is, in addition to the purely intellectual field of work, a rich field of manual work. For in this by far the greater number of human beings find their fertile field of development and support. The school needs, furthermore, those kinds of work which as much as possible are connected with the economic or domestic activities of the parents, so that the threads which the school spins may not be broken daily when the child returns home."

While each of the subjects of school work has its allotted time and attention, reading in all grades has received the most careful inspection. Most pupils and too many teachers fail to realize the importance of the reading lesson. This is particularly true of grammar schools. When it is remembered that the knowledge of the ages is locked up in reading, and that he who can read most intelligently is best fitted to acquire knowledge, the importance of the reading lesson should become apparent. There is much that makes for the best in character-building in the appreciative reading of English masterpieces. The reading lessons in the higher grammar grades and in the High School should be so conducted as to develop a taste for much that is best in literature. It is useless to select a list of good books for one to read if they are beyond his appreciation, for they will not be read.

There are some pupils in every school who are slow in learning to read. Teachers and parents will do much to help these slow readers if they will consult the librarian of the most con-

venient library and select easy and interesting children's classics for their home reading, and require the books read.

With time schedules arranged so as to give reading its full share of time, the individual pupil gets on the average less than two minutes a day in which to read aloud in class. With this limited time it is necessary that the reading lesson receive the most careful preparation on the part of the pupil and the most skilful direction on the part of the teacher, in order that the average pupil may get what he should from it.

The backward reader will be sure to make more or less of a failure of his reading unless he does much outside reading which the library offers. If he fails to get the thought from the printed page in his reading lesson, he is foredoomed to failure in his history, geography and other lessons.

With a course of studies sufficiently broad to engage all the activities of the child, it is not so important what topics are taught, as how they are taught. In arithmetic it is not so important whether compound proportion and longitude and time are taught, as it is that the pupils acquire accuracy, self-reliance and reasoning power from their study of arithmetic. In reading it is not so important that the pupils write out and bring into class the definitions of many of the words in the reading lesson, as it is that they get the inspiration and the mental uplift that come from appreciative contact with the great in literature.

Lastly, but of first importance, the discipline of the schools should be such that obedience is secured, not through fear of the consequences of disobedience, but through the pupils being led to feel that the requirements of the school are just and fair and right. Years of dealings with the children of country communities have led me to the conviction that, with few exceptions, the children of such communities, when wisely directed, can be relied upon to do what is right, except in instances of thoughtlessness, where proper correction would be received without bitterness.

The High School is sadly in need of more room. I trust that this will receive early consideration. Concerning the work of the High School, it must be remembered that there is no royal road to learning. It is what the pupil himself does, and not what he gets the teacher to show him, that educates him.

For information concerning the High School, you are referred to the report of the principal.

In conclusion—I have suggested the need of encouraging industrial work in the schools; I have not recommended increased appropriation for that purpose, as a careful study of former town reports shows that the Town of Scituate is already doing well in support of its schools, and it seems needful to devise ways and means of improving and broadening the work in them without further increasing their cost. This may seem difficult, but it can be done. The average annual cost per pupil in the public schools of the State as given in the latest report received from the Board of Education is \$30.15. The average cost per pupil for Scituate is \$38.41. For books and supplies, the average for the State is \$1.66 per pupil. The average for Scituate is \$3.36.

In closing this report I wish to express my appreciation of the kindly coöperation that has been extended me by all with whom my duties have brought me in contact. Especially do I wish to say a word expressive of my obligation to the worthy Chairman of this Board, whose wise counsels have been of great help to me in taking up my work among you.

Respectfully submitted,

WILLIAM E. CHAFFIN.

HIGH SCHOOL REPORT

MR. WILLIAM E. CHAFFIN,
Superintendent of Schools.

Dear Sir: I herewith submit my first report as principal of the Scituate High School.

School opened Tuesday, September 7, with an enrollment of eighty-six. Of this number, forty-two are girls and forty-four are boys. Since that time a few have left, so that our present enrollment is about eighty-two.

Throughout the year we have been greatly handicapped by lack of room. Although we have tried to make the most of the means at hand, we feel that first-class work cannot be carried on under the present conditions. The building consists of one main room, which accommodates seventy-seven pupils; three small recitation rooms, about fifteen by twelve; and two cloak rooms. One of these cloak rooms is now used as a typewriting room. One of the recitation rooms has been provided with desks for eleven pupils. The other two rooms are supplied with settees. These rooms cannot be provided with desks, because the pupils must file in and out through them. Conditions in the main room are also very bad. No matter how desirous a pupil may be to study, he cannot do so to good advantage in this room at the present time. Often there are fifty pupils at their desks studying, while another class of twenty is doing work in mathematics or languages at the boards. As these boards are on the four sides of the room, the work is going on on all sides of the pupils at the desks. The comments of the teacher, the explanations of the pupils, and the desire of the pupils to see what is going on cause them to use their time watching the board work instead of attending to their own lessons. The teacher's attention is divided between instructing those at the board and keeping

order in the room. Under such conditions he can do neither to advantage. The only way to remedy these conditions is to provide recitation rooms of considerable size, well fitted with blackboards, for the use of the different classes, especially those in mathematics. This is the most pressing need of the school at the present time and demands the careful attention of all.

The ventilation of the school is very poor. In the smaller rooms the only way to ventilate is by the windows. If a window is opened, it blows directly on the pupils. As a consequence the windows are kept closed. The air becomes very impure, and the teachers and pupils have many colds that they would escape in a well-ventilated building. I think that if the people of Scituate realized the conditions under which we are working, they would not hesitate to remedy the matter at once.

In the Department of Science our needs are very urgent. Everywhere the sciences are now taught by the laboratory method or in connection with it. We cannot do any experimental work, because what was formerly a laboratory is now used by the Commercial Department. As we have only a small amount of apparatus for both Chemistry and Physics, I would recommend that the course in Chemistry be given up for the present and that the course in Physics be made as strong as in other schools. This could be done by fitting up a room with tables and sufficient apparatus for performing individual experiments. This laboratory could also be used for experimental work in Botany, Physiology and Physical Geography. I suggest this because it is more economical, and because it is better to teach one thing well than two things poorly.

The chief aim of the teachers has been to raise the standard of the school. Although progress has been rather slow, we feel that we are gaining all the time. There has been a marked improvement in the matter of home study. I hope

and expect still further advance in this line. There is no reason why the Scituate High School should not be of a very high standard. We have a very fine class of pupils who come from the best of homes. Provide these pupils with proper equipment and keep them diligently at work, and I see no reason why the school standard cannot be raised. I feel that the cause of the low standard has been due largely to two things, namely, a lack of ambition on the part of some pupils, and a lack of application to their studies on the part of many more. There are a few pupils in our school who have a mistaken idea of what a high school course means. They seem to feel that it consists in attending somewhat regularly for four years, getting what lessons they can without much effort, and taking their chance of getting through at the end of that time. I can see neither sense nor justice in such a course. It is entirely unfair to the pupil who attends regularly and does his work faithfully, and is very harmful to the pupil himself. The High School should not be a place of rest and ease, but of earnest effort. Those who are not there for serious work should find such work elsewhere, both for their own good and the good of others. I say this largely for the sake of the pupils themselves. If they do not apply themselves with diligence, they will get into habits that will be fatal to them in after life. It will be a preparation for continuing to waste time and opportunity, and for disappointment to themselves and to all who are interested in them. In the words of Superintendent Gifford of Marblehead, "Doing nothing prepares for doing nothing. Doing little prepares for doing less. The only ease is to wish for no ease, to throw one's self heart and soul into work. To help form this habit is one of the high aims of schools, and whatever interferes with accomplishing it should be removed."

The spirit of the school has been greatly improved. We have tried to make each pupil feel that it is not only for his interest but his duty to make the school run smoothly. At

the present time the pupils are beginning to see the advantage of such a course. As a result the discipline has been made very easy and all the machinery of the school has run smoothly. I feel that the credit for this improved school spirit belongs to the pupils themselves, who have so willingly responded to my requests. I have never seen pupils more fair and honorable in their dealings than those of the Scituate High School.

Although it is the aim of the High School to fit pupils for life by giving them a general culture, we are also able to give them a vocational training in our Commercial Department. It is possible for a pupil of industry and intelligence to acquire a fair degree of knowledge of Bookkeeping, Stenography, Typewriting, Commercial Arithmetic and Commercial Law. We are gradually raising the requirements in this department and requiring a higher standard of work. Ultimately we hope to give graduates of this course such a preparation that they will be fully prepared to do office work. This is hardly possible at the present time, because we have not room enough to carry on the work and because there are a large number taking the course who should not be doing so. As a commercial course is very attractive and pleasant, the great danger is that many will take it to avoid the tedium of the other courses. I think that we should immediately take steps to put this course on such a footing that only those who are thoroughly in earnest and are willing to work hard can complete it. In this way the standard can be raised until our Commercial Department will be of the greatest value to our town.

I hope that the parents and citizens will take a greater interest in the High School, and will show that interest by visiting the school occasionally and observing its regular work. Both teachers and pupils would appreciate these visits; the school would be benefited by the visitors, and at the same time these visitors would get into closer touch with the school, its aims, its methods and its difficulties.

We extend to all a most cordial invitation to visit the regular sessions of our school.

Graduates of the Scituate High School are creditably representing us in several higher institutions. We are glad to state that several pupils are now preparing for college or normal school. With improved conditions we feel that this number will be greatly increased.

I wish to commend to you my assistant teachers for their loyalty and faithfulness.

I desire to thank the Committee for the kindness they have shown me; especially do I thank you for your confidence and for the many valuable suggestions you have given me.

Respectfully submitted,

W. J. B. MacDOUGALD.

January 11, 1910.

"Semper Fideles"

THE GRADUATION EXERCISES OF THE
SCITUATE HIGH SCHOOL

at the

TOWN HALL, SCITUATE, MASS.

on

Wednesday, June 23, 1909

At 8 o'clock

PROGRAM

MARCH	Miss Cecelia Ainslie
INVOCATION	Rev. Hartnell J. Bartlett
SALUTATORY	Miss Ruth Bartlett
MUSIC, "Land of Freedom," from Donizetti, by <i>Stanley R. Avery.</i>	School
CLASS HISTORY	Miss Mary Emma Vinal
WOMEN IN MODERN INDUSTRY .	Miss Bertha Vinal Brown
THE CONSERVATION OF OUR NATURAL RESOURCES, Miss Mildred Vose	
MUSIC, "Thy Will Be Done," from Mendelssohn, by <i>T. F. Bullard</i>	School
CLASS WILL	Miss Elizabeth Bailey
THE ECONOMIC VALUE OF BIRDS, Miss Marion Beatrice Given	
CLASS PROPHECY	Miss Marjorie Imogen Pratt
MUSIC, "In Brèssilia's Forest Shade," from Hofmann's <i>"Melusina,"</i> by <i>W. C. Hofmann</i>	School
PRESENTATION OF CLASS GIFT .	Miss Mary Frances O'Hern

ACCEPTANCE OF CLASS GIFT, Miss Velma Augusta Henderson
 VALEDICTORY Miss Gladys Weld Hyde
 A SLUMBER SONG, *F. H. Lohr* School
 PRESENTATION OF DIPLOMAS Mr. Peter W. Sharp
 BENEDICTION Rev. F. Brooks Noyes

GRADUATING CLASS OF 1909

ELISABETH BAILEY	ALAN CLARENCE LITCHFIELD
RUTH BARTLETT	MARY FRANCES O'HERN
BERTHA VINAL BROWN	MARJORIE IMOGEN PRATT
MARION BEATRICE GIVEN	MARY EMMA VINAL
GLADYS WELD HYDE	MILDRED ROBERTA VOSE

REPORT OF THE SUPERVISOR OF MUSIC

MR. WILLIAM E. CHAFFIN,
Superintendent of Schools.

Dear Sir: It is perhaps a favorable omen that the report on music is short. The standard for all the schools last year was high, and the work this year is to keep to that standard.

The most notable advancement has been in paying more attention to the second grade. By making a little extra lesson possible, the whole course has been moved along a bit.

It is necessary in every room to keep a sharp watch on all the lessons, giving them the full amount of time allowed, and keeping the interest as keen as possible during the lesson. We have all been careful in the production of tone, and the result is quite noticeable.

We wish to urge the parents to visit the schools, and ask to hear a song, and then if they think the work is good, and that their boy is not doing his part, to counsel him *earnestly* to take advantage of his opportunities. It is impossible during childhood to judge of the easiest and most direct channel in life through which profit may come to us.

What if it should be music? And our boys idling away their time, because of a childish sentimentalism! We are having good help from the boys, generally speaking, but we want *every one* to help, not for our advantage, but for their own benefit.

The progress in the grades is evident in the High School. Pupils are not judged by their voices, but by their ability to use what they have, and by the things which they remember from earlier lessons. The work of the teachers is sufficiently thorough to enable the supervisor to supervise

one lesson and start another, rather than try and teach a lesson in half an hour that it takes two weeks to learn.

Some of the work has been reviewed by the State Inspector, and was much enjoyed and wholly approved. As this is approval that counts, we should all be encouraged to take one little step more next year.

Respectfully submitted,

LILLIE C. STODDARD,
Supervisor.

December 31, 1909.

REPORT OF THE SUPERVISOR OF DRAWING

MR. WILLIAM E. CHAFFIN,
Superintendent of Schools.

Dear Sir: Scituate children are always up and doing. It is a pleasure to teach where there is so much enthusiasm. Both teachers and pupils have this quality, and naturally a good deal is accomplished. Time and practice are necessary to good results, and both of these many pupils in the higher grades put into their drawing and allied work, at home or at school, outside school hours. Last winter the mechanical drawing in the lower grades was so successful I shall repeat it this year, though in a new form. Children do enjoy making things, and measuring is very positive work, which most pupils like.

The drawing during the spring term will be taken up with nature study from flowers, sketching from the window, and decorative design.

Historic ornament has been made a special study at the High School this year by the advanced class, taking up Egyptian Art and Architecture, followed by Greek and Roman Ornament. These are to be made up into books containing the history of ornament, illustrated by copies of ornament and prints of architectural subjects, finished and bound with a suitable decorative cover.

We hope to make this our best year in drawing, and intend to exhibit the best results we have ever shown at our exhibitions in June.

Respectfully submitted,

HARRIET J. FORD

SCHOOL PHYSICIAN'S REPORT

To the Scituate School Committee:

I take pleasure in submitting to you my third annual report for your consideration. I have visited the various rooms from time to time and have examined all pupils who have shown signs of defects or disease, and they have been reported to their parents with advice for medical treatment under direction of their family physician.

There was quite an epidemic of whooping cough in all the schools during the first part of the year. It is impossible to stop the spread of this disease in schools, because the contagion has been spread before a diagnosis can be made. There have been no other contagious diseases during the year.

The condition at the High School grows worse each year with the larger number of incoming pupils. The various rooms are overcrowded, and with the present system of ventilation it is impossible to keep the air good, and at the same time have the rooms warm enough to teach in. In conclusion I wish to thank the Committee and teachers for their help and support.

WILLIAM P. GROVESTEN,
School Physician.

REPORT OF THE TRUANT OFFICER

SCITUATE, December 24, 1909.

To the School Committee:

Whole number of cases brought to my notice, six; two of sickness and four actual cases of truancy.

Respectfully submitted,

JOHN F. TURNER,
Truant Officer for the Town of Scituate, 1909.

APPENDIX

SCHOOL STATISTICS

Population of Scituate (Census of 1905)	2,597
Number of boys between the ages of 5 and 15 years . .	214
Number of girls between the ages of 5 and 15 years .	220
Number of boys between the ages of 7 and 14 years .	168
